ANNUAL REPORT 2023
OUR MISSION IS TO CREATE SMALL MOMENTS OF JOY AND HAPPINESS. WE DO THAT BY OFFERING A VERSATILE RANGE OF BRANDED SNACKS WITH SUPERIOR TASTE EXPERIENCE. TO EVERY CONSUMER. FOR EVERY OCCASION. IN EVERY COUNTRY.
Dear reader,

In this annual report, we are eager to elucidate the strategy, milestones, challenges, and initiatives that define 2023 for our Lotus Bakeries Group. Looking back over the past year, we take pride and enthusiasm in the steps we have taken and are pleased to offer you an open window into our journey in this report.

As you delve into the content, you will find that throughout 2023, our strategic growth ambition and our Environmental Social Governance (ESG) vision have been of utmost importance, as they are increasingly intertwined and mutually reinforcing. This synergy is reflected in the structure of the annual report, which consists of three main sections: a corporate chapter, a financial chapter, and a comprehensive ESG compilation along with the Global Reporting Initiative (GRI) report.

2023 was a meaningful year, in which more than one milestone was reached. For the first time in history, Lotus Bakeries achieved a revenue milestone of more than one billion euro. 2023 also marked the implementation of our Biscoff growth model, the outcome of which confirmed our ambition to be present in consumers’ favourite indulgence moments around the world and confirmed our confidence to take our fair share in the cookie category in every country.

This successful implementation was complemented by the robust performance of our Natural Foods healthy snacking business, driven by its continued internationalisation, its strong performance in the UK, and its focus on innovation. Additionally, our Local Heroes business played a central role in our Group’s success, leveraging its strong position in local home markets, renowned brands and remarkable products.

After a few turbulent years due to the pandemic, geopolitical tensions, and inflationary pressure, today we look ahead with optimism. We start the new year in more calm waters and look forward to continuing structural, good cooperation with our customers.

We would like to extend our heartfelt gratitude to everyone who contributes daily to our mission of creating small moments of joy and happiness by offering a diverse range of branded snacks with a superior taste experience, reaching every consumer, for every occasion, in every country.

On behalf of the entire Executive Committee and the Board of Directors, we end this message with confidence, as in 2023 strong foundations were further strengthened and we continue to believe in a bright future for the company based on our elaborated strategy.

Enjoy reading!

Jan Boone  Jan Vander Stichele
CEO  Non-Executive Chairman of the Board of Directors
A WORD OF GRATITUDE
Before eagerly anticipating what 2024 holds, I find it important to reflect on our journey. Looking back at the past year, I find great happiness in our Group’s achievements. What stands out is our TOP values: the team spirit, open dialogue and passion demonstrated by all Lotus Bakeries employees in 2023. We are a family business with over 90 years of history, and a long-term vision. We wish to share the pride of our achievements and gratitude with all our employees, who are the foundation of our Group’s growth.

A VALUED ESG VISION
This pride and gratitude is aligned with the Social pillar of our Environmental Social Governance (ESG) vision, confirming the value Lotus Bakeries dedicates to this pillar. Building a culture is only possible when people unite. Therefore, fostering a social environment within our company is paramount. We want our people to feel at home and connected while at work, understanding that disconnection outside work is crucial.

Of course, the Environmental and Governance pillars of our ESG vision are equally important. Amongst other actions, a new ESG Director was appointed in 2023, and efforts to reduce our carbon footprint and increase the recyclability of our product packaging continued. The streamlined governance model further integrates the focus on ESG within our operations. You can find full details on our ESG chapter of this annual report.

A RECORD
Reflecting on last year, 2023 began with a major challenge as we faced inflationary times, leading us to raise prices worldwide to maintain our margin and profitability. Thanks to the dedicated commitment of our international teams, we successfully implemented the price increase, achieving record sales of EUR 1.063 billion and sales increase of 21%, the strongest growth figures ever for Lotus Bakeries.

Jan Boone – CEO Lotus Bakeries

THE CEO’S REFLECTION, OUTLOOK AND VISION
BISCOFF® PROVES ITSELF ONCE AGAIN

Biscoff® continued its strong performance with revenue reaching EUR 500 million and a sales increase of 20%.

Our strategic review that examined Biscoff’s growth model led to several changes, including a focus on positioning the cookie and spread within a wide range of consumption moments. In addition, investments in digital marketing and a cleaner, more modern rebranding support Biscoff’s ambitions to become the cookie number three in the world.

GROWING NATURAL FOODS BRANDS

In 2023, our Natural Foods brands grew exponentially, with revenue of EUR 220 million, now accounting for 24% of Lotus Bakeries’ revenue in branded goods. The construction of nākd®’s first ever in-house production site in South Africa and the launch of nākd Protein Bars were significant milestones. In the United States, BEAR® continued to grow steadily in a consumer market increasingly aware of the impact of food on health.

INNOVATIVE LOCAL HEROES

In our domestic market Belgium, we launched the new Lotus® Cake Donut, rejuvenating the waffles and pastries category. And in the Netherlands, we relaunched the Peijnenburg® product line with an increased focus on the version without added sugars.

LOOKING AHEAD

Lotus Bakeries continues to invest in marketing, commercial operations, in-store activities and e-commerce as we embark on the 2024 journey and beyond. Our commitment is evident in the resources allocated to our three strategic pillars: Lotus® Biscoff®, Lotus™ Natural Foods and Lotus® Local Heroes.

In 2023, we strengthened our marketing organization under the leadership of CMO Lotus Bakeries and CEO Natural Foods, Isabelle Maes. Using a strong data-driven approach, the newly appointed revenue growth management team will help shape the product range, pricing, distribution and promotions for Lotus Biscoff and Lotus Natural Foods. Furthermore, we are setting up phased digital channels in several major markets to support the brand awareness and household penetration of these brands.

Lotus Bakeries continues to invest in marketing, commercial operations, in-store activities and e-commerce as we embark on the 2024 journey and beyond. Our commitment is evident in the resources allocated to our three strategic pillars: Lotus® Biscoff®, Lotus™ Natural Foods and Lotus® Local Heroes.

In 2023, we strengthened our marketing organization under the leadership of CMO Lotus Bakeries and CEO Natural Foods, Isabelle Maes. Using a strong data-driven approach, the newly appointed revenue growth management team will help shape the product range, pricing, distribution and promotions for Lotus Biscoff and Lotus Natural Foods. Furthermore, we are setting up phased digital channels in several major markets to support the brand awareness and household penetration of these brands.

In addition, we are committed to invest in our third strategic pillar, Lotus Local Heroes, through initiatives such as the relaunch of Peijnenburg® in the Netherlands and the introduction of the innovative Lotus® Cake Donut in Belgium. These efforts are supported by major commercial initiatives and tailored digital campaigns aimed at engaging our younger target group.

Meanwhile, operationally, our focus remains on the development of our Biscoff® plant in Thailand, which will be a major project in the new year. We know that for Biscoff the greatest potential can be found in the top consumer markets, which is where we want to achieve our fair market share. So, we aim to pursue bigger and bigger success in these international markets. Our ambition remains the same: we want Biscoff to become the world’s third largest cookie brand.

However, the more global our business becomes, the more local we need to think, and in many areas. For example, it is strategically important for us to buy locally. Reducing transport not only has a positive impact on price, but also, of course, on our carbon footprint. In 2023, we have continued to work hard to reduce it and we will continue to do so. It starts with a responsible sourcing policy, but we are also making a broader effort regarding efficient logistics and we continue to work on the technical recyclability of our packaging. It is still our goal to market only packaging that is 100% technically recyclable by end 2025.

As for me, we are not just looking forward to 2024, but are confidently looking beyond the 2024 horizon to the potential of the distant future!

Relaunch of Peijnenburg® in the Netherlands

The focus of this relaunch is to reposition Peijnenburg® as a healthy, accessible in-between snack. The hero product is the significantly improved gingerbread with no added sugars, while still retaining the unique Peijnenburg taste.

Launch of the Lotus® Cake Donuts in Belgium

With these Cake Donuts, Lotus Bakeries is seeking to bring a tasty product with a big dose of fun to the market.

Lotus Bakeries Exceeds the EUR 1 Billion Revenue Milestone

And a revenue milestone of EUR 500 million for the Group’s largest strategic pillar Lotus® Biscoff®.

Forest Plantation Project in Partnership with the Colruyt Group

With this project, it is the Colruyt Group’s ambition to plant over 10,000 hectares of forest containing 12 million trees in the Democratic Republic of Congo. We believe that our partnership in this project strengthens our joint determination to both reduce and compensate carbon emissions.

100% of all packaging of our waffle range is now technically recyclable

Lotus Bakeries is committed to designing all its brands packaging to be technically recyclable by end 2025. Biscoff® Cookies’ packaging was already fully technically recyclable in 2022, and we are proud that 100% of all packaging of our waffle range is now also recyclable!
KEY FIGURES 2023

**REVENUE:** 1,063.0 €M (2022: 877.5 €M)  + 21.1%

**REBIT:** 173.0 €M (2022: 140.2 €M)  + 23.4%

**NET RESULT:** 129.3 €M (2022: 103.3 €M)  + 25.2%

**NET FINANCIAL DEBT:** 120.5 €M (2022: 153.6 €M)

**GROSS DIVIDEND:** 58.0 € (2022: 45.0 €)  + 28.9%

---

**IN 2023, A TOTAL OF ABOUT 555 TONNES OF PACKAGING WAS SAVED**

98% OF ALL LOTUS BAKERIES PACKAGING IS RECYCLABLE

100% OF OUR OWNED SITES HAVE EARNED THE CO₂-NEUTRAL LABEL

---

**GENDER DIVERSITY**

- **Board of Directors:**
  - 70% Women
  - 30% Men

- **Leadership Team:**
  - 56% Women
  - 44% Men

- **All employees:**
  - 49% Women
  - 51% Men

---

1 Palm oil producers who have signed up to the Lotus Bakeries palm oil policy or have their own palm oil policy or who voluntarily adhere to a standard and who supply ingredients or raw materials containing at least 50% palm oil.

2 An internal employee is an employee who is connected to Lotus Bakeries with an employment contract, either of unlimited duration or of limited duration.

3 Key suppliers are all of our suppliers of end products (external production), raw materials, packaging and machinery, with whom Lotus Bakeries has entered into a written contract.

4 The recyclability rate is the average technical recyclability of the packaging of all Lotus Bakeries brands at the end of 2023. It takes into account consumer packaging, distribution packaging and transport packaging. The technical recyclability rate is determined per packaging component on the basis of state-of-the-art design guidelines for recyclability (Ceflex, Recyclass). The average technical recyclability is a weight average based on the packaging weight of each packaging component.

5 The group comprising the Executive Committee, the General Managers and the Corporate Directors.
GENERAL STRATEGY

Lotus Bakeries’ story starts with a caramelised cookie, made with nothing but natural ingredients, named after the flower symbolising purity, Lotus. Today, Lotus Bakeries is a global food company with dozens of snacks that brighten every day. With “offering the perfect snack for every occasion” as the foundation of our mission, we focus on unique, universally loved snacks tailored for everyone. From that well-earned afternoon treat to that extra energy snack on the go. By combining sharp long-term thinking with quick short-term decision-making, intrinsic to a listed family company, Lotus Bakeries is building brands for future generations.

With its Biscoff® cookies and spread, the Natural Foods snacks nākd®, BEAR®, TREK® and Kiddlylicious®, and our Local Heroes such as our waffles, our company is committed to having the perfect snack for every single occasion, creating a moment of pure joy for consumers. Lotus Bakeries aims to be a part in consumers’ daily lives, across age groups and across the world’s borders.

We have a clear strategy in mind to climb to the top of global brands and achieve sustainable growth. Building brands is at the heart of this. Lotus Bakeries operates globally in the snack segment, with brands such as: Lotus, Lotus Biscoff, nākd, TREK, BEAR, Kiddlylicious, Peter’s Yard®, Dinosaurus®, Peijnenburg® and Annas®. Each of these brands has its own DNA and target audience, which require the right focus and attention. That’s why we have designed our strategy using three pillars: Lotus Biscoff, Lotus Natural Foods and Lotus Local Heroes.

OUR 3 STRATEGIC PILLARS

- **LOTUS® BISCOFF®**
  - Build Lotus Biscoff to the cookie number three in the world
  - 54%
  - 20%
  - 16% (2013-2023)

- **LOTUS™ NATURAL FOODS**
  - Accelerate growth of Lotus Natural Foods through internationalisation, innovation and acquisitions
  - 24%
  - 25%
  - 17% (2015-2023)

- **LOTUS® LOCAL HEROES**
  - Secure market leadership and strong cash flow
  - 22%
  - 15%
  - 3% (2013-2023)
MISSION

Our mission is to create small moments of joy and happiness. We do that by offering a versatile range of branded snacks with superior taste experience. To every consumer. For every occasion. In every country.

SUPERIOR
Each of our products offers a unique taste experience. We never compromise on taste!

BRANDED
We focus on developing brands, globally and locally. Our products are recognisable due to strong brand ownership.

OMNIPRESENT
We strive to offer every consumer worldwide a snack for every occasion.

JOYFUL
With our brands, we aim to bring a (small) moment of pleasure and happiness to the lives of our consumers.

SUSTAINABLE
We focus on sustainable growth and are committed to maximising opportunities for future generations.

VISION

Realising sustainable profitable growth by offering a versatile range of branded snacks for every consumption occasion, while maximising opportunities for generations to come via our programme CARE FOR TODAY, RESPECT FOR TOMORROW.

LOTUS® BISCOFF®
Globalisation of Lotus® Biscoff® products with Lotus® Biscoff® – ultimately – at the top of global brands.

LOTUS® NATURAL FOODS
Investment in a strong healthy snacking business, both in our home market, the United Kingdom, and internationally.

LOTUS® LOCAL HEROES
Development of strong market positions in our home markets by continuous investments in our broad range.

> Read more on page 66.

Our strategy

Lotus Bakeries
The globalisation of Lotus® Biscoff® is the first pillar of our strategy. Biscoff has a highly universally loved flavour, with a subtle caramelised touch and a crunchy bite. Biscoff is appreciated across the globe, which is quite unique in the food industry. That is why we have tremendous faith in the universal success of the Biscoff cookie and the Biscoff spread.

Our ambition for Biscoff is high, we want Biscoff to become the number three cookie in the world. It is our mission to bring our unique Biscoff taste to people’s favourite indulgent moments across the globe. Biscoff is now enjoyed in more than 60 countries. In the last few years, we achieved strong growth in big consumer markets, including the United States, the United Kingdom, China, South Korea, Germany, Spain, Italy, Canada, Japan and Australia. This success supports our ambition of globalisation.

The geographical expansion of Lotus Biscoff is the primary pillar of growth, with plenty of further potential. To support Biscoff’s continued internationalisation, a third plant is under construction in Thailand in addition to existing production facilities in Lembeke in Belgium, and in Mebane in the United States. To support the commercialisation of Biscoff Lotus Bakeries has 23 sales offices and agencies, and works with commercial partners in around 50 countries.

In order to take into account the universal appeal of the Biscoff cookie and spread, we have sharpened our growth strategy.

The classic cookie, the sandwich cookie and the spread are our hero products, and making our heroes bigger should be the single-minded focus for all. They also have a unique halo effect; people consuming the Biscoff cookies are more likely to buy the Biscoff spread and the other way around. Historically people enter the Biscoff brand via the cookies, but more and more youngsters get to know Biscoff via the spread.
In early 2023, Lotus Bakeries conducted another strategy exercise for Biscoff® in collaboration with consulting firm Bain & Company. Our current growth strategy has definitely been strong, but the world around us has evolved and we have evolved too, becoming a global player in more categories.

**LEGITIMATE AMBITION TO HAVE OUR FAIR SHARE IN THE COOKIE CATEGORY ACROSS THE GLOBE**

In a large consumer survey in 28 countries, Bain & Company surveyed consumers about awareness of our brand and product, and what it means to them. In many countries, Biscoff® already occupies a solid position. Our brand and product awareness are high. Consumers know Biscoff, and have a lot of enthusiasm about it. A few words always come up: unique, flavor and crunchy. For a cookie to be this highly appreciated in all the countries where we are present is unique, since there are not so many global cookie brands. It is often a category driven by specific local customs and preferences. There are only a few brands that can crack this, and Biscoff is clearly one of them.

We will activate these products in every possible way, with a format appropriate to each country. We will also use cross-communication to maximize the halo effect and the cross-pollination between these three products, with the ice cream and chocolate acting as amplifiers. We will continue to position Biscoff as the cookie to enjoy with a cup of coffee, including out-of-home and on airlines. Additionally, we will also activate additional demand spaces such as emphasizing its appeal as a snack, encouraging the use of Biscoff spread on morning toast, and leveraging during special occasions like Christmas, Ramadan or Diwali. By working together in partnership, with big Consumer Packaged Goods (CPG) companies or impactful influencers, we will amplify the communication around Biscoff even more!

A data-driven digital-first strategy and a strong focus on e-commerce will further accelerate Biscoff’s international growth.

1. Source: External data (sweet biscuits category, mono cookie concepts); Biscoff retail sales value based on internal calculations.

**THE NEW BISCOFF® GROWTH MODEL**

CMO and CEO Natural Foods Isabelle Maes: “We want the Biscoff® cookie to be the number three cookie in the world. It’s our mission to be present in consumers’ favourite indulgent moments across the globe with the unique Biscoff taste experience. Biscoff’s new strategic growth model has given us the confidence to achieve our ambitions, which are centred on four key pillars.”

**Biscoff Heroes**

The classic Biscoff cookie, the Biscoff Sandwich Cookie and the Biscoff spread are our heroes, and our number one priority should be to increase the household penetration of these heroes. Focus is what characterizes Lotus Bakeries. And our focus is on household penetration for our heroes. We will keep activating these three products in every possible way, with a wide range of formats matching the local market where we offer these products.
The Halo Effect
Consumers who buy the Biscoff cookie are 4.5 times more likely to buy the Biscoff spread than those who do not buy the cookie. The same is true the other way round. The categories reinforce each other in a unique halo-effect that we should take advantage of more, by activating both cookie and spread on the same displays, in media campaigns, etc.

“Traditionally, Lotus Bakeries has always separated the activation of the Biscoff cookie and the Biscoff spread, also in terms of marketing. Now that we know they enhance each other, we have decided to activate them together; for example in media or online communication, but also at the point of sale,” explains CMO and CEO Natural Foods Isabelle Maes.

This halo effect also extends to the Biscoff ice cream and the Biscoff chocolate. Both the ice cream and chocolate amplify the unique Biscoff flavour and will help us in our ambition to sell more Biscoff.

Thanks to cross-communication – with one creative idea, one website, one identity – we will make sure that our unique taste experience will give us even more global recognition and acclaim, contributing to our ambition to become the number three cookie in the world.

Expanding Demand Spaces
While the activation of Biscoff as the perfect coffee companion remains very important, there are many other occasions where people can enjoy Biscoff. Examples of these additional demand spaces include the Sandwich Cookie as the ideal treat to share with others, the Biscoff cookie as the perfect snack on the go, and the spread as the ideal ingredient to make a delicious cheesecake with the kids or on toast in the morning. Biscoff can also be used for special occasions such as Christmas, Ramadan or Diwali.

Amplifiers – Activating Partnerships
Focusing on the right partnerships with global FMCG brands will help build awareness of Biscoff. We will focus on fewer collaborations, but true partnerships to ensure consistent messaging and a true ‘Biscoff’ taste. We are very proud of our collaborations with Häagen-Dazs and KitKat. But partnerships with impactful influencers and with quick service restaurant chains, can also serve the same purpose. Social media knows no boundaries, so it makes sense to look beyond our national borders for partnerships. The key is to have enough Biscoff flavour in any offering that is launched in partnership with our Biscoff brand.

INTERNATIONALISATION STRATEGY
Knowing that Biscoff® is universally loved, and that our heroes are also heroes to our retailers, gives us the confidence to take our fair share of the cookie category in every country. Cookies are a global category, consumed all over the world, but the same cannot be said for spread.

To ensure that our strategy is appropriate for the markets we want to penetrate, we have grouped all countries into “dual hero” countries, “cookie first” countries and “tailored scale” countries.

• In so-called dual hero countries, we activate both the cookie and the spread because we know we can make both of them huge. These countries have sufficient per capita consumption for cookies and spread which confirms the potential.

• Countries where the per capita consumption for spread is lower (e.g. because there is no habit in that country to eat sweet spreads on bread) we refer to as cookie first countries. There, we are committing 100% to the cookie, while at the same time supporting the spread as an amplifier to promote the Biscoff cookie.
• The third category consists of countries where we feel we need to adapt our strategy to specific characteristics of that country. These are called tailored scale countries. A customised look and feel or a different packaging format here could help make Biscoff big in those countries too.

DIGITAL TRANSFORMATION AND BISCOFF ACADEMY

Finally, under the umbrella of digital first, we are opting to focus fully on digital media as key enabler. We will create global campaigns, which we roll out in different countries, so that we once again create the same message and experience. This will be supported, among other things, by the rebranding of Biscoff® in 2023 with Lotus as an endorser. Finally, the new central Biscoff Academy ensures that all centrally accumulated know-how about the brand is systematically shared with the entire Biscoff community worldwide.
In 2023, the rebranding of Biscoff® was introduced. This is a further step in the ambition to build a strong global cookie brand; already in 2013, Biscoff has been gradually introduced as a brand on all packaging worldwide. This has been a huge success and has contributed to a consistent and internationally recognised brand in the more than 60 countries where the products are sold.

The new visual identity highlights Biscoff as a brand, supported by the Lotus® brand name, which carries recognition as well as quality and trust. This modified brand architecture is combined with a new style, ensuring strong visibility on shop shelves and a contemporary and powerful look.

The brand personality incorporated in the design reflects optimism, self-confidence and accessibility.

A unique font was developed for Biscoff to reinforce the brand personality. The font is simple and modern, with an attractive design that reflects Biscoff’s confident personality.

The first packages in the new design were introduced in several markets starting in late July. The implementation of the new design will be carried out systematically across the different brand carriers.
In the past years, the production capacity for Biscoff® has been significantly expanded. While additional production lines were being put into service in Belgium and the United States, production efficiency is being further increased, and a new plant is rising in Thailand. All of this is related to the rapidly growing demand for Biscoff worldwide and it is also in line with Lotus Bakeries’ ecological ambitions.

“In Biscoff sales continue to rise internationally,” says COO Ignace Heyman. “In numbers, we’re talking about an average yearly growth over the past 10 years of around 16%. To keep up with increasing demand, it is necessary to continue investing in expanding our production capacity.”

1,000 FEWER SHIPPING CONTAINERS ANNUALLY

Historically, all Biscoff® products were manufactured in Lembeke (Belgium) and sold worldwide. This changed in 2019 with the start-up of the plant in the United States. Now, Lotus Bakeries is taking the strategy of producing locally one step further. “After the site in Mebane in the United States, the construction of our third Biscoff site in Thailand is now in full swing. This plant will produce for the Asia-Pacific region, a region where Biscoff continues to grow very well and that accounts for about one-sixth of our global sales.”

The reasons for starting local production in major markets are diverse. “Firstly, it gives us more flexibility to respond more quickly to sales opportunities. Simply because the products are delivered much faster. As a result the products are also fresher,” Ignace explains. “Another advantage is that we require much less sea container transport. For example, by having a facility in the United States we are able to send 1,000 fewer containers across the ocean every year. That is an important step forward, both ecologically and economically. Even though transport will be organised between the plant in Thailand and the local markets in Asia, we will save about 15,000 kilometres per container there too. Lastly, dispersed production across different sites and across continents ensures more business continuity.”
FOCUS ON CAPACITY AND TALENT IN LEMBEKE

The Lembeke site, commissioned additional production lines last year. “It concerns additional capacity for the Biscoff® Sandwich Cookie, a highly popular and high-growth innovation,” explains Operations Director Belgium Roger Verkarre. “The capacity of the spread line was also increased. In addition to this equipment capacity, we also added a lot of shifts, accounting for an increase of about 50 employees in a year’s time. Whereas production used to be limited during weekends, we now operate most of our lines full-time, which means they are operational 24 hours a day, 7 days a week. By further optimising our planning, we also made more production hours available, maximising the use of our current facilities. In short, we are not just adding production lines, we are making better use of that capacity as a whole.”

Retention and recruitment of new employees also received a lot of attention in Lembeke last year. “Attracting people and making sure they feel good within our company is something we invest in every day,” Rogier says. “This involves both office and plant workers. Finding and retaining the right people is more important than ever. This also benefits production capacity.”

THREE PRODUCTION SITES, SAME EXPERTISE

The project of the new, third plant in Thailand, which is scheduled to be operational at the latest in the first half of 2026, is being managed by a strong team of expats and local employees with a wide range of expertise. “We purposely chose a very well-situated location there, in an area labelled by the Thai government as an economic hot spot and where lots of investments are made in the infrastructure,” Ignace explains. “The new plant is located in less than an hour from one of the world’s largest seaports, which is also ecologically and economically interesting.”

The new plant will employ around 150 people a year after opening. “The employees in Lembeke have tremendous know-how and expertise. We want to achieve that same level in the United States and Thailand. We are working towards this by setting up a global structure where we share what we learn and exchange best practices across sites. As a part of this process, we temporarily assign employees to other sites for training and to facilitate the exchange of information. The great thing is that our staff have so much pride and motivation to do so. They personally want to do their part, and we are very grateful for that,” Ignace comments.

In Thailand, one notable difference from Belgium is that Biscoff® is not yet a well-known brand, and Lotus Bakeries is not a well-known employer. This entails a different focus in terms of employer branding. Ignace adds. “With the brand Lotus, we reach 70% of families in Belgium every year. In Thailand, we have yet to establish this. We are making every effort to show that we are a reliable employer that cares for its people, where working is pleasant and safe, but also where people are able to flourish. This will go hand in hand with the brand’s distribution in stores.”

ENERGY-SAVING MEASURES FROM THE START

The new site in Thailand will be equipped with solar panels on the roof. Additional plans have also been made in Belgium in this regard. “We are significantly expanding our total area of solar panels on all sites. Because it is our business philosophy to take maximum steps to do so. Our ambition extends far beyond what the law requires,” Rogier concludes.

“The employees in Lembeke have tremendous know-how and expertise. We want to achieve that same level in the United States and Thailand. We are working towards this by setting up a global structure where we share what we learn and exchange best practices across sites.”

LOTUS™ NATURAL FOODS
STRATEGY

The internationalisation of our Lotus™ Natural Foods brands forms the second pillar of our strategy. Lotus Bakeries wants to offer the perfect snack for every moment and for every consumer around the world. More responsible, healthier snacks therefore have a clear role to play in our offering. Our ESG ambitions underline this. Since 2015, we have been investing in the natural and healthy snacks category, focusing on strong brands, such as nākd®, BEAR®, TREK® and Kiddylicious® and, since 2022, the sourdough crackers of Peter’s Yard®.

In the United Kingdom, the home market of these brands, our ambition is to maintain our category leadership and grow the categories. We do this on the one hand by activating our hero products, both at the point of sale and through targeted digital marketing. On the other hand, we have an ambitious innovation programme that will help to expand the categories further.

In addition, we are fully committed to accelerated international growth for the Natural Foods brands outside the UK as one of our main growth pillars. Today, around 33% of revenue in these brands is generated outside the home market. That is why, back in 2020, we already centralised all international operations for these brands at the Lotus Natural Foods international headquarters in Baar, Switzerland. This created a multitude of synergies in terms of strategy, development and protection of international brands, but also helped us optimise supply chain and sales strategies.

The appointment of CMO and CEO Natural Foods Isabelle Maes and an overarching marketing approach for Biscoff® and the Natural Foods brands since 2023 creates further synergies in terms of digital and data-driven marketing, which is helping to accelerate the internationalisation of the Natural Foods brands. In addition, the central E-commerce Acceleration Team and the regional Amazon teams are also contributing to the global growth of Lotus Natural Foods.

Strategic Ambition
Accelerate growth of Lotus Natural Foods through internationalisation, innovation and acquisitions

25% 2023 Growth

24% Share of Revenue

17% Historic CAGR (2013-2023)

1 FY 2023 branded revenue
2 Acquisition adjusted organic growth
As of 2024, nākd® bars will also be produced in-house by Lotus Bakeries in Wolseley. The new nākd® production facility, adjacent to the existing BEAR® production site, underscores Lotus Bakeries’ dedication to fostering local production and making a positive impact on the surrounding communities. This expansion positions the South African site as the second-largest production site for Lotus Bakeries, in terms of employees, contributing significantly to the local economy and employment opportunities.

In early January 2024, the very first nākd® bars produced in-house by Lotus Bakeries rolled off the production line in Wolseley, South Africa. A milestone the site had been meticulously preparing for over the past few years, having previously focused solely on the production of the BEAR® Fruit Rolls. “We started in 2019 with around 280 employees”, explains Donald Matheson, Managing Director Lotus Manufacturing South Africa. “Since then, we have more than doubled production of the fruit rolls and invested in packaging capacity. In 2024, the nākd bars will be added. Nākd is one of Lotus™ Natural Foods’ brands, and was until recently fully produced by a co-manufacturer in the UK. Sales have grown strongly in recent years, especially thanks to the internationalisation of the brand. We wanted to be able to ensure sufficient production capacity to accommodate that strong growth.”

South Africa was chosen as the first in-house production site for nākd given the good experience of BEAR production in recent years. “The experience of our employees in the plant that manufactures and packages BEAR for transport around the world is very extensive,” explains Corporate Director Finance & Supply Chain Natural Foods Saskia De Paepe. “This gives us great confidence that this can be duplicated for the production of nākd bars. Moreover, two years ago we had purchased a piece of land adjacent to the BEAR Plant. So we had the space. Bringing the production of nākd to South Africa was therefore a win-win. Furthermore, it also made sense from a risk management perspective to produce on two continents.”

The UK remains our largest market and is growing, so it makes sense that the co-manufacturer focusses on this market. Whereas the Wolseley plant will produce international volumes,” Saskia adds.

VISION BECOMES A REALITY

The production of nākd® in South Africa is carried out in a completely separate building from the BEAR® plant, since both products have very different allergenic status. “There are also manufacturing differences,” R&D Director Elena Bayod continues. “What both products have in common is that they use pure ingredients. For BEAR we mainly use apples and pears, which are locally sourced from the surrounding Ceres Valley. However the production process is different; for BEAR the fruit pulp is heated at a low temperature, after which the fruit rolls are cut, rolled and packed on site. The production of nākd consists of cold-pressing dried fruits and nuts together into a bar, and this process is much more automated.”

Elena Bayod – R&D Director, Saskia De Paepe – Corporate Director Finance & Supply Chain NF, Gareth Dunne – Managing Director NBF and Donald Matheson – Managing Director Lotus Manufacturing South Africa
Donald nods in agreement. “It was exciting to produce nākd ourselves for the first time in a plant 6,000 miles from the co-manufacturer, by people who had never done this before, and with machinery we still had to get used to. A historic moment was the day the Executive Committee confirmed to us that the taste and the texture of the nākd bars were right, and we got the GO to start production. The vision we had, became a reality.”

“We even managed to improve the bars further in several areas,” Elena adds. “For instance, they now have a better and more controlled shape, and we made big changes in terms of packaging. A metallised film improves shelf life and reduces the risk of drying out. We also paid a lot of attention to make the packaging optimal for international transport, which leads efficiently and reduces the chance of product damage during transport.”

**SELF-SUFFICIENT IN WATER AND ELECTRICITY**

A lot of employees were involved in making this ambitious project a success, says Gareth Dunne, Managing Director Natural Balance Foods. “From Lembeke to the UK to South Africa, from Quality to R&D team and from logistics to production teams, it is impressive how well everyone worked together at all levels and in all regions. Employees from various departments put their expertise to work to ensure that we achieved a quality product within the scheduled timeframe. And this was in a country that poses specific challenges, for example in terms of electricity.”

Lotus Bakeries has this covered too: the Wolseley plant has one of the largest solar panel installations in the region, combined with a battery solution that will ensure the site can produce its own electricity for up to 16 hours. “For BEAR®, this makes us 100% self-sufficient, and this is also partially the case for nākd®. We also have our own water supply with a filtration system, so we can work independently of local supply,” Gareth adds.

At the same time, Lotus Bakeries also permanently invests in ecological optimisation and strives to minimise its ecological footprint by limiting emissions as much as possible. For nākd, pallets are now double-stacked to make sure that containers are more effectively loaded before they depart for distribution. “Moreover, we procure the secondary ingredients for nākd locally in South Africa. The main ingredients (dates and cashews) still come from our usual suppliers, but they don’t travel a greater distance in the process than if they had to go to the UK,” Saskia explains.

**BEAR® ALSO KEEPS GROWING**

Meanwhile, Lotus Bakeries was not idle in terms of BEAR® production either. Though Fruit Rolls were initially produced in South Africa and packaged in the UK, over the past few years, thanks to strong growth, a packaging line was also added in the US and three packing lines in South Africa, which makes it possible to distribute from there all over the world. Growth was so strong that a fourth flow wrapper was added in Wolseley in 2023 that is operational since January 2024. Production capacity was also expanded with an additional oven to support international growth.

Not surprisingly, over 650 people are now employed at the Wolseley plants. “As an employer, Lotus Bakeries occupies an important role in the community,” says Donald. “We are proud to be the preferred employer for many people and take that responsibility very seriously. Wolseley has a population of about 14,000. When you realize that every person we employ supports about eight people, our social impact is pretty great. Our local employees are very proud, driven, hard workers. They are willing to go the extra mile to get results. So it was very gratifying that the Belgian King and Queen selected us as one of the five ambassador projects that were allowed to present themselves during their visit to the country. It was a wonderful experience to be able to show what we have achieved. Their visit was an important milestone for Lotus Bakeries in South Africa.”
nākd® expands range: protein bars with 100% natural ingredients

Salome Altwegg
GLOBAL BRAND MANAGER nākd® & TREK®

Joanna Agnew
UK MARKETING DIRECTOR UFF & NBF

Lotus Bakeries believes it is important to offer a balanced range to consumers. In this context, we are constantly pushing for innovation and closely monitoring trends in the market. Last year we launched the brand new nākd® Protein Bar, a natural addition to the existing range.

Consumers are more conscious than ever about what they eat. They are choosing snacks that taste good, but at the same time they are aware of how they affect their physical performance and well-being.

Salome Altwegg, Global Brand Manager nākd® & TREK®, explains: “From spreads to beverages to breakfast cereals and snack bars, across all categories, we see that consumers are looking for products with protein. In the bars category, protein bars are the fastest growing segment. That growth is expected to accelerate over the next four years.”

Up until a decade ago, protein bars were mainly used by extreme sporters, but ever since the pandemic a much wider audience has been buying them. In the UK alone, high-protein variants added 25 million pounds of revenue to the snack bar market. On the one hand, this is due to increased consumer demand, but at the same time the category has seen a lot of innovation and a greater focus on taste, texture and responsible ingredients. And that is exactly where the new nākd protein bar has a key role to play. The nākd Protein Bar still has the same great taste and texture and the simple, pure ingredients that consumers love, but with the benefit of additional, plant-based protein. This version was launched in the UK in May 2023, followed by Ireland, Switzerland, the Netherlands and Spain at the end of 2023.

“Our protein comes from natural ingredients such as peanuts and peanut flour. And at the same time, we don’t compromise on taste at all.”

– Joanna Agnew

UK Marketing Director UFF & NBF Joanna Agnew: “nākd was a perfect fit to respond to the increased demand for bars with benefits. No other brand in the UK does it like nākd: with a bar made from 100% natural ingredients such as raw fruit and nuts, that are cold pressed and with no added sugars. Our protein comes from natural ingredients such as peanuts and peanut flour. And at the same time, we don’t compromise on taste at all. In May 2023, we launched the protein version of the nākd bar in three flavours: Cocoa Hazelnut, Peanut Butter and Caramel in the UK, and quickly achieved strong distribution with retailers. So far the new protein bars have been an integral part of the nākd growth in 2023, demonstrating the love for the brand and the importance of remaining relevant to today’s consumers.”
LOTUS® LOCAL HEROES
STRATEGY

The Lotus® Local Heroes are Lotus Bakeries’ third strategic pillar. These include a wide range of local brands and products – waffles, cakes, gingerbread and cookies – that play an important role in their home market of Belgium, France, the Netherlands or Sweden. The level of confidence in our Local Heroes is high. It is no coincidence that, when making acquisitions, Lotus Bakeries has always focused on companies with a strong brand, exceptional products and a strong position in their home market. We firmly believe that we can reinforce this success by focusing on these local strongholds. We are reinforcing their already strong market positions by continuing to invest in these brands on an ongoing basis, thereby strengthening Lotus Bakeries’ market leadership in the associated sub-segments.

Historic CAGR
3%

15% 2023 Growth

Strategic Ambition
Secure market leadership and strong cash flow

2023 Growth

Secure market leadership and strong cash flow
In the autumn of 2023, Lotus Bakeries in Belgium launched the biggest innovation of recent years in the pastries category: the Lotus® Cake Donut. With this unique product in three popular flavour versions, Lotus Bakeries is rejuvenating the more traditional category and making it more dynamic. And both retailers and consumers clearly like the taste of that.

“The Sweet Cookie and Bakery market in Belgium is split into two categories: on the one hand, there are the crunchy cookies, and on the other, everything that falls into the category of pastry and waffles,” Marketing Director Cindy Goeteyn explains. “Being the market leader, Lotus Bakeries wanted to rejuvenate the latter category and make it more dynamic. We were convinced that the new Cake Donut would be the perfect product for this, because donuts are very popular among young people.”

**PINKYLICIOUS, CHOCOMANIA AND ZEBRA KISS**

The Lotus® Cake Donut, however, is not a deep-fried donut, but a donut made of fluffy cake with a topping in three flavours with eye-catching names. “We have created flavours, colours and decorations inspired by the favourite versions of traditional donuts available at the bakery shop,” continues General Manager Belgium John Van de Par.

“We have the good cooperation between R&D, marketing and the employees at our plant in Oostakker to thank for the fact that we managed to make it a success. This was a great project for them. They can be proud of what rolls off the belt now.”

— John Van de Par

“We are also participating with product placement and have commissioned a billboard before and after each episode. In addition, we are organizing strong digital campaigns starring Camille Dhont, in line with the younger target group. The product is actually perfect for that: the donut is the most Instagrammed product among young people for good reason.”

— Cindy Goeteyn

To boost this innovation, 2024 will pretty much be all about the promotion of the Cake Donut. For one thing, the product was given a prominent role in the script of the TV show Milo, which aired in January and features Belgian pop sensation Camille Dhont in the lead role.

“As always, quality was paramount in the creation of this innovation. "Flavour and quality always take priority. From cake to topping to decoration: everything had to be top notch," John continues. “The Cake Donut proved to be a challenging project: we were producing a new product on a new line. The cake was new, but so was the coating, the decorative vermicelli, and there were tight deadlines. We have the good cooperation between R&D, marketing and the employees at our plant in Oostakker to thank for the fact that we managed to make it a success. This was a great project for them. They can be proud of what rolls off the belt now.”

**STRONG MARKETING SUPPORT**

Retailers were thrilled immediately after the launch. “After the first orders, purchasers told us that they wanted to place additional orders and urged us to produce enough. And consumers are fan as well; the fact that the Cake Donut is airy and not sticky is something that people especially enjoy,” says Cindy.

To boost this innovation, 2024 will pretty much be all about the promotion of the Cake Donut. For one thing, the product was given a prominent role in the script of the TV show Milo, which aired in January and features Belgian pop sensation Camille Dhont in the lead role.

— Cindy Goeteyn
In the autumn of 2023, the famous gingerbread by Peijnenburg® – a Lotus® Local Hero in the Netherlands – got a complete relaunch. With an improved recipe, a sustainable, modern packaging and, above all, up-to-date positioning, today’s gingerbread surprises young and old as a responsible snack for every moment.

“The gingerbread category has been going through a rough patch for a while,” explains Jeroen Harks, General Manager of Lotus Bakeries in the Netherlands. “There are several explanations for this. First of all, consumers are much more health-conscious today. However, they do not always perceive gingerbread as a healthy breakfast option, which is incorrect. And on top of that, far fewer people eat breakfast in the traditional sense nowadays than, say, ten years ago. As a result, gingerbread is not considered by consumers as much as it used to be.”

On the other hand, however, Peijnenburg®’s gingerbread is not only an icon in the Netherlands, but also has exactly the product characteristics consumers are looking for today. “People today want to enjoy healthy food more consciously, and are also more price-conscious than ever. Peijnenburg scores well in all those areas,” Jeroen continues. “We had already been named the most responsible snack. We know from consumer tests that people like our product. So the question was: how do we highlight those relevant product features of our icon in the present day?”

Jeroen Harks — General Manager the Netherlands and
David Jiscoot — Marketing Director the Netherlands

“People today want to enjoy healthy food more consciously, and are also more price-conscious than ever. Peijnenburg scores well in all those areas.”
— Jeroen Harks
A comprehensive study of the market found that Peijnenburg®’s gingerbread possesses relevant characteristics to today’s age: as a healthy, tasty and affordable snack for every moment. So the Peijnenburg range was completely relaunched at the beginning of October 2023 with the new positioning.

“We didn’t change anything about the iconic identity; we just started using it more,” continues Marketing Director David Joost. “We future-proofed the strengths by making some clear, fundamental choices. So, together with our bakers, we revamped the recipes: the Peijnenburg Naturel without added sugars variant was given a new recipe that makes the gingerbread just as delicious as the version with sugar. We also added a wholegrain version, which earned a Nutri-Score A. We also adapted the design of the packaging to make it even easier for consumers to choose gingerbread without added sugars. The new packaging not only has a high-quality appearance, but it is also suited to today’s environmental requirements due to its 100% technical recyclability.”

In all the efforts for the relaunch, the no-added-sugar version was put forward as the key player in the range. “We also gave a more important, prominent role to smaller and individual packaging. This acts as a barrier-breaker for consumers, in terms of price and quantity. This aligns with what today’s young consumers are seeking and, at the same time it supports the positioning as a responsible snack. And yet it’s still very much identifiably Peijnenburg.”

150 MILLION FEWER SUGAR CUBES

Also at the point of sale, Peijnenburg® Naturel without added sugar was clearly promoted as the hero product and this version was given the most shelf space. A development that was also fully welcomed by retailers. “Peijnenburg is simply addressing very relevant themes,” Jeroen continues. “Retailers also have a sugar reduction target. So we really connected with their strategy. As a result, the relaunch was consistently well-received. This again underlines the relevance of this product. The initial results are encouraging and confirm the choices we’re making.”

The relaunch is just the first step, because the ambitions of the Dutch Local Heroes brand are big. “We want to future-proof Peijnenburg for the longer term,” says Jeroen. “One of the goals we have set is to use at least 150 million fewer sugar cubes for our production by 2027. That’s a lot. It underlines that we are taking a clear role in society. Also, in the background, we are constantly talking to nutritional experts to fine-tune the accuracy of our message and our developments. This ensures that our story is also backed by the support of experts. In short: for us, after 140 years, the pride of the past is the relevant choice today.”
Lotus Bakeries aims to achieve sustainable, profitable growth by providing consumers around the world with a diverse range of branded snacks for every occasion. As part of this ambition, we aspire to create value in a sustainable way, not only today, but also for the future generations to come. The range of sustainability matters that are material to our company have been captured in the programme ‘Care for Today, Respect for Tomorrow’. This programme continues to apply, while some significant refinements were applied in 2023 following an extensive double materiality exercise aimed at further strengthening our ambitions. The double materiality exercise strengthened our focus on risks related to environmental and social welfare, giving the Company today an even better view of the specific topics on which we want to work in the coming years. To implement that focused yet challenging strategy and achieve our ambitions, we have also scrutinised our ESG governance structures, steered by the Executive Committee, who in 2023 appointed a new ESG Director and now reports on sustainability matters to the Audit & Sustainability Committee, via the Executive Committee.

Jan Boone, CEO: “When referring to ESG, the focus is often on conducting business in the interest of, and with respect for the environment. Our company takes many steps to protect our environment. The more global our business becomes, the more we need to think locally in many areas. It is strategically important for us to source locally and close to our production sites. Reducing transport not only has a positive impact on price, but also, of course, on our carbon footprint. We further continue the work on our product packaging and aim to achieve 100% technical recyclability by 2025.

However, it is important to recognise that ESG is not just about the environment. The ‘S’ in Social deserves equal attention and consideration. As a family-owned business, we strive to achieve profitable growth that goes hand-in-hand with fostering a healthy community of people around the world. We can only achieve this growth by retaining our current employees – with their commitment and passion – and by attracting new talent. Our focus on employee well-being contributes to this belief”.

Lotus Bakeries has responded to sustainability challenges in the past which are still solid foundations to build our onward sustainability journey. In 2023, again significant steps have been taken on our sustainability matters.

At Lotus Bakeries, we consider it important to report in a clear way on our ESG initiatives. Therefore, we continue this year with a separate ESG-compilation and a Global Reporting Initiative (GRI) report. We are well on our way to preparing for the future disclosure requirements in accordance with the Corporate Sustainability Reporting Directive (CSRD). In this context, we have elaborated our existing materiality assessment and have carried out a comprehensive double materiality assessment.

Lotus Bakeries has responded to sustainability challenges in the past which are still solid foundations to build our onward sustainability journey. In 2023, again significant steps have been taken on our sustainability matters.
The Executive Committee (‘EXCO’) is responsible for the sustainability strategy and objectives for Lotus Bakeries. In 2023, the EXCO has appointed an ESG Director, corporate director and member of the Leadership Team, reporting to the CFO. The ESG Director has to progressively develop the sustainability strategy and ensure compliance with new sustainability regulations. The integration of the sustainability strategy into the organisation is steered by the ESG Director and implemented by the ESG workstreams, which are owned by the business or relevant corporate departments. The workstream leaders are responsible for the delivery of the sustainability targets. The Group Sustainability Steerco, which meets at least once a month, provides oversight of ESG projects and monitors progress.

The EXCO presents Lotus Bakeries’ sustainability strategy to the Audit & Sustainability Committee. The Board of Directors has broadened the mandate of the Audit Committee with ESG matters and renamed it to the Audit & Sustainability Committee by decision of November 24, 2023.

For further details, reference is made to chapter 4 of this annual report.
As a family business, Lotus Bakeries has been focused on sustainable policies for generations. It is an integral part of what we do. We want to see a healthy Lotus Bakeries, today and tomorrow, so that future generations can enjoy it too. On the one hand, we have been working on a balanced, sustainable product range since long by developing the right portion sizes and, from 2015, by acquiring the Natural Foods brands. Our TOP values – which stand for Team, Open Dialogue and Passion – have been an important dimension of our corporate culture for many years and show our commitment to the well-being of our employees. We also made a commitment to use only recyclable packaging for our branded products by end 2025. As you can see, driving growth in a sustainable way has always been and will always be part of our Lotus DNA.”

– ESG Director, Sabien Dejonckheere

The next and obvious step in the development of our ESG policy was the appointment of ESG Director Sabien Dejonckheere. The ESG Director will develop and define the sustainability strategy for the Lotus Bakeries Group in close collaboration with the EXCO, the leadership team and the area management teams. She will embed and integrate the strategy throughout the whole organisation. She will take the initiative to create even more ESG awareness by involving employees in this journey and making optimal use of best practices. In addition, she will provide structure to all the different local projects and responsibilities. ESG has also been given its proper place in our organisation by expanding the Audit Committee in the Board of Directors into an Audit and Sustainability Committee. From now on, the Committee will also advise the Board of Directors on sustainability policy and reporting.”

– CFO, Mike Cuvelier

As a family business, Lotus Bakeries has been focused on sustainable policies for generations. It is an integral part of what we do. We want to see a healthy Lotus Bakeries, today and tomorrow, so that future generations can enjoy it too. On the one hand, we have been working on a balanced, sustainable product range since long by developing the right portion sizes and, from 2015, by acquiring the Natural Foods brands. Our TOP values – which stand for Team, Open Dialogue and Passion – have been an important dimension of our corporate culture for many years and show our commitment to the well-being of our employees. We also made a commitment to use only recyclable packaging for our branded products by end 2025. As you can see, driving growth in a sustainable way has always been and will always be part of our Lotus DNA.”

– ESG Director, Sabien Dejonckheere
Lotus Bakeries has its sustainability programme ‘Care for Today, Respect for Tomorrow’ since long. In the past, to determine our sustainability priorities, we regularly conducted a ‘single’ materiality assessment.

As today’s world is changing rapidly, we are faced with a range of new challenges in the business and along the value chain. We interact with many parties, so it is essential to get a full understanding of the impact of our operations and snacks on the world. In order to confirm or reconsider the priorities of our sustainability programme, Lotus Bakeries in 2023 performed a broad and in-depth assessment using the double materiality lens, reviewing a list of topics from both a financial and an impact materiality perspective.

Our Value Chain

We develop, create and offer a versatile range of snacks that meets the needs of consumers for the global market. In order to do so, we strive to cooperate with our partners along the value chain to create our branded snacks in the most sustainable way possible.

Sourcing: We source high-quality raw materials such as wheat flour, sugar, palm oil, chocolate and others to create our products and packaging materials to protect them. We source related goods and services such as distribution, logistics, production equipment.

Transport: Raw and packaging materials are transported to our production sites. The greater part of our raw materials is sourced on the same continent where we operate as we strive to keep the distance as short as possible.

Production: We transform raw materials into unique and great tasting snacks. We do so at our own production site as well as for some of our brands jointly with our co-manufacturers. We take care to use the precious natural resources efficiently in a safe working environment.

Retail and away-from-home: We aim to make our range of branded snacks accessible for everyone. Our products are sold by our partners through retail channels (brick&mortar and online) and through away-from-home channels.

Consumption: We provide snacks for different consumption moments and needs. Everything we launch has to uphold the highest quality and food safety standards. We pack our most popular snacks in different formats fitting different household sizes in order to combat food waste. On top, everything has to taste delicious, because we know that this will keep consumers coming back to our product range.

End-of-life: We aim to contribute to a circular economy via our technical recyclable packaging and we encourage consumers to sort correctly by providing clear sorting advice.

Our Materiality

We engaged with a large number of stakeholders on these topics. The outcome will serve as the basis to select our strategic ESG platforms within the ‘Care for Today, Respect for Tomorrow’ programme, as well as guide us on which ESG standards to report on for the upcoming CSRD reporting. This assessment will provide strategic guidance on sustainability matters, and how to integrate this with our ambition: offering a versatile range of branded snacks for every consumption occasion to consumers worldwide.

What is Double Materiality?

Financial Materiality / Outside-In

Impact of the environment or society on our organisation

Sustainability topics material from financial materiality perspective.

Impact Materiality / Inside-Out

Impact of our organisation on the environment or society

Sustainability topics material from impact materiality perspective.
Lotus Bakeries performed a double materiality assessment in 2023, which was approached as follows:

Starting point was the sustainability priorities from Lotus Bakeries’ existing materiality assessment, enriched with the requirements of the upcoming CSRD, including nearly 100 ESRS topics and sub-topics.

Based on desk research and workshops with stakeholders and experts, 22 relevant topics were identified as most relevant for Lotus Bakeries to engage on with other actors in the value chain.

This step included engagement through dialogues and interviews to ensure completeness of the selected themes, followed by an online survey to obtain a prioritisation on the 22 key topics from both a financial and impact materiality perspective.

The ranking of the topics was analysed based on the complete set of responses as well as per cluster of stakeholders to identify potential topics that would matter more to a certain stakeholder group. The threshold at which a topic is considered material is locked at 7 or higher on a 9-point scale. The topics with material impact were assessed on their actual or potential impact, the severity (scale, scope and irremediable character) and the likelihood of occurring. The topics with financial materiality were assessed in terms of risk and opportunity and cross-checked with Lotus Bakeries’ enterprise risk management process aimed at identifying, assessing and prioritising risks to ensure one comprehensive and integrated approach.
THE MATERIALITY MATRIX

Our sustainability programme can have a material financial impact on the Group and which topics we as a company can have a material impact on.

  - Product packaging
  - Safety and health
  - Employees well-being
  - Water stewardship
  - Talent development

**Financial materiality**

- **Impact materiality**
  - Circular economy
  - Water stewardship
  - Pollution
  - Sustainable sourcing
  - Biodiversity
  - Product packaging
  - Safety and health
  - Employees well-being
  - Water stewardship
  - Talent development
As such, Lotus Bakeries has identified five topics with double materiality, i.e. the impact of our organisation on the environment or society (“Impact Materiality”) and the impact of society or the environment on our organisation (“Financial Materiality”).

The double materiality assessment was performed in the Audit & Sustainability Committee on 24 November 2023 and the outcome thereof, the double materiality matrix, was approved by the Board of Directors on 4 March 2024.

When we analyse the scores of the multiple stakeholder groups, we see a fairly consistent pattern: the same material topics emerge across all these groups. When we analyse the scores of the multiple stakeholder groups, we see a fairly consistent pattern: the same material topics emerge across all these groups.

The topics identified as a result of the double materiality exercise serve as the basis for selecting the proper ESRS standards from the CSRD regulations. The topics that are material are linked to the following ESRS standards:
- ESRS E1: Climate change (Energy usage, carbon reduction)
- ESRS E5: Resource use and circularity (Product packaging and sustainable sourcing)
- ESRS S1: Own workforce (Safety and health of employees and Employee well-being)
- ESRS S4: End consumer and customer (Food safety and quality, Balanced portfolio; long-term strategy; preventing business interruptions, cybersecurity, taste experience)
- ESRS G1: Corporate governance (financially sound company, long-term strategy, cybersecurity and preventing business interruptions)

In the course of 2024, Lotus Bakeries will further assess - within each of these ESRS standards - which datapoints are relevant to include in future progress reporting.

PROGRESSIVE EVOLUTION OF OUR SUSTAINABILITY STRATEGY

While our framework ‘Care for Today, Respect for Tomorrow’ is a robust foundation, our sustainability strategy will be screened using the fresh insights of the double materiality exercise. Lotus Bakeries will progressively evolve its sustainability strategy, focusing on both double and single material priorities for the Group. The ESG governance bodies will play a crucial role in crystallising the ESG strategy throughout 2024, providing guidance in setting targets and developing clear roadmaps for the environmental and social aspects of our sustainability programme.

We acknowledge that there will be challenges on our sustainability journey. There are global challenges such as the increasing geopolitical tensions that could expose economies to disruption in sourcing raw materials, but also the devastating effects of climate change puts a stronger pressure on companies to gear up in their decarbonisation journey. For Lotus Bakeries, there are several concrete challenges. Exploring the electrification of gas ovens will entail a comprehensive investigation in the production of our cookies and bakery snacks, as we will always want to preserve our unique great taste. Using deodorisation in Scope 5, especially relating to raw materials such as palm oil and cocoa will require a thorough approach as the challenges are complex because the risk of deforestation is closely linked to farmer poverty and there is no straightforward solution. We will need to work closely with our suppliers on these matters. Packaging remains challenging, as on the one hand, it is needed to guarantee the highest food quality and safety and to combat food waste. On the other hand, it is currently technically impossible to fully close the cycle, and for food safety reasons, it is not allowed to use mechanically recycled material that comes in contact with food. Lastly, as a fast-growing company, our impact on people working directly and indirectly for the Group will continue to increase and it remains our first and foremost challenge to ensure safety and well-being of all our people. As a global company, Lotus Bakeries faces many cultural, regulatory and language barriers to overcome in order to safeguard essential social welfare guards throughout our operations and our value chain.

Balanced Portfolio of Great Taste

Nevertheless, Lotus Bakeries remains steadfast in its sustainability ambition and has identified several strategic areas of exploration. The first one is to have a Balanced Portfolio of Great Taste. We aim to meet the needs of all end-consumers in a balanced way at all times. We will make sure that our range is balanced on several levels; there will be a diverse range of products (from Biscoff® cookies to pastries to the cold-pressed nākd® bars with only natural ingredients, to the BEAR® fruit rolls); for multiple target groups (from babies to toddlers to children and adults) and for different consumption moments and needs. Everything we launch has to uphold the highest quality and food safety standards. On top, everything has to taste delicious, because we know that this will keep consumers coming back to our product range.

One Lotus Family

A second strategic priority is our One Lotus Family. This concerns the health, safety and well-being of our employees. The good policies that we are already implementing for our employees today will be continued in the following years. In the context of the EU Deforestation & Disconnection Charter in 2023, which is a strong statement about just how much we value the well-being of our employees. In addition, we will also follow up on matters such as training, diversity, onboarding, new employees and safety. In doing so, we also want to pay attention to employees in our value chain, both upstream and downstream.

Sustainable Sourcing

The latter is also a key focus within our third strategic priority, namely Sustainable Sourcing, which has a number of dimensions and touches on both social and environmental factors with our suppliers. For example, last year we developed the Human Rights Policy, both for our own employees and for those from our value chain. The second dimension focuses on environmentally friendly choices within that value chain to add in our pathway of decarbonisation. In this context, we are reaching out to our front-line suppliers to dedicate even more time and attention to selecting sustainable raw materials. We are also preparing for the new EU Deforestation Regulation which comes into force as from 2025.

Climate Change

A final area of attention is Climate Change. We will contribute to this by focusing on various components. This includes our packaging strategy and commitment to use only recyclable packaging for our branded products by end 2025, as well as initiatives aimed at reducing our carbon footprint. In 2024, we will assess how we can reduce our carbon footprint, which may include opportunities to electrify our gas ovens, to audit our energy balance, to green our fleet, and to evaluate the CO2 emission of the suppliers that Lotus Bakeries works with.
Lotus Bakeries prepares for European Green Deal & CSRD

Mike Cuvelier
CFO

Sabien Dejonckheere
ESG DIRECTOR

Respect for the environment, people and society is in Lotus Bakeries’ DNA. In the past, we summed this up in our programme Care for Today, Respect for Tomorrow. Under the new ESG regulations, that programme remains a powerful statement. By integrating the underlying philosophy within our entire business operations, we are preparing for the European Green Deal and the resulting Corporate Sustainability Reporting Directive (CSRD).

We have been making our ESG initiatives available to our stakeholders for a number of years in an ESG compilation report. The new European CSRD regulation requires companies to elaborate and harmonise ESG reporting as from 2024 through a set of reporting standards in order to increase the comparability between companies.

CFO Mike Cuvelier: “To prepare for this, we carried out a readiness scan in 2023, revealing our level of preparedness for reporting in accordance with datapoints that are requested by new European legislation. In addition, as part of the double materiality assessment, we explored the topics that European legislation put forward for companies to assess in terms of materiality from both, a financial and an impact perspective.

The previous materiality assessment, which was prepared solely from a financial perspective, was updated and supplemented with the impact materiality. The double materiality assessment includes all Group entities that are consolidated, thus including organisations from outside Europe as well.”

ESG Director Sabien Dejonckheere: “In total, Europe put forward close to 100 topics and subtopics. We first narrowed down this longlist to a smaller number through desk research, and then discussed them with experts in focus groups. Not all of these are priorities for Lotus Bakeries. For example, our water audit shows that the topic “water and marine resources” is not a priority as we don’t use a lot of water in our organisation. On the other hand, our workforce is a big priority, as we employ more than 2,900 people. This is why we ultimately ended up with a reduced but relevant set of 22 topics for our Company, which we then shared with stakeholders for a qualitative discussion and quantitative scoring.”

As a result of this double materiality assessment, it became clear on the one hand, which topics could have a material financial impact on the Group and on the other, which topics we as a company could have a material impact on. This also helps us to determine exactly which priorities we will continue to focus on as a company. We will report on those priorities for the 2024 reporting period in line with the CSRD.

“We will also be looking at what information is already available for reporting, and the datapoints for which we need to do some additional preparation,” Sabien continues. “Together with Corporate Finance, which already has very robust reporting processes, a datawarehouse will be set up to make this possible. Since the underlying thinking and approach of the finance department is similar to that of ESG reporting, the internal expertise we have already developed is priceless.”

For some time now, Lotus Bakeries had opted to voluntarily provide limited assurance for a limited set of figures. As of the reporting period 2024, such assurance will be provided for the entire assessment, as required by law.
OUR SUSTAINABILITY IN ACTION

Our 'Care for Today, Respect for Tomorrow' framework is aimed at doing sustainable business, not only today, but also for the future generations to come. Our sustainability strategy in 2023 is still centred around three pillars: our environment, our employees and our community.

The three pillars of our sustainability strategy

With regard to the environment, we are actively combating global warming. In all our activities, we strive to source sustainably and to reduce our environmental footprint.

For our employees, we have a recruitment policy that aims to attract a diverse and talented group of people who share our TOP-values. We are committed to long-term employment and provide our employees with a pleasant, challenging, inspiring and safe working environment.

Finally, regarding community, we actively undertake our social responsibility by ensuring sound business practices throughout our organisation. We also contribute to the prospects of future generations by supporting educational projects through our Foundation for Education.

Progress reporting 2023

Operational Key Performance Indicators (KPIs), such as waste, utilities usage and accident frequency, as well as Human Resources (HR) KPIs are tracked on a monthly basis using a comprehensive monitoring and registration system. Meanwhile, additional metrics like emissions and packaging recyclability are presently assessed annually at each production site. A thorough assessment of our emissions across Scope 1, 2, and 3 categories are performed in collaboration with CO2 logic - South Pole Group. Starting in 2024, KPIs identified through the double materiality assessment will undergo more frequent monitoring, occurring at least quarterly. This enhanced monitoring will be facilitated through our Enterprise Resource Planning (ERP) system.

With this report, Lotus Bakeries aims to communicate about its achievements and progress within the established sustainability strategy for 2023. Sustainability indicators

Each of the three pillars contains a set of sustainability indicators. A selection of indicators has been validated by PwC Bedrijfsrevisoren BV. The validation was performed in accordance with the International Standard on Assurance Engagements (SAS 3000), a model developed to provide assurance on non-financial data.

The assurance indicators are marked throughout the text by GS.

For the assurance report on the attested indicators for the year as per December 31, 2021 and 2022, please refer to page 158 of the 2021 annual report and page 140 of the 2022 annual report.

The renewed commitment and progress report for 2023 will be available on the UN Global Compact website.

Global Reporting Initiative

We have been publishing a Global Reporting Initiative (GRI) report since 2017. This GRI report will be published on our website: https://www.lotusbakeries.com/reporting-disclosure

In the future, this GRI report will become an integral part of reporting requirements established by the Corporate Sustainability Reporting Directive (CSRD) and the related European Sustainability Reporting Standards (ESRS).

United Nations Global Compact

In March 2021, Lotus Bakeries was accepted as a member of the United Nations (UN) Global Compact. The UN Global Compact is a global sustainability initiative for businesses set up by the United Nations. As a result, Lotus Bakeries is committed to upholding the Ten Principles of the United Nations in the area of human rights, working conditions, environmental anti-corruption and to ensure they form part of its strategy, culture and daily activities.

Our participation in the UN Global Compact also means that we revere our commitment annually and report on the progress of our efforts to implement the Ten Principles.

The three pillars of our sustainability strategy
ENVIRONMENT: AMBITION 2023 & ACHIEVEMENTS

In recognition of the pressing challenges presented by climate change to both our environment and human well-being, Lotus Bakeries is committed to taking action.

Our Group is determined to join the battle against global warming and minimise our impact on the environment in all aspects of our operations. The main focus areas where we aim to achieve zero ecological impact are:

- SUSTAINABLE SOURCING
- SUSTAINABLE PACKAGING
- REDUCING OUR CARBON FOOTPRINT

SUSTAINABLE SOURCING UNIT 2023 2022 2021

Key palm oil suppliers who endorsed the principles of Lotus Bakeries Palm Oil Policy

Our production sites which process palm oil and have achieved the RSPO certificate

Our Lotus® Biscoff® chocolate products with the Rainforest Alliance quality mark

Our eggs that are sourced cage-free

SUSTAINABLE PACKAGING UNIT 2023 2022 2021

Packaging to product ratio g/kg product

Reduction of plastic tonnes/year

Reduction of glass tonnes/year

Reduction of cardboard tonnes/year

SKUs with 100% recyclable packaging

Use of recycled cardboard

Use of cardboard with the ‘sustainable managed forest guarantee’

SUSTAINING FOOTPRINT

% of owned sites that have earned the CO₂ neutral label

Total GHG emissions Tonnes CO₂e

GHG emissions - scope 1

GHG emissions - scope 2

GHG emissions - scope 3

GHG emissions intensity

Energy consumption kwh/tonne

kg of waste per tonne generated

CARBON FOOTPRINT UNIT 2023 2022 2021

% of owned sites that have earned the CO₂ neutral label

Total GHG emissions Tonnes CO₂e

GHG emissions - scope 1 Tonnes CO₂e

GHG emissions - scope 2 Tonnes CO₂e

GHG emissions - scope 3 Tonnes CO₂e

GHG emissions intensity Tonnes CO₂e/mEUR

Energy consumption kwh/tonne

kg of waste per tonne generated

1 Total Scope 1 and 2 emissions relating to owned sites amount to 40,377 tonnes CO₂e.
2 This concerns residual waste, production waste, grease, paper and cardboard at our owned sites. The increase of waste per kg produced is largely driven by the start-up of new production lines and innovations in our product range with a related increase in trials and set-up for new products.
3 The recyclability rate is the average technical recyclability of the packaging of all Lotus Bakeries brands by the end of 2023. It takes into account consumer packaging, distribution packaging and transport packaging. The technical recyclability rate is determined per packaging component on the basis of the state-of-the-art design guidelines for recyclability (Ceflex, Recyclass). The average technical recyclability is a weighted average, based on the packaging weight of each packaging component.
4 Palm oil suppliers who have signed up to the Lotus Bakeries palm oil policy or have their own palm oil policy in force that includes at least equal standards and who supply ingredients or raw materials containing at least 50% palm oil, and as for these products represent more than 5% in any recipe.

HIGHLIGHTS

84 - Lotus Bakeries

Our sustainability programme

Lotus Bakeries - 85
REDUCING OUR CARBON FOOTPRINT

BASELINE OF OUR CARBON FOOTPRINT

In 2023, Lotus Bakeries committed to the Science Based Targets initiative (SBTi) and its reduction target standards to reach net-zero by 2050. Upon joining the SBTi, we meticulously established our 2023 baseline, employing the Greenhouse Gas Protocol as our guiding methodology, in collaboration with CO2 logic - South Pole Group. This comprehensive approach involved a thorough assessment of our emissions across Scope 1, 2, and 3 categories. As a food company, we are participating in the Food, Land and Agriculture (FLAG) segment within SBTi, which means our commitment extends upstream to the farmer’s level to analyze our Scope 3.

The main contributors to our Scope 3 CO2e emissions are raw materials and, to a lesser extent, transport and packaging. Important ingredients in this respect are vegetable oils, wheat flour, sugar and chocolate, which represent together more than 75% of the CO2e emissions coming from raw materials. For palm oil and chocolate, which are ingredients known for their high CO2-intensity, we have already partnerships through RSPO Palm oil and Rainforest Alliance. We are reinforced in our belief that sustainable sourcing is important and we will continue to build on these partnerships. We refer to page 101 of this annual report.

During 2024, we will develop a roadmap with concrete initiatives to reduce our carbon footprint. This step is critical as we work towards submitting for SBTi validation in 2024, for validation by March 2025.

We assessed the following:

**Scope 1 emissions:**
- Stationary combustion of fossil-fuel related sources in our own operations
- Mobile combustion of fossil-fuel related sources in our own operations
- Fugitive emissions from our own operations
- Process emissions (baking powder) in our own operations

**Scope 2 emissions:**
- Indirect emissions associated with purchased electricity, heat and steam in our own Lotus Bakeries operations

**Scope 3 emissions:**
- Purchased goods and service (including effects of Direct Land Use Change and Land Management)
- Capital goods
- Upstream transportation and distribution
- Waste generated in operations
- Business travel
- Employee commuting
- Upstream leased assets
- Investments
- Downstream transportation and distribution
- End of life treatment of sold products

Our total greenhouse gas (GHG) emissions (Scope 1-3) reached 557,275 tonnes of CO2 equivalent in 2023.

Furthermore, we acknowledge the challenges that we are facing in determining our decarbonisation roadmap. Therefore, it is of utmost importance that our roadmap is well-considered and well-founded, so that aspiring targets can be defined in line with our sustainability strategy and ambitions.

Relevant on technological development and referring to page 86, the “Net Zero by 2050” target requires the Group to assess the need and timing of both CAPEX and OPEX investments.

We also refer to the EU taxonomy disclosure presented on page 148 of the Annual Report.
DECARBONISATION INITIATIVES UNDERTAKEN IN 2023

Lotus Bakeries’ owned sites are carbon neutral. This has been the case since 2015 and remains so in 2023. All our scope 1 and 2 emissions of our owned sites are offset with certificates.

To have a meaningful impact we also actively proceed with the implementation of decarbonisation projects to reduce the amount of GHG. In 2023, Lotus Bakeries structured its decarbonisation initiatives around three segments: own operations, sustainable logistics and sustainable sourcing.

Own operations (scope 1 and 2)

Energy efficiency

In Lotus Bakeries Manufacturing South Africa, an important investment was allocated to further increase the plant’s solar capacity and install solar power batteries. Utilizing renewable energy will strongly reduce the future output of the plant’s CO₂e emissions.

In Belgium, energy-saving measures were implemented for the compressed air systems used in our production facilities for processing and cleaning. We implemented a phased installation of ergonomically shaped air blow guns, which are more robust, effective and energy efficient. Additionally, a study on leakage detection and mapping of standby consumption resulted in further reduction of air consumption, and consequently, energy consumption.

Another initiative involved a preparatory study to establish a detailed e-monitoring system across all our Belgian plants. This system will enable Lotus Bakeries to obtain detailed insights on energy usage throughout the production cycle of a product and provide ideas to optimise energy usage.

In the context of scope 2 emissions, it was identified that a diverse mix of energy sources is utilized. In 2023, 4% comes from renewable energy sources. We aim to further increase the use of renewable energy as part of our pathway to decarbonise.
Use of refrigerants
Lotus Bakeries also investigated its cooling systems and infrastructure. While refrigerants work well to keep things cool, some have a drawback in the sense that they emit greenhouse gas. We screened the sites in Geldrop and Sint-Johnenvege (the Netherlands) and Cloostakker (Belgium) and initiated a renewal process of the cooling installations and refrigerants in 2023. This renewal operation is labour intensive, and the execution thereof will run into early 2024.

In our new plant in Thailand we have opted for water-cooled cooling towers. In hot climate, year in year out, it is far more effective and energy friendly to use water cooling.

Green employee mobility
We aim to go to a 100% green fleet in Europe in the future.

The largest fleet is located in Belgium. Employees in Belgium can only choose a fully electric vehicle as their company car. To support this transition, electric charging stations have been provided. In 2023, 50% of the Belgian fleet were electric cars vs. 15% the previous year.

In the Netherlands we offer a choice between electric and plug-in hybrid cars until 2026. After that date, we will offer only full electric cars in the fleet. In 2023, 40% of the Dutch fleet were electric cars vs. 28% the previous year.

Furthermore, there is a bicycle leasing scheme in place for Lotus Bakeries employees in Belgium. About 200 of our employees have opted for this benefit.

Transition to more sustainable logistics (scope 3)
Reduction of container transport through local production and optimized packaging solutions.

Since 2019, Lotus Bakeries has chosen to spread its production sites across different continents. The production sites in Lembeke (Belgium), Mebane (USA) and Chonburi (Thailand) are not only economically advantageous but also ecologically beneficial for reducing container transport overseas. Our Biscoff plant in Mebane, for instance, has already contributed to a yearly reduction of 1,000 containers. Furthermore, with our third plant in Thailand, which is currently under construction, we anticipate saving about 15,000 kilometres per container.

In Australia, we have changed our packaging for Lotus® Biscoff® spread from glass jars to PET jars. PET jars are commonly used in the Australian market and are able to preserve the taste and quality very well. But since they are lighter in weight, the pallets can be stacked higher. As a consequence, we ship fewer pallets which leads to a reduction in transport. This contributes to the reduction of carbon emissions. On a yearly basis, this means a reduction of 20 containers for one market for one product.

Electrification of truck transport in Belgium
In collaboration with one of our clients and one of our logistic providers in Belgium, Lotus Bakeries has tested the potential electrification of its truck transport. Together, we decided to initiate the electrification of the entire truck fleet. In 2024, we will start operating two electric trucks. This pilot programme is aimed at generating valuable insights into the viability of this green transport mode and will allow us to be ready for further expansion in the coming years.
Compensation of emissions within the value chain

In our roadmap we aim to decarbonise as much as possible. To become hundred percent net-zero we will need to capture the remaining part via carbon removal credits.

To prepare for this carbon capturing Lotus Bakeries has joined the Colruyt Group’s collaborative tree project in the Democratic Republic of Congo in November: the planting of 10,000 hectares of forest, which equates to over 12 million trees. It is foreseen to obtain Gold Standard verification on this project.

Lotus Bakeries is convinced that only through collaboration with like-minded partners, we can effectively reduce emissions across the entire value chain.

LOTUS BAKERIES’ VISION ON PACKAGING

SUSTAINABLE PACKAGING

Our ambition: 100% recyclable packaging by end 2025

By the end of 2025, Lotus Bakeries aims to market only 100% technically recyclable packaging for all our brands. The ideal packaging also contains as little packaging material as possible, while optimising the use of recycled materials. This must be achieved without compromising the quality, taste and freshness of our products. Protecting our products and providing the right format for each type of household will at the same time contribute to the fight against food waste. Innovative packaging designs and circularity remain top priorities.

LOTUS BAKERIES’ VISION ON PACKAGING

1. We only want to offer our consumers products of the highest product quality and with a superior taste experience.
2. That is why we must protect our products: packaging allows us to combat food waste and guarantee food safety.
3. We aim to make our packaging as sustainable as possible and are committed to reducing our packaging carbon footprint.

In this context, Lotus Bakeries has formulated a packaging strategy that focuses on the reduction of packaging, using innovative design and investment in circularity.
REDUCE WHAT WE USE

In 2023, Lotus Bakeries continued to reduce the amount of packaging material put on the market. A total of 555 tonnes of packaging was saved. The further we get in the process, the more challenging the processability of these materials within our production plants becomes. It is thus a fine balance between reduction and processability. Improvements have been made in primary, secondary, and tertiary packaging.

Primary packaging

Finding optimisations to the packaging for consumer units is embedded in the procurement activities on a daily basis, but also tackled in specific reduction projects.

- For the Suzy® sugar and vanilla waffle product, the thickness of the bundle packs has been reduced, which saves two tonnes of plastic per year.
- For Kiddylicious®, we switched to a recyclable and thinner mono-material wrap for several products1. This saves 35 tonnes of plastic on an annual basis.
- For Urban Fruits®, the sharing pack formats have been standardised which led to a reduction of one tonne of plastic and six tonnes of cardboard. Furthermore, the uniform packaging facilitates more efficient stacking on transport pallets, resulting in a 20% reduction in the number of pallets we transport. Needless to say, any savings in terms of materials will also invariably contribute to reduced transport and carbon emissions.

Secondary packaging

After focusing heavily on primary consumer packaging in recent years, we took a close look at our secondary packaging. We scanned the entire range and looked for improvement areas with a clear impact. The rebranding of Biscoff® was the ideal opportunity to implement those changes right away.

One major improvement has been to shorten the flaps on the sides of the cardboard boxes for the 250g packages of Biscoff cookies and the Biscoff sandwich cookies. The boxes now have a small opening on the side, with great sustainability benefits:

- Around 117 tonnes of material is saved annually.
- The trucks supplying us have to travel roughly 2,000 km less per year because of efficient stacking on pallet level.
- Carbon emissions are significantly reduced because of reduced material use and optimised transport.

Based on this project, we also set up new guidelines on how to design boxes in the future: shorter flaps are now standard, ensuring optimal and future-proof design.

Tertiary packaging

After finishing a successful pilot to reduce the amount of plastic used for stretch film wrapped around baked goods pallets, the findings were implemented in 2023 for pallets in our production plants in Lembeke, Eeklo and Courcelles. This results in an annual reduction of 10 tonnes of plastic.

---

1 Smoothie Melts, Crispy Tiddlers, Fruit Wriggles and Fruity Drops
DESIGN FOR TOMORROW

As part of our commitment to launch fully technically recyclable packaging for all our brands by the end of 2025, we achieved a score of 98% technical recyclability by the end of 2023. The last percentages tend to be the most challenging ones, as improvements become more complex on a technical and operational level. Still, in 2023 we were once again able to make important improvement across all our strategic pillars.

Biscoff®

While our Biscoff® cookie range was already at 100% technical recyclability in 2022, there were still some actions to take for Biscoff® spread and Biscoff® chocolate.

- The non-recyclable multi-material for the cover film of the catering cups was replaced by a mono-material, which is technically recyclable.
- With regard to Biscoff® chocolate, we removed the carbon black from the tray of the end-of-year collection, as it prevented the tray from being sorted and therefore recycled.

Natural Foods

Within the Natural Foods brands, nākd® and TREK® were already 100% technically recyclable. Peter’s Yard®, which was added to the range in 2023, already had technically recyclable packaging as well. In 2023, efforts were focused on Urban Fruit® and Kiddylicious®.

- By replacing the multi-material for the Coconut Chips packaging of Urban Fruit with a mono-material this year, this range now also achieves a score of 100%.
- The biggest efforts in 2023 went into the Kiddylicious, a large and diverse packaging range. The project to make this range technically recyclable was initiated in 2020, but the switches for some major products’ took place over the past year. By the end of 2024, Lotus Bakeries aims to have switched completely to 100% technically recyclable packaging for this brand.

Local Heroes

The packaging of many of the Local Heroes brands has historically been technically recyclable. Some products in the pastry and waffles range still needed some adaptations to increase their recyclability.

- Lotus® crispy waffles, Le Glazik® palets and galettes packaging all used a PVdC coating, which kept the products crispy, but made the packaging non-recyclable. Over the past year we found an alternative that allowed us to remove the coating while maintaining quality.
- Lotus® quatre-quart butter cake, a product for which the right moisture balance is essential. This makes finding a fully recyclable solution complex. There is a test in progress, and Lotus Bakeries hopes to switch to more sustainable packaging for this product as well in 2024.

While 2025 is just around the corner, 2023 has proven to be a fruitful year for increasing the recyclability score of Lotus Bakeries with a focus on the products shown below. The road to 100% is clear and will be further implemented in 2024 and 2025.

1 Smoothie Melts, Crispy Tiddlers, Fruit Wriggles and Fruity Drops.
AIM FOR CIRCULARITY

Lotus Bakeries’ sustainable packaging strategy also contributes to a circular economy. In the process, we always seek to ensure that products are sorted and recycled to subsequently use the recycled material. In order to close the cycle as much as possible, there are some focus points which are tackled in our ‘Aim for circularity’ pillar.

Although it would be ideal, it is currently technically impossible to fully close the cycle, since there will always be a loss of material during the process; as a result, an input of new material will always be necessary. For this, we will use as many sustainable sources as possible, for example certified cardboard fibres through certification by FSC, PEFC, or SFI. Lotus Bakeries does not currently have a target of achieving 100% FSC, PEFC, or SFI certification. Lotus Bakeries has the ambition to increase the use of certified cardboard fibres and proactively inquires about the availability and price for certified fibres during tender procedures.

To encourage consumers as much as possible to sort packaging correctly, we updated all the recycling information during the Biscoff® rebranding. Now all packaging that is recyclable in the country where it is marketed, carries the ‘Recycle Me’-logo. If not, the packaging will show the Tidy Man, urging consumers to dispose of it properly in the right bin.

What happens to the waste then varies worldwide. Lotus Bakeries contributes to this through various networks and initiatives. For example, in the UK, we are a member of the Flexible Plastic Fund, which through the FlexCollect project, aims to develop guidelines for municipalities to collect flexible plastics at the kerbside.

Furthermore, we are a member of CEFLEX, and part of a CEFLEX working group, helping to develop guidelines for brand owners on optimal packaging design for sortability and recyclability in mind.

Recycled material use is crucial to close the cycle. In 2023, our cardboard consisted of 79% recycled cardboard, while for glass we are using 58% recycled glass. In terms of plastic, we use 30% recycled plastic for the shrink wrap around the trays of our spread, but the challenge is greater for plastic that comes into direct food contact. Although 98% of our branded product packaging was technical recyclable by the end of 2023, the percentage of recycled plastic used represents only 1% of the total amount of plastic used for the packaging of branded products. The low percentage is directly linked to food safety. Mechanically recycled plastic is not permitted to come into contact with food. Chemically recycled plastic offers a solution for this, but at present this is only made available on a limited scale. It is to date not yet possible to close the cycle and reuse our recyclable packaging as recycled content in food packaging.

Finally, we also need to consider the packaging taxes. Extended Producer Responsibility systems have been in place since the 1990s. Recently, additional taxes on packaging such as plastic tax and litter tax have been introduced in several countries such as UK, Spain, Netherlands following the European Green Deal. Our “Reduce what we use” and “Design for tomorrow” pillars help in minimizing this, as most taxes are based on packaging weight and recyclability. Where we cannot minimize any further, we make a financial contribution in order to create a social impact. In that way, we hope to contribute to significant improvements in the recycling infrastructure.
Lotus Bakeries’ carbon footprint analysis confirmed that the main contributors to our CO₂ emissions are in Scope 3 and more specifically raw materials and crops, with transport and packaging contributing to a lesser extent. This reinforces our belief that sustainable sourcing is critical. Not only does it support communities and improve the social welfare of workers in the value chain, but it also plays a vital role in addressing global warming. To maintain this commitment, we will continue to engage with our suppliers.

Palm oil and cocoa are particularly significant for decarbonization, and we already have partnerships through RSPO Palm Oil and the Rainforest Alliance certificate for our Biscoff chocolate. We plan to build on these partnerships and increase our efforts further.

Lotus Bakeries is therefore committed to minimizing deforestation and improving livelihoods through the sustainable sourcing of its raw materials and crops sustainably.

**Palm Oil**

**RSPO certificate**

Lotus Bakeries has been a member of RSPO since 2011. It is important to Lotus Bakeries that the palm oil it uses in its products has been produced sustainably and does not contribute to deforestation or the destruction of vulnerable areas. Lotus Bakeries therefore selects its key palm oil suppliers carefully on the basis of the NDPE principle (No Deforestation, No Peat, No Exploitation) in its purchasing standards. That is why Lotus Bakeries only buys RSPO certified palm.

In 2023, Lotus Bakeries was a member of the RSPO (Roundtable on Sustainable Palm Oil) and the Belgian Alliance for Sustainable Palm Oil, and was committed to purchasing only sustainable palm oil. Moreover, all Lotus Bakeries’ sites that use or purchase palm oil also have an RSPO certificate.

**Palm Oil Policy: investment in sustainable agriculture and reforestation**

In addition, Lotus Bakeries requires its key palm oil suppliers to also invest in a number of projects to, among other things, rejuvenate forests and help farmers switch to sustainable cultivation.

Lotus Bakeries has endorsed this in its palm oil policy. At the end of 2023, 100% of key palm oil suppliers had endorsed the principles of Lotus Bakeries’ Palm Oil Policy.

The full text of the sustainable palm oil policy is available on our website [https://www.lotusbakeries.com/governance-practices-and-policies](https://www.lotusbakeries.com/governance-practices-and-policies).

---

1 Key palm oil suppliers are those who supply products containing more than 50% palm oil and in which the ingredient makes up 5% or more of the recipe, or have their own palm oil policy in force that includes at least equal standards.

**Cocoa**

**Rainforest Alliance**

100% of the cocoa butter and cocoa mass used in our Lotus® Biscoff™ chocolate has been certified by the Rainforest Alliance. The Enkhuizer and Peijnenburg products with chocolate were originally UTZ certified but are Rainforest Alliance certified since the transition from UTZ to Rainforest Alliance.

**Soy**

**IP certificate**

The soybean flour in the Lotus® Biscoff® products is IP certified (‘Identity Preserved’). This means that the soy flour we use in our products can be traced to the sustainable plantation from which this raw material originates. Moreover, it is sourced from a region not identified as being subject to deforestation.

**Eggs**

**Barn eggs**

Animal welfare is important to us and in our case focused on the origin of the eggs. We use barn eggs in small amounts in our bakery products. As of January 2012, 100% of our eggs come from cage-free hens. Cage-free refers to farm environments where chickens who produce eggs live in open indoor spaces. Overall, cage-free represents an increased quality of life for hens as compared with those held in cages.
PULP- AND PAPER-BASED PACKAGING
Lotus Bakeries footprint analysis shows we have 7% of GHG emissions associated with our packaging in 2023. Today, 77% of wood pulp and paper-based packaging of our brands are FSC, PEFC, or SFI-certified with the guarantee that the products come from sustainably managed forests. This preserves biological diversity and combats deforestation. Read more about our packaging policy on page 93.

LOCAL SOURCING TO DECARBONISE OUR TRANSPORT
9% of Lotus Bakeries carbon footprint comes from transport. We therefore purchase our raw materials and packaging materials locally as far as possible. This means we purchase the greater part of our raw materials on the same continent where we operate our production facilities and strive to keep the distance between grower and our production site as short as possible.

WATER MANAGEMENT
Climate change and droughts are becoming more frequent. Industrialisation often puts additional pressure on water availability. Although water use is not considered a material topic for Lotus Bakeries as the amount we use is limited, we consider it our duty to manage water efficiently. The actions we take to minimise our water footprint are the following:

Monitoring
As part of its internal operational reporting, Lotus Bakeries reports on its water consumption. It has been among the standard KPIs that all production facilities report regularly. Based on these reported figures, Lotus Bakeries monitors carefully evolutions in water usage across the various facilities.

The water withdrawal\(^1\) in Lotus Bakeries production sites is 117,203 m\(^3\) water.

Sustainable water collection
For future infrastructure initiatives we will always look into using the most efficient water management systems.

The ‘House of Biscoff’ in Belgium is equipped with technology for sustainable water management. This includes a rainwater collection system and a well water filtration system. This well water filtration system makes it easier for water to seep into the ground, ensuring more even and improved wetting. This contributes to a good groundwater balance.

Two initiatives in our new plant in Thailand are worthwhile mentioning. We foresee the construction of a storm water pond, acting as a buffer in case of heavy showers in rain season. In dry season this water will be used for watering the plants and trees in the green zone on the site. Additionally, we plan also the construction of an underground rain water reservoir. This rain water will be used for the sanitary facilities.

\(^1\) Water withdrawal describes the total amount of water withdrawn from a surface water or groundwater source.
EMPLOYEES: AMBITION 2023 & ACHIEVEMENTS

We believe in the power of our people to drive performance. We want to contribute to the employee well-being via offering an attractive and inspiring workplace that promotes health and safety, diversity, employee satisfaction, development, and equal opportunity for all. We aim to build one Lotus family based on our TOP-culture (Team, Open Dialogue and Passion).

To support the acceleration of our growth we focus on attracting, developing and retaining diverse talent.

- Promoting employee well-being
- Installing an anti-discrimination and anti-harassment policy
- Obtaining ISO 45001 certification for Lotus Bakeries South Africa Manufacturing

HIGHLIGHTS

1. Promoting employee well-being
2. Installing an anti-discrimination and anti-harassment policy
3. Obtaining ISO 45001 certification for Lotus Bakeries South Africa Manufacturing

Starting with our recruitment policy, Lotus Bakeries creates a foundation to attract a diverse and talented group of people. Attention to diversity, as well as equal opportunities, are key parts of this strategy, in which we aim to select candidates with the best range of skills and competences for the role. We also look at the knowledge and experience available in the existing teams and how this matches with the desired competences, knowledge and/or experience of the candidate.

In this way we continue to maintain a diverse group of employees, with balanced gender diversity across all employees. We see a nice balance of 49% men and 51% women within the Lotus Bakeries Group. When we take a closer look at the Leadership team, the split is 56% men, 44% women and the Board of Directors is 70% men, 30% women. Additionally, we see a high level of diversity in age categories in Lotus Bakeries, and associated experience. This is similar to previous year.

Lotus Bakeries is committed to equal pay for equal work, regardless of gender, race, ethnicity or other factors unrelated to performance. To fulfil this commitment, we benchmark and set pay ranges based on market data and consider various factors such as an employee’s role and experience, job location and performance.

Diversity policy and inclusion
Guided by our TOP-values, diversity is to be cherished.

We value diversity amongst our employees and those with whom they collaborate. We are steadfast in our commitment to providing a workplace that ensures equal opportunities and is free from discrimination and harassment. Our company does not tolerate any form of discrimination or harassment directed at employees or candidates based on race, colour, gender, sex, sexual orientation, age, religion, national origin, political opinion, disability or any other protected class. We firmly believe in treating all individuals fairly, as articulated in our Code of Conduct under Principle II: respect for people in line with ILO conventions.

To strengthen this guiding principle, a Group anti-harassment and anti-discrimination policy was developed and rolled-out to increase awareness and understanding of workplace harassment, violence and discrimination among our employees. The policy is particularly designed to provide managers with a framework to identify, prevent and manage allegations of harassment and discrimination at work. This Group policy acts as an overarching statement within which all local offices can continue and expand their existing initiatives.

The full Anti-harassment and anti-discrimination Policy is available on our website.

Lotus Bakeries - 107
WHY TO JOIN THE LOTUS BAKERIES FAMILY

UNITED BY PASSION
We might have hundreds of different jobs, but we are all passionately working towards the same goal: to create small moments of joy all over the world. We can only achieve this together, as every one of us makes an impact in his or her own way. Knowing that our work makes people smile is what makes us proud.

HAPPINESS MADE BY PEOPLE
We can only bring happiness to the world when we do it with a smile on our face as well. That is why, at Lotus Bakeries, it’s all about our people. We believe that their talent is the driving force behind our growth, which is why we tailor our employees’ work to their personal skills as much as possible. Through accessible leadership and well-defined ambitions, we help them to become their best self. Our team is a unique combination of talented and authentic people. Together, we spread our homemade happiness all over the world.

CO-WRITE A UNIQUE STORY
There is only one company like us. We are an international player with sky-high ambitions, yet still a family business: open-minded, inclusive and small enough for your personal impact to be seen and heard. We are professional and personal, solid and adventurous. This exciting duality is reflected in our brands as well. Lotus® Biscoff®, Lotus™ Natural Foods and our Lotus® Local Heroes offer both the healthy and indulgent, the global and local. Once you’ve had a taste of this one-of-a-kind combination, you’ll never get enough.

TO SUPPORT THE ACCELERATION OF OUR GROWTH WE ATTRACT TALENTED PEOPLE
Recruitment policy
Scarcity in the labour market poses a challenge that we actively address. To attract talented employees with the optimal fit, Lotus Bakeries has defined clear value propositions that allow us to seek the best match between the future employee and Lotus Bakeries in complete transparency.

One of the initiatives to facilitate recruitment is our international career site www.lotusbakeriesjobs.com. This website strengthens our employer identity as a global food company with dozens of products that brighten every day. It also provides a complete overview of all career opportunities within the Group worldwide. Through testimonials of employees and pictures of our offices and locations, potential candidates can moreover get a glimpse of our unique culture.

When selecting new employees, we communicate the full selection process clearly and transparently. The applicant’s professional competences, relevant experience and TOP values are paramount. During the selection process, applicants meet with several Lotus Bakeries employees to gain a good understanding of our company values and culture. Via the various touchpoints, candidates have several opportunities to ask questions or gather more information. For all office workers, the selection also includes objective testing, or an external assessment tailored to the position for which the candidate is applying. By including this objective element into our selection process, we reduce the chance of subjective assessment. Our recruitment is an intensive process where we consciously invest a lot of time to ensure the optimal fit between the future employee and Lotus Bakeries.
We also have a ‘Young Graduate Programme’. This is an intensive two-year programme designed specifically for graduated master’s or MBA students who enter in a function-specific domain. To guarantee a smooth onboarding and good career management inside Lotus Bakeries we have implemented a bespoke learning & development track for young graduates. Through various training sessions they acquire specific skills & competencies which will enable them to be successful in the role. Our young graduates get day-to-day coaching from their manager. Thanks to the mentorship programme, they also get input and reflection from a senior employee outside of their function area of expertise, providing them with a broader view of the company. This mentor moreover acts as a sounding board and can offer impartial advice and support related to career development and ambitions. To broaden their perspective and knowledge, the young graduates furthermore get assigned a cross-departmental project of strategic importance. Their mission is to tackle a specific business challenge and prepare a recommendation to EXCO.

As part of the onboarding track, each new office employee will also be asked to complete a survey after several months of service and will be offered a follow-up interview by HR. In this survey the employee is questioned about the recruitment and onboarding process, they are polled about how the first few months have gone in the position, about how the job and the organisation meet expectations and how the collaboration with the manager and with colleagues is going. In countries with a large workforce in the factories, such as Belgium, a bespoke survey is provided. The goal of the survey is to gain insights into how the employee has settled in and to identify areas for improvement.
Once part of the Lotus Bakeries family, it is important to retain these engaged and motivated TOP talents. We aim to empower our employees to reach their fullest potential and secure employment for our permanent workforce via several means.

**Fostering feedback and performance**

We invest in a culture of open feedback and two-way communication because we believe it increases engagement, motivation and performance. The performance process for all office workers is fully integrated into the Global HR platform MyLotus. The operational workers, use a non-digitalised system, where the feedback conversation happens with team leaders. In MyLotus feedback exchange between manager and employee is encouraged several times a year, instead of having one annual review. This process provides ongoing opportunities to give and receive feedback, and our employees are encouraged more frequently to reflect on their career path. By gaining more insight into the employees’ strong assets, areas for improvement and ambitions, the right development and, if needed, guidance can be offered.

All office employees are invited at least yearly to participate in performance and career reviews. All feedback is documented through our Global HR platform.

The platform foresees a written preparation from both the manager and employee, and encourages a digital feedback request from various relevant stakeholders, which allows for a broad and objective assessment of the past year.

**Employee learning and talent development**

In the performance review process, our employees are encouraged to work with their direct manager to develop an appropriate and individual development plan. Lotus Bakeries applies the 70-20-10 learning model. This may include on-the-job learning to get to know the organisation for newcomers as well as providing stretched assignments, special projects or cross-functional collaborations for employees who have been in their role for some time. Formal external training opportunities, accessible to all employees annually, address both hard skills for specific technical needs and soft skills aimed at enhancing interpersonal abilities.

112 - Lotus Bakeries

Our sustainability programme

Lotus Bakeries - 113
Our training courses cover different topics such as project management, negotiation skills, people management skills, priority management, presentation skills, as well as the effective usage of MS Office tools. Collaboration and team dynamics are fostered during insights Discovery workshops. Next to these programmes we offer internal trainings around legal topics, safety trainings, HR workshops, as well as dedicated technical trainings for our blue collar workers in our plant in Lembeke. In today’s society, it is important to continuously improve digital skills. Therefore, we offer training on the usage of SharePoint as well as on cybersecurity. Last year, close to 90% of PC users followed training to identify data hacks or phishing activities.

In 2023, the total investment in training activities was on average 15h per employee.

International connectivity and mobility

We believe that an open feedback culture and investing in our employees’ development are effective enablers of internal mobility. In this way, we strive to keep talent in-house. In 2023 our internal mobility rate for white collar and staff is 17%. When we recruit new talents, we typically assess their cultural fit and match with the required skills & competencies. Equally important, we also screen for potential as we believe that we don’t recruit employees for a position, but we select them for a long-term career in the company. As Lotus Bakeries continues to grow internationally, our employees for a position, but we select them for a long-term career in the company.

 Collective organisation and social dialogue

As a Group, we believe in an organisation that collaborates with all employees, the representation of employees, employee organisations and external social stakeholders. Currently, employees are covered by collective bargaining agreements on company, sector and national level in Belgium, South-Africa, the Netherlands, France, Sweden, Spain, Italy and Austria. This amounts to approximately 74% of our employee population worldwide being covered by collective bargaining agreement. We remain committed to respecting our employees’ right to freedom of association, to join trade unions and to collective bargaining. Our primary measure in this respect is to hold regular meetings with the work councils and maintain the social dialogue. In our European countries where we have significant employment, 100% of employees are covered by workers’ representatives. We are convinced that good collaboration contributes to our success.

In 2023, our employee turnover amounts to 16%. About 13% can be attributed to voluntary turnover, of which 5% of this voluntary turnover can be attributed to natural causes such as the end of fixed-term employment contracts, health reasons or retirement. This results into a voluntary turnover rate of approximately 10%.

We also provide our employees with the opportunity to relocate to another country in the Group. Similar to any other instance of internal mobility, we will always strive to find the optimal match between the individual’s aspirations and the company’s ambitions.

For us as a family business, growth, profitability, and ambitions are important. Yet, we pursue these objectives hand-in-hand with fostering a healthy community of people. Our commitment to well-being, as outlined in the well-being charter, as we’ve shared together with EXCO, is a true statement. We genuinely care about how you feel within our company. The charter highlights three key principles: Connect (at work)- Disconnect (outside of work)- Communicate openly about mental well-being.

We are steadfast in our commitment to ensuring that all our employees and contractors have a pleasant working environment and can return home mentally healthy at the end of the day.

The Executive Committee of Lotus Bakeries has signed a well-being charter in 2023, firmly emphasizing the importance hereof. This well-being charter is actively implemented across all of our offices and plants. Our CEO, Jan Boone, opened 2024 and addressed the Lotus Bakeries community as follows:

“Our commitment to well-being, as outlined in the well-being charter that we’ve shared together with EXCO, is a true statement. We genuinely care about how you feel within our company. The charter highlights three key principles: Connect (at work)- Disconnect (outside of work)- Communicate openly about mental well-being.

We firmly believe in the power of bringing people together. Building a culture is only possible when people unite. Creativity, in my opinion, blossoms in a collaborative environment. Enjoying your work and having open conversations with colleagues, not only about your job but also about personal matters, are essential aspects. Fostering a social environment within our company is paramount. This is also the reason why we’ve invested in creating appealing and pleasant working environments. This commitment extends to our locations worldwide: we want you to feel at home wherever you are. And when you leave here, it’s time for your private life, time to relax and focus on personal well-being that matters.

We are a family business with over 90 years of history, and a long-term vision. We aim to share the pride of our achievements, together, with all our employees.”

Well-being & Disconnection Charter highlights importance of wellness and unplugging

Our company’s strength lies in healthy, happy employees. Their physical and mental well-being is paramount, which is why the Executive Committee signed the Well-being & Disconnection Charter in autumn 2023 – a clear statement that our local branches translated into concrete initiatives.

In today’s workplace, there are a myriad of challenges. From the ever-accelerating pace of change, to being connected everywhere all the time, and non-stop virtual meetings, to the blurring of the line between work and private life since we all work flexible hours. In this fast-paced, perpetually connected world, we at Lotus Bakeries wanted to clearly underline the importance of well-being and disconnecting. That’s why we launched the Well-being & Disconnection Charter in October, which is based on three pillars:

CONNECTING AT WORK
First of all, we are emphasising that Lotus Bakeries values connection at work. We strongly believe in the power of face-to-face meetings, and in the unique energy that is created when people come together. By physically seeing each other in the office, we feel a greater and deeper connection to our company’s values and to each other. It’s the only way that we can be fully creative, and it will ultimately lead to better results. In addition, working in the office makes it easier to draw the line between work and private life.

DISCONNECTING AFTER WORK
Furthermore, we believe it is at least as important to disconnect outside the office walls and office hours. Whether it is by going for a walk in nature, a hobby, by spending time with loved ones or just taking a moment to yourself, this too ensures that our employees can bring the best version of themselves to work, think creatively and use their fullest potential. By regularly stepping out of action mode, we can return with a fresh mind, renewed energy and passion for what we do.

TALKING OPENLY ABOUT MENTAL WELL-BEING
Finally, the charter stresses the importance of mental well-being. We need to be able to openly discuss how our employees feel mentally, and we need to do this safely and with zero judgement. That is why we encourage an open dialogue about mental well-being in our teams. Being able to talk about it openly helps us create a healthier, more inclusive, and productive working environment for everyone. And, where necessary, to be able to take additional initiatives to support mental well-being in our company. Moreover, it will allow employees to be a source of inspiration to each other, exchanging ideas and tips to find a healthy balance that will benefit their mental well-being.
A vision of well-being is part of our strategic plan. And we are taking responsibility to achieve it. It shows just how important sustainability is to us, in the broadest possible sense. Our employees are at the heart of that sustainability. They play a key role in our organisation. With the charter, we are projecting this to present and future talents.

We are glad that the Group has a vision which allows people to work from home. The youngest generations in particular consider this an important condition. At the same time, we also underline the importance of spending time together with colleagues in the Netherlands, because that’s when you inspire, motivate and bring out the best in each other. Agreements have been made on this, including by making it a priority for certain meetings to always take place face-to-face.

Work-life balance is also high on the agenda. We encourage our colleagues to use their holiday hours. We work hard when we need to, but we also need to make time to relax. In the Netherlands, we also offer several types of family-friendly programmes to support employees, such as parental and partner leave, for both mothers and fathers. This is being used a lot and so we need to accommodate this, but it is wonderful that this is possible because it also creates a better gender balance.

At the end of September 2023, we also organised Sports Week in France, which kicked off with a healthy breakfast at all sites, and every day a new sport on the agenda to discover. The entire week was all about health, sport and well-being. We will continue this in 2024. From now on, we will offer two opportunities for exercise during lunch each week. On Tuesdays there is badminton, on Fridays yoga. Also, for employees who do shift work, there will be workshops on nutrition and good sleep habits for shift work.

In the UK, 2023 saw a lot of well-being initiatives as part of Mental Health Awareness Week, which put anxiety front and centre as a topic. We organised a lunch where colleagues were informed about what exactly anxiety is, how you notice it in yourself or a colleague, and some common coping mechanisms that people use to deal with it. We used the lunch as a stepping stone for our managers to discuss the topic with their employees afterwards.

Communicating about mental well-being proves to be very effective. In this respect, Lotus Bakeries scores well in the UK: an engagement survey shows that 8.5 in 10 employees feel they can talk openly with their manager. In 2024, we will continue to move forward in the same vein, including by organising focus groups to discuss certain topics in even greater depth. We want to give people a sounding board about mental health. To this end, we will invest in training so that there are several people across the organisation skilled in this area.

Work-life balance

To promote well-being, Lotus Bakeries also offers other means to employees to balance their time at work and their time at home within the limits of business organisation and local legislations. For one, Lotus Bakeries has a flexible working policy where employees can work from home depending on their role in the organisation. We offer all our employees across the world the right to take family-related leave such as parental leave and carers’ leave. In 2023, 15% of employees took family-related leave, 10% being female employees and 5% being male employees.

Cultivating a positive workplace

Lotus Bakeries has invested in creating a beautiful and attractive work environment. Social spaces are designed for employees to have lunch and catch up together. The offices feature spacious and bright open spaces, along with large and small meeting rooms for our employees to use, and a cosy lunch area to connect. We also provide ergonomic facilities, such as standing desks to encourage working standing up and provide screening and advice to improve the ergonomic sitting posture at the desk. A lot of attention has been paid to fitness and sports at all Lotus Bakeries locations, with varied initiatives depending on the site. For example, the ‘House of Biscoff’ in Belgium and the offices in the United States and Sweden have a gym with showers. Other locations offer sport activities through options of signing up to a bicycle lease programme, participating in weekly boot camps or joining cycling or walking sessions. This approach creates a more pleasing working environment that promotes employee satisfaction and well-being.

Our sustainability programme

Lotus Bakeries

The Netherlands: Work-life balance first

France: Health, sport and well-being on the agenda

United Kingdom: Talking about mental health

HR Director the Netherlands, Claire de la Court

A vision of well-being is part of our strategic plan. And we are taking responsibility to achieve it. It shows just how important sustainability is to us, in the broadest possible sense. Our employees are at the heart of that sustainability. They play a key role in our organisation. With the charter, we are projecting this to present and future talents.

We are glad that the Group has a vision which allows people to work from home. The youngest generations in particular consider this an important condition. At the same time, we also underline the importance of spending time together with colleagues in the Netherlands, because that’s when you inspire, motivate and bring out the best in each other. Agreements have been made on this, including by making it a priority for certain meetings to always take place face-to-face.

Work-life balance is also high on the agenda. We encourage our colleagues to use their holiday hours. We work hard when we need to, but we also need to make time to relax. In the Netherlands, we also offer several types of family-friendly programmes to support employees, such as parental and partner leave, for both mothers and fathers. This is being used a lot and so we need to accommodate this, but it is wonderful that this is possible because it also creates a better gender balance.

FRANCE: HEALTH, SPORT AND WELL-BEING ON THE AGENDA

HR Business Partner LBF, Madeleine Du Château

At the end of September 2023, we also organised Sports Week in France, which kicked off with a healthy breakfast at all sites, and every day a new sport on the agenda to discover. The entire week was all about health, sport and well-being. We will continue this in 2024. From now on, we will offer two opportunities for exercise during lunch each week. On Tuesdays there is badminton, on Fridays yoga. Also, for employees who do shift work, there will be workshops on nutrition and good sleep habits for shift work.

HR Manager UK, Helen Gibbons

In the UK, 2023 saw a lot of well-being initiatives as part of Mental Health Awareness Week, which put anxiety front and centre as a topic. We organised a lunch where colleagues were informed about what exactly anxiety is, how you notice it in yourself or a colleague, and some common coping mechanisms that people use to deal with it. We used the lunch as a stepping stone for our managers to discuss the topic with their employees afterwards.

Communicating about mental well-being proves to be very effective. In this respect, Lotus Bakeries scores well in the UK: an engagement survey shows that 8.5 in 10 employees feel they can talk openly with their manager. In 2024, we will continue to move forward in the same vein, including by organising focus groups to discuss certain topics in even greater depth. We want to give people a sounding board about mental health. To this end, we will invest in training so that there are several people across the organisation skilled in this area.

Cultivating a positive workplace

Lotus Bakeries has invested in creating a beautiful and attractive work environment. Social spaces are designed for employees to have lunch and catch up together. The offices feature spacious and bright open spaces, along with large and small meeting rooms for our employees to use, and a cosy lunch area to connect. We also provide ergonomic facilities, such as standing desks to encourage working standing up and provide screening and advice to improve the ergonomic sitting posture at the desk. A lot of attention has been paid to fitness and sports at all Lotus Bakeries locations, with varied initiatives depending on the site. For example, the ‘House of Biscoff’ in Belgium and the offices in the United States and Sweden have a gym with showers. Other locations offer sport activities through options of signing up to a bicycle lease programme, participating in weekly boot camps or joining cycling or walking sessions. This approach creates a more pleasing working environment that promotes employee satisfaction and well-being.
Occupational health and safety is vital to our business. Within our working environment, we undertake measures to minimise the risk of workplace accidents, to ensure a safe and secure workplace.

Promoting a safe working environment

For our Lotus Manufacturing South Africa (LMSA) site we have become fully accredited with ISO 45001. This is the world’s international standard for occupational health and safety, issued to protect employees and visitors from work-related accidents and diseases. ISO 45001 certification was developed to mitigate any factors that can cause employees and businesses irreparable harm. As we employ close to 650 people in LMSA this gives us a tremendous peace of mind that we are doing the right thing for our employees.

The Netherlands, the Geldrop and Enkhuizen production sites have the occupational health and safety vignette from VBZ (Vereniging voor Bakkerij en Zoetwaren industrie). A recurring audit is performed by two external members of the VBZ, which includes interviews with our employees, and the results are subsequently reported.

As part of our continuous improvement on safety, we performed in all the plants in Belgium a thorough safety audit with an external organization, supported by observations on the work floor and interviews of factory workers. An internal safety activation plan centered around Safety Awareness & Management (SAM) has been developed. The new internal safety communication campaign will go live in 2024.

Our Safety Policy

Our commitment to occupational health and safety is driven by our policy and systems. Our first focus is to prevent accidents by minimizing safety risks in the following four areas.

1. Occupational health
2. Personal safety
3. Process safety
4. Rolling material safety

We take the following steps to develop effective risk prevention strategies in our own sites.

Risk assessment

In all our sites new machinery and equipment are designed to the latest safety standards and undergo an extensive safety inspection through the Site Acceptance Test by our own safety officers. We follow a clear procedure for hazard identification. Machinery is adjusted as needed to meet our high safety standards.

To identify risks related to behaviour we use safety inspections and feedback tools to detect and report unsafe situations. For example in South Africa, a health and safety questionnaire is completed each quarter, after which the existing risk assessments are evaluated and the existing procedures are tightened up.

Developing guidelines and procedures

Strict occupational safety laws apply in all the countries in which Lotus Bakeries operates. Clear safety procedures and operating guidelines are created based on the risk assessment at each production site or office. These procedures are translated into work instructions for each workstation. We provide adapted work clothing to our employees and contractors to contribute to a safe work situation.

Raising awareness and safety training

There is a safety training programme where we regularly focus on awareness and prevention:

• Safety in the workplace is a fixed part of the onboarding programmes of new employees who start work in the factory.
• Regular training sessions are given to teach people how to bring up the importance of safety to other colleagues or address and prevent dangerous situations.
• Each site has a clear procedure in case an emergency occurs. Yearly training of the emergency procedure takes place.

HEALTH AND SAFETY

</tbody>
</table>

The scope of the KPI’s includes our internal employees.
Monitoring via reporting
Management monitors health and safety performance. All the sites measure and report monthly on the number of accidents at work with absence. Accidents are screened to improve our risk control strategies.

Safety beyond our own operations
For the construction of our new plant in Thailand, we paid great attention to the contractor’s policy on health and safety precautions. The contractor has to ensure that medical staff, sick bay and ambulance service are available at all times at the site of the works, and that suitable arrangements are made for all necessary welfare and hygiene requirements. We also ask our contractor to appoint an accident prevention officer at the site of the works, responsible for maintaining safety and protection against accidents. There are daily safety exercises and weekly safety walks.

No fatalities occurred in 2023. The number of accidents at work decreased in 2023 down to 75 incidents. The continued promotion of safe behaviour, the in-depth analysis of each incident and using the learnings of these to raise awareness to employees helps to promote a safety culture and realise a decrease versus last year. There was one exceptional case: in the plant in South Africa, Lotus Bakeries provides commuting services with mini-vans to the employees. One mini-van had an accident leading to 9 injured employees that were absent from work. If we isolate this exceptional case, we would have decreased the number of incidents even further down to 66 compared to previous year. In 2023, there are five production or distribution sites that had no work accidents.
COMMUNITY: 2023 AMBITIONS & ACHIEVEMENTS

We care for today’s and tomorrow’s generations and all stakeholders involved in our value chain. Responsible business conduct addressing today’s and future complex challenges allows us to stick to our mission: providing superior tasting snacks to everyone, every day, everywhere. We want to contribute to consumer well-being by providing the right and balanced portfolio at the highest quality. Plus, we contribute to the prospects of future generations by supporting education projects.

The ambitions of Lotus Bakeries within the community pillar are therefore focused on four domains:

- **Installing a Human Rights Policy**
- **Setting up a Whistleblowing Line & Policy**

---

1. The scope of the KPI includes our internal employees and the members of the leadership team working through a management company. Internal employees are employees who are connected to Lotus Bakeries with an employment contract, either of unlimited duration or of limited duration.
2. Key suppliers are all of our suppliers of end products (external production), raw materials, packaging and machinery, with whom Lotus Bakeries has entered into a written contract.
3. Key palm oil suppliers who have signed up to the Lotus Bakeries palm oil policy or have their own palm oil policy in force that includes at least equal standards and who supply ingredients or raw materials containing at least 50% palm oil, and in so far these products represent more than 5% in any recipe.
Lotus Bakeries actively assumes its social responsibility. We guarantee ethical business practices throughout the organization.

Upholding business integrity and human rights is fundamental to building trust with our partners, communities and stakeholders, as pointed out in our Human Rights Policy. Our guiding principle is to abide by all international human rights standards, including, but not limited to, the UN Universal Declaration of Human Rights and the UN Guiding Principles on Business & Human Rights. Where local law and international standards are higher, Lotus Bakeries will follow the higher standard.

Every individual deserves respect, dignity, and equal treatment. To emphasise this belief, we have extensively communicated the principles set out in our Code of Conduct as well as the Human Rights Policy, to all employees via our intranet system. We encourage our employees to respect the dignity and human rights of colleagues and all other people they come into contact with in the course of their work.

ETHICAL BUSINESS PRACTICES AND RESPECT FOR HUMAN RIGHTS

ETHICAL BUSINESS PRACTICES IN OUR OWN ORGANISATION

The Code of Conduct was approved by the Board of Directors on 2 April 2020 and was implemented in 2020. As of 2021, every new employee who is recruited must sign this. This Code forms an integral part of the employment contract. In September 2023, the Code of Conduct was updated to reflect Lotus Bakeries’ new whistleblowing line, encouraging our employees to speak up in case they encounter any conduct that concerns them, or that seems to violate Lotus Bakeries’ Code of Conduct, our policies or applicable laws and regulations.

Our Code of Conduct

Lotus Bakeries expects all its employees to act with integrity, honesty and fairness and in full compliance with the applicable laws, rules and regulations. It has developed a Code of Conduct containing six main principles that its employees must respect at all times. These principles are further elaborated on in separate more detailed policies and procedures:

1. Transparency:

Lotus Bakeries aims for clear and accurate communication with its customers, suppliers, consumers and business partners and encourages open communication with all its stakeholders. Lotus Bakeries also refrains from non-conforming, dishonest, fraudulent or misleading marketing practices.

New in 2023

• Biscoff® Trademark Guidelines were created and published to help professionals incorporating Biscoff® spread and cookies into their recipes. The guidelines aim to provide a clear understanding of how to leverage the Biscoff® brand while ensuring the integrity of our brands and trademarks. The use of Biscoff® products in the preparation of recipes does not automatically entitle someone to use the Biscoff® trademark such as logos, design, look & feel and trade dress in your communication. However, Lotus Bakeries has authorised certain ways of use in its Trademark Guidelines to inform professionals transparently how to include the Biscoff® brand name to benefit from its power and recognition. These Guidelines apply worldwide.

The full Biscoff® Trademark Guidelines are available on the Biscoff website:

https://www.lotusbiscoff.com/en-gb/foodprofessionals/trademark

2. Respect for fellow human beings:

Lotus Bakeries is responsible for a safe working environment and places great importance on integrity and respect for fellow human beings. Respecting human rights and labour regulations, including the freedom of association of employees and combating child labour, are important objectives. All personal data is treated with respect at all times and in accordance with the relevant rules and regulations.

The full Code of Conduct is available in 11 different languages on our website:

https://www.lotusbakeries.com/governance-practices-and-policies

1. Transparency:

Lotus Bakeries aims for clear and accurate communication with its customers, suppliers, consumers and business partners and encourages open communication with all its stakeholders. Lotus Bakeries also refrains from non-conforming, dishonest, fraudulent or misleading marketing practices.

Our sustainability programme

Lotus Bakeries - 127
Lotus Bakeries developed and rolled-out a human rights policy in 2023, which applies to all our operations and to all full-time, part-time, and temporary colleagues who are directly employed by Lotus Bakeries, including our directors and officers. The policy also extends to any subsidiaries or joint ventures where Lotus has a majority interest or management control. It is important to note that our responsible sourcing policies and procedures specifically outline our expectations for our suppliers, vendors, agents, and contractors. In terms of human rights, Lotus Bakeries imposes its Supplier Code of Conduct on its suppliers of packaging, raw materials, equipment and finished products. We believe that it is not only our responsibility to ensure that our own operations uphold human rights, but also that of those on our supply chain.

The Full Human Rights Policy as well as our Modern Slavery Statement are available on our website: https://www.lotusbakeries.com/governance-practices-and-policies

A Group anti-harassment and anti-discrimination policy was developed and rolled-out. Reference is made to page 106 of this annual report.

2023 saw the implementation of several new regulations on data protection and cybersecurity in China, with a particular focus on cross-border data transfer and personal information protection. On the other side of the world, in California, US, the California Consumer Privacy Act entered into force on 1 January 2023. Since Lotus Bakeries has sales offices in both locations, we updated our global Data Protection Act entered into force on 1 January 2023. Since Lotus Bakeries has suppliers of packaging, raw materials, equipment and finished products. We believe that it is not only our responsibility to ensure that our own operations uphold human rights, but also that of those on our supply chain.

In 2023, all new employees in the marketing, sales and purchasing departments were invited to an initial two-and-a-half-hour interactive workshop at which eight issues were explained using real case studies, with a success rate of 75% to complete the training programme. All employees – existing and new – of the specified departments were moreover invited to two competition quizzes. The participation and success rates were as follows:

- June 2023 excluding US: 89% participation, 85.6% passed successfully
- June 2023 US: specific quiz: 100% participation, 76.4% passed successfully
- October 2023 including US: 97% participation, 62.9% passed successfully

Lotus Bakeries will continue its efforts to increase awareness of tightened export regulations. This approach ensures ongoing compliance with all applicable export laws and regulations in an ever-changing and evolving global landscape.

Lotus Bakeries has taken further steps as part of its continuous improvement process for corporate books across all of its entities, further streamlining the timing, stakeholder management and automation of the annual reports and annual shareholder meeting in all of its entities. Where applicable, it has moreover made requisite board amendments and updates of the articles of association or bylaws of entities in view of the evolution of the Group in recent years.

Lotus Bakeries closely monitors the impact of its activities on the environment and constantly strives to reduce its ecological footprint. For specific details regarding our concrete 2023 operations, including our ambitions and achievements for the environment, please refer to page 88 and to the implementation of the Supplier Code of Conduct on page 151 of this annual report.

Lotus Bakeries closely monitors the impact of its activities on the environment and constantly strives to reduce its ecological footprint. For specific details regarding our concrete 2023 operations, including our ambitions and achievements for the environment, please refer to page 88 and to the implementation of the Supplier Code of Conduct on page 151 of this annual report.
RESPONSIBILITIES
Each employee of Lotus Bakeries has a responsibility to comply with the principles of the Code of Conduct.

The responsibility for implementing the Code of Conduct lies with the Compliance Officer, supported by the local HR departments.

WHISTLEBLOWING
All employees of Lotus Bakeries are encouraged to speak up if they encounter any conduct that concerns them, or that seems to violate Lotus Bakeries Code of Conduct, our policies or applicable laws and regulations.

Lotus Bakeries Whistleblowing Line allows for anonymous reporting, confidentiality assurance, and accurate follow-up of the legal obligations. Lotus Bakeries greatly value the help of employees and others who identify and speak up about potential concerns that need to be addressed. People who speak up are protected and will not suffer for raising concerns in good faith about suspected misconduct. Lotus Bakeries will not tolerate any form of retaliation against you for speaking up.

Lotus Bakeries has developed a Whistleblowing Policy which explains how one can raise concerns about suspected misconduct in confidence and without fear of retaliation. It also describes what to expect from us concerning follow-up and relevant action.

The Whistleblowing Line and Policy can be found on our website: https://www.lotusbakeries.com/governance-practices-and-policies

All employees have been informed about the Whistleblowing Line and Policy via intranet communication and information sheets featured in all of our production plants. The Whistleblowing Policy has moreover been integrated in the onboarding packs and local HR decks.

In 2023, no complaints were received via the Whistleblowing Line. The Group Compliance Department was informed of one complaint from employees regarding an alleged case of discrimination in the course of 2023. This case was investigated locally. No infringements were established.

REPORTING
Where necessary, the Compliance Officer reports to the Board of Directors once a year on the enforcement of the Code of Conduct, covering any breaches and concerns raised, along with action points formulated to prevent repetition.

In 2023, the Board of Directors was not informed as no material complaints were received and no infringements were established.

IMPLEMENTATION
The Code of Conduct has been translated into the official languages of those countries in which Lotus Bakeries has a sales office or a factory. The document is available in eleven languages.

The Code of Conduct has been added to the onboarding pack for new employees at all our sites and a presentation is foreseen for the onboarding programmes.

The employees of Lotus Bakeries were asked to sign the Code of Conduct and have all received a brief explanation of the six principles it contains. At the end of 2023, 99.9% of employees had signed the Code of Conduct.

SUPPLIER CODE OF CONDUCT
The principles set out in the Lotus Bakeries' Code of Conduct are also imposed on our suppliers of packaging, raw materials, equipment and finished products. In 2023, 94.2% of our key suppliers of finished products (external production), raw materials, packaging and equipment with which Lotus Bakeries has concluded a written contract had signed the Supplier Code of Conduct.

The principles to which these suppliers must commit can be summarised as follows:

1. Lawful and ethical business practices:
   - Respect for human rights
   - Child labour will not be accepted under any circumstances
   - Treating people with dignity, honesty, fairness and respect
   - Refraining from any form of discrimination, harassment, verbal or physical abuse
   - Implementation of thorough health and safety procedures
   - Compliance with the occupational laws and regulations in the workplace

2. Fair business practices:
   - Compliance with the relevant competition laws
   - Use of fair and transparent price mechanisms and other contractual provisions in respect of suppliers
   - Zero tolerance of bribery and corruption
   - Protection of Lotus Bakeries' confidential information
   - No falsification, smuggling or other related crimes

3. Respect for the environment
   - Obtaining and documenting all necessary environmental permits, licences and registrations
   - Processes aimed at waste reduction, lower energy consumption, lower emissions and the prevention of pollution
   - Preservation of biodiversity, including threatened flora and fauna (no deforestation) and focusing on soil protection
   - Respect for water sources and ensuring good water and (waste) water management
   - No use of illegal products and limitation of the use of pesticides and other legal chemicals

4. Traceability
   - The supplier must keep adequate records of its direct suppliers

We expect these suppliers to implement the Supplier Code of Conduct and to inform their employees, agents and subcontractors in a careful and transparent manner.

RESPONSIBILITIES
The purchasing department is responsible for implementing the Supplier Code of Conduct, supported where necessary by Legal & Compliance.

WHISTLEBLOWING
Suppliers are asked to bring any concerns to the attention of their contact at Lotus Bakeries. Since 2023, they also have the option to report any complaints via the online whistleblowing platform selected by Lotus Bakeries. This platform allows for anonymous reports, ensures confidentiality, and guarantees accurate follow-up of legal obligations.
The Supplier Code of Conduct includes an obligation for the supplier to provide documentation that Lotus Bakeries can use as a basis for verifying compliance with the Supplier Code of Conduct.

While audits at suppliers have traditionally focused on quality and food safety, Lotus Bakeries is exploring ways to monitor the proper enforcement of other principles in the Code of Conduct. Efforts are being made to integrate these considerations into existing audits.

Lotus Bakeries expects suppliers to take corrective actions necessary to address any identified gaps.

The Supplier Code of Conduct was implemented in 2020, and is supplied in the language of the contract and is available in eleven languages. In 2020, the suppliers of packaging, raw materials, equipment and finished products with which Lotus Bakeries had a framework contract, were asked to sign the Code of Conduct separately at the time. Since then, this code has been an integral part of the standard contracts with our key suppliers.

In 2023, 94.2% of key suppliers had signed the Code of Conduct. Supplier Code of Conduct, which is available on our website.

Moreover, all our general purchase conditions contain a reference to the Supplier Code of Conduct, which has been an integral part of the standard contracts with our key suppliers.

The Supplier Code of Conduct includes an obligation for the supplier to sign the Code of Conduct separately at the time. Since then, this code has been an integral part of the standard contracts with our key suppliers.

In 2023, 94.2% of key suppliers had signed the Code of Conduct.

In 2023, 94.2% of key suppliers had signed the Code of Conduct.

The full text of the quality policy is available on our website: https://www.lotusbakeries.com/policies-reports

Responsibility
The Corporate Quality Assurance department is responsible for auditing the quality of our products under the direction of the Corporate QA Director, who has final responsibility for ensuring that the terms and conditions of Lotus Bakeries’ quality management system are met at all our production sites and in all Lotus Bakeries’ offices. The Area QA Managers have the same responsibilities in their region.

Scope of product safety and quality
Lotus Bakeries’ quality management system covers the entire value chain, from the purchase of raw materials and packaging, to production, labelling and delivery of the finished products to the customer. External production is also covered by the quality management system.

Quality control of suppliers
Supplier selection
Our suppliers are selected according to predetermined criteria, including the availability of an effective quality and food safety management system, assured by an independent food safety certification body. An effective tracing system forms part of this, so that Lotus Bakeries knows where the raw materials come from at all times.

Specifications
In addition, Lotus Bakeries has drawn up specifications with product safety requirements to be met for raw materials and packaging materials that are critical for product safety, such as flour, eggs, fats, margarines, chocolate and printed packaging with direct product contact.

Inbound checks
The products supplied by our suppliers are also subject to an inbound check. We assess the analysis report supplied by the supplier and check it with regular counter analyses by our own specialist internal laboratories. This inbound check is structurally registered in SAP to keep overview and be able to track.

Supplier audits
The checks on the suppliers are also supplemented by supplier visits and audits, which are conducted annually on the basis of performance measurements, and this also applies to raw suppliers. In 2023, three audits were carried out at suppliers of raw materials and packaging materials. In addition, another four visits took place at our raw-material and packaging suppliers.

In 2023, three audits were carried out at suppliers of raw materials and packaging materials. In addition, another four visits took place at our raw-material and packaging suppliers.

Only on the basis of these detailed performance measurements can we ensure that we continue to work with the best suppliers at all times.

Quality assurance of our production processes and finished products

Hazard Analysis and Critical Control Points (HACCP)
Production processes have been developed for all production sites that are designed to assure the quality and the safety of the products. Detailed HACCP plans (product safety risk studies) for example have been produced. They are updated at least annually or with every major adjustment of the process or machinery.

Internal audits
Verification takes place on the basis of internal audits. In 2023 there were 65 internal audits with site presence. Every production site has been audited at least five times.

External audits
External certification is a major support in the continuous improvement of both processes and products. Every Lotus Bakeries production site is BRC or IFS certified at end 2023.

Quality control
Final products are first examined critically at our production sites in the form of self-assessment by the production department. The quality of our finished products is also assured by analyses in our internal laboratories. The results of these laboratory analyses are reported to management monthly. Products of production partners are assessed in the same way.

Quality processes for our production partners (co-manufacturing)
Our external production partners are monitored in an identical way by our Corporate Quality Assurance department. There were three physical audits last year, 10 in-person factory visits and 10 in-person quality meetings topped up with 50 digital quality meetings over the past year. The requirements we set for our external production partners are laid down contractually in a clear schedule of requirements.
Quality processes for our customers

First and foremost, our finished products, both the product itself and the packaging, must comply with the relevant food legislation. The labelling of products and the processing of raw materials and packaging materials by the country of commercialisation according to the regulations are monitored by the Corporate Quality Assurance.

We also wish to inform the consumer transparently about verified claims made with regard to the product. In 2021, we worked on a revamped database to manage all this information efficiently and to convert it into product specifications and customer information. This database was put into use in 2022 and the further roll-out for other sites and production partners continued in 2023.

We receive, register and handle product complaints systematically and, since 2020, they have been registered in a central database for all the sales offices in the group. The number of complaints and their seriousness are monitored very closely and a monthly report is submitted to management.

Annual testing and continuous monitoring of our quality management system

Lotus Bakeries has specific product withdrawal and recall procedures. There is a trained crisis management team in each of our sites and sales offices. Each year, the procedures are tested in collaboration with external parties.

Learning points are identified and adjusted from the results of this test, and monitoring and action plans are drawn up.

In 2023, Lotus Bakeries organised one recall in the Netherlands followed by a thorough risk analysis. The necessary steps were taken in a timely manner and preventive measures were taken immediately to prevent recurrence in the future.

The various components of our quality management system are adequately safeguarded thanks to these various steps, where the raw materials come from at all times.
The R&D department is responsible for developing new products, optimizing existing ones, as well as creating packaging solutions, all in alignment with Lotus Bakeries’ strategy and policies. As such, we carefully select our raw materials from approved suppliers that comply with our responsible sourcing policies, as well as make sure that packaging materials comply with our ambition to be 100% recyclable by end 2025.

Product development follows a stage-gate process, where ideas, prototypes and products are evaluated against several criteria, including our sustainability and nutritional policies. This results in a high-quality branded snack, which will bring a superior tasting experience to our consumers all over the world, all year around.

Our expertise in the field of innovation is complemented with interactions with well-known knowledge institutes and universities, which give us a better view of product-packaging-process interactions and give us new insights into new technologies.

NUTRITIONAL POLICY

Superior taste experience
Lotus Bakeries wants to be able to offer its consumers delicious, high-quality snacks at any time of the day. A superior taste experience is key to this, both in the range of cookies and pastries and in the range of natural snacks. We only use high-quality ingredients and we monitor production and supply chain processes from beginning to end. Ensuring the quality, origin, composition and safety of our products is vital. Our R&D department plays an important part in this: it has the task of developing products with attention to constantly improving quality and taste.

Diverse range
Lotus Bakeries aims to offer every consumer a quality range of snacks at every moment of consumption. It does this through a portfolio of products with a variety of nutritional compositions.

With the acquisition of brands such as nākd®, TREK®, BEAR® and Urban Fruit®, the focus has expanded to fruit and nut-based snacks. Moreover, the takeover of Kiddylicious® has meant an expansion of our range with snacks and meals for little ones. These Natural Foods brands provide the consumer with the option to choose a healthy or healthier alternative to existing snacks in the food category.

No artificial flavours or colours
To exclusively offer our consumers healthy and high-quality products, we aim not to use any artificial flavours or colours in our products. We have considered it important as a business to use pure and natural ingredients since our foundation in 1932.

Variety in portion sizes
It is our ambition to offer consumers responsible snacks. Not just with our range of natural snacks, but also by making several of our top products available in large and small packs, that contain less than 150 Kcal a portion.

Clear information & responsible marketing
In order to support consumers in their nutritional choices, we believe it is important to give them accurate product information, including the nutritional values. Lotus Bakeries also takes an unequivocal position with regard to responsible advertising towards children. For example, Lotus Bakeries Belgium signed the Belgian Pledge 3.0.

We believe it is important to provide consumers with information that encourages them to consume responsibly. Our commitment is based on:
1. Encouraging responsible consumption
2. Taking responsibility in communication

Responsible consumption
Responsible consumption is an important topic in our advertising. To help consumers make the right dietary choices we do not encourage or show excessive consumption in our advertising.

We do not exceed recommended portion sizes and do not portray unhealthy or inappropriate consumption of our products. On certain product lines we offer a variety of portion sizes that can fit the lifestyle of different types of households.

Responsible communication
At Lotus Bakeries we will not communicate to children below 13 years of age. Instead, we see the parents as the gatekeepers of their children’s healthy diet. This applies to media channels such as TV, radio, print, cinema, direct marketing, product placement, apps, outdoor marketing, mobile and in online including social media channels, influencer marketing, and company websites.

The full text of the ‘nutritional policy’ is available on our website: https://www.lotusbakeries.com/policies-reports

We believe it is important to provide consumers with information that encourages them to consume responsibly. Our commitment is based on:
1. Encouraging responsible consumption
2. Taking responsibility in communication

Responsible consumption
Responsible consumption is an important topic in our advertising. To help consumers make the right dietary choices we do not encourage or show excessive consumption in our advertising.

We do not exceed recommended portion sizes and do not portray unhealthy or inappropriate consumption of our products. On certain product lines we offer a variety of portion sizes that can fit the lifestyle of different types of households.

Responsible communication
At Lotus Bakeries we will not communicate to children below 13 years of age. Instead, we see the parents as the gatekeepers of their children’s healthy diet. This applies to media channels such as TV, radio, print, cinema, direct marketing, product placement, apps, outdoor marketing, mobile and in online including social media channels, influencer marketing, and company websites.
Mission: Lotus Bakeries aims to make a substantial contribution to carefully selected education projects aimed at high-quality education for vulnerable or disadvantaged children and young people.

At Lotus Bakeries we contribute to the well-being of our fellow human beings by providing support to education. The reason is simple: education is the key to breaking the vicious circle of poverty.

Anyone with access to high-quality education can learn a trade and thus also gain access to the labour market, earn an income and support a family, share knowledge and continue to develop.

Education is a universal human right to which every child is entitled for good reason. It offers future prospects and helps the child become an independent and self-reliant human-being. Somebody who can contribute to the economy. In this way education is the key to success of the child and society.

Our underlying principles are clear:

• We want to give vulnerable or disadvantaged children and young people in various regions access to high-quality education.
• We do this by supporting projects aimed at elementary and secondary education, but also aimed at technical skills and out-of-school cultural or sporting activities.
• We select a limited number of projects to which we can make a substantial contribution.
In 2023, Lotus Bakeries supported eight development projects within the Lotus Bakeries’ Foundation for Education:

**The Kusasa Project**

The Kusasa project is an education project in the Western Cape province of South Africa of which Lotus Bakeries has been the main sponsor since 2018. Every year, around 150 children receive quality primary education and are supported in their further development. This increases their prospects of a better future, which also benefits the local community.

In terms of educational achievements, 2023 was a remarkable year for The Kusasa Project. The support allowed 60% more classroom hours last year than in other schools in the region. In the fourth group, 24 students graduated from The Kusasa Academy in 2023. Besides regular education, activities included dance classes, 42 excursions and field trips, as well as 50 winter and summer sports activities and, last but not least, cultural clubs where children had an opportunity to discover their passion.

The Kusasa Project has always prioritised development needs for young children. In addition to educational goals, The Kusasa Project also makes sure that the children are provided with practical needs and resources that improve their quality of life, such as: acupuncture therapy, eye tests and corrections, eyesight enhancement, hearing exams and provision of hearing aids. In 2023, some 52 families used social workers, 110 home visits were made and around 126 forms of medical and social assistance were provided to the community.

**Lotus Bakeries Child Sponsorships**

This project was set up in conjunction with Cunina at the school in Reichenau, Underberg, South Africa. Since 2017, the employees of Lotus Bakeries Corporate have been given the opportunity to become sponsors. All sponsored children are offered an education from the first year of primary to the final year of secondary. This is a long-term commitment of 12 years for around 145 children.

**TAJO**

Through its support of the Ghent Talent Studio for Young People (TAJO), Lotus Bakeries makes a conscious decision to provide socially vulnerable young people in the Ghent and Kortrijk regions (Belgium) with new opportunities and to fuel their motivation to start studying.

At TAJO, young people are introduced to various professions and the corresponding skills and talents via interactive workshops on Saturdays. These workshops are led by experienced guest teachers and at least once a month, the young people get the opportunity to take a look behind the scenes in inspiring companies. This way, young people can discover for themselves which fields appeal to them and what encourages them to study in a direction that will take them further, both at school and in society.

In order to keep the connection going with the young people at TAJO during the summer holidays, TAJO organised activities for all the young people in July and August. The 2023 summer holidays kicked off with an event that focused on connecting and networking. In August, the new TAJO year was collectively launched with a day of experience-focused workshops across different locations such as: the Ghent Bourgoyen, the Technology Park in Zwijnaarde, Doerak farm in Marke and the University of Applied Sciences in West Flanders.

**City Pirates**

The City Pirates community football project, which operates in eight locations in Antwerp (Belgium), uses football to give young people an opportunity and to learn skills. The project’s main goal is to give underprivileged young people in the province of Antwerp a chance to get an education, a diploma, and a job.

The development of skills in sports is closely associated with the promotion of social skills in which teamwork, perseverance, effort and discipline are key, along with equality, respect and commitment. All of this is focused on creating a stable and balanced future. City Pirates also offers social and financial guidance for parents, after-school activities and homework assistance for children. The organisation currently has 15 professional employees, 215 volunteers and 1,500 players. The first City Pirates team plays in the second amateur class and receives logistical support from Club Brugge KV.

City Pirates, in addition to sports activities, also organised events in 2023 focused on social commitment. This was reflected in playground activities, youth outreach, various workshops and events, internship days and a community event. Through these initiatives, the club creates a social platform outside of the soccer field where young people, children, parents and volunteers can collectively work on a better community in the city.

**The Kusasa Project**

The Kusasa project is an education project in the Western Cape province of South Africa of which Lotus Bakeries has been the main sponsor since 2018. In 2023, some 52 families used social workers, 110 home visits were made and around 126 forms of medical and social assistance were provided to the community.
Entrepreneurs for Entrepreneurs
Literacy training for women
The ‘Literacy for women as a weapon for their emancipation’ project has been supported by Lotus Bakeries since 2021.

The emancipation of women and their social and economic emancipation in the Democratic Republic of the Congo and Benin depend on education. Leuven Coopération and its local partners organise literacy courses for women and girls in these countries. These courses have a direct and significant impact on the emancipation of these women and the image they have of themselves and their families.

A future for disadvantaged young people in Walungu thanks to training in sustainable agriculture and the economy
With this project, Lotus Bakeries offers support to four technical agricultural schools in the Walangu region in Congo, namely: Maka, Karhagwa, Muku and Ciherano. Unemployment in this region is exceptionally high. Even young people who have completed their education are finding it difficult to find work.

The project’s goal is to support young people in their vocational training while also reinforcing their teachers’ technical and entrepreneurial skills. The teachers are trained by experienced partners, with specific emphasis on agriculture and crafts because the Walangu area is predominantly agricultural and most opportunities lie in this sector. This will enable teachers to have sufficient knowledge to prepare young people for self-sustaining work within farming activities after graduation. A total of 486 students are being trained. This education allows them to support their families.

In the context of the social professional relevance of agricultural education, the focus is on financing practical matters that are necessary in order to support the courses. For example, in 2023 at the Muku Technical Institute, the rabbit hutch was refurbished and a pig was purchased for the pigsty in Ciherano. The introduction of a new course made it possible to train students in setting up micropropagation to produce healthy banana shoots.

Next, a management committee was set up to supervise the schools and optimise their operation by enabling knowledge exchange between the schools and agricultural businesses in the region.

Finally, a competition was organised for the graduates to prepare a business plan, with the most promising project receiving partial funding. Graduates starting income-generating activities in circular economy or agroecology will be coached with the purpose of advancing their initiatives while analysing which courses show the most promise for socio-professional integration.

Gammol
Gammol is a Belgian non-profit organisation committed to the educational and healthcare needs in Gambia, where the availability of clean water and education are considered essential basic conditions.

The main efforts in 2023 were the construction of a fourth school and the provision of clean water in various regions. Due to Gammol, more than 120,000 people in Gambia now have daily access to clean and potable water, which is just one link in the chain that should lead to greater self-reliance.

The biggest project started in June 2023, with the construction of the fourth school in Falaa, a southern district of Sanyang in Gambia. This new primary school will include four classrooms, a lounge for teachers and management and sanitary facilities. All of the materials required for the construction of the school are purchased and manufactured locally, which benefits the local economy.

In addition to efforts to build schools, Gammol always sets clear expectations for the local communities it supports to ensure quality education. This involves paying attention to what subjects are taught, the appointment of teachers and their responsibilities. This is because the focus of primary education is on language and maths. Gammol’s actions are based on the belief that quality education gives young people a greater chance of breaking out of poverty. Providing quality education is therefore also one of the key goals, aimed at achieving self-reliance.

Gooikenshoeve
VZW Gooikenshoeve (Belgium) was set up to provide psychologically and socially vulnerable young people and young adults from 17 to 25 a worthwhile daytime activity in a small-scale, safe and warm environment.

In this way we want to nurture the hope and the ability of our guests to find a way into normal social integration and interaction with themselves and others. Lotus Bakeries is keen to do its bit in this regard.

Lotus Bakeries
Our sustainability programme
EXTERNAL INITIATIVES, COMMITMENTS AND EVALUATIONS

To help us achieve and demonstrate our ESG commitments, we have several key memberships and certifications. These focus on people and planet, and align with our sustainability commitments.

**SBTi**
- The Science Based Targets initiative (SBTi) is a collaboration between CDP, the United Nations Global Compact, World Resources Institute (WRI) and the World Wildlife Fund (WWF). The SBTi is the only global initiative that directly links a company's carbon-emission targets to the Paris Agreement and associated global efforts, in order to keep the rise in global temperature below 1.5°C.
- Lotus Bakeries has signed the Business Ambition for 1.5°C Commitment Letter in March 2023. The target and roadmap is currently under development.

**CEFLEX**
- The Circular Economy for Flexible Packaging (CEFLEX) initiative is a collaboration of over 180 European companies, associations and organisations representing the entire value chain of flexible packaging. The goal of the initiative is to make all flexible packaging in Europe circular. CEFLEX’s ‘Mission Circular’ commits to collection of all flexible packaging and over 80% of the recycled materials channeled into valuable new markets and applications to substitute virgin materials.
- Lotus Bakeries is an active member of the CEFLEX initiative since 2020 and actively participates in the working groups concerning the development of design guidelines for a circular economy (DAACE).
- Lotus Bakeries applies the already existing CEFLEX guidelines to develop recyclable flexible packaging.

**FLEXIBLE PLASTIC FUND**
- The Flexible Plastic Fund is a UK-based collaborative fund of 18 renowned UK consumer goods manufacturers giving value to hard-to-recycle flexible plastics. The Flexible Plastic Fund is working with retailers, recyclers, local authorities and manufacturers using flexible plastic packaging to create an efficient system that incentivises high-quality recycling of a material that has historically gone to waste. The Fund is driving towards the long-term ambitions of ensuring flexible plastic recycling is UK-based, fully circular and facilitated by household recycling collections.
- Lotus Bakeries has been a member of the Flexible Plastic Fund since its establishment in 2021 through the brands Lotus Bakeries UK Ltd., Natural Balance Food and Kiddylicious. Lotus Bakeries actively participates in the funder meetings and financially supports the Flexcollect trials to pilot household collections in UK and the retail collections of flexible plastics.

**RSPO**
- The Roundtable on Sustainable Palm Oil (RSPO) is working to transform the palm oil industry to make it sustainable. It is a global non-profit organization that provides certifications for certified sustainable palm oil.
- Lotus Bakeries is member of the RSPO and the Belgian Alliance for Sustainable Palm Oil. We select key palm oil suppliers carefully on the basis of the NDPE principle (No Deforestation, No Peat, No Exploitation) in its purchasing standards. All Lotus Bakeries’ sites that use or purchase palm oil also have an RSPO certificate.

1 Key palm oil suppliers are those who supply products containing more than 50% palm oil and in which the ingredient makes up 5% of the recipe.
**RAINFOREST ALLIANCE**
- The Rainforest Alliance is an international non-profit organization working at the intersection of business, agriculture, and forests. Being Rainforest Alliance certified means a product respects the three pillars of sustainability: social, economic, and environmental.
- The cocoa butter and cocoa mass used in our Lotus® Biscoff® chocolate has been certified by the Rainforest Alliance. The Enkhuizer and Peijnenburg products with chocolate were originally UTZ certified but are Rainforest Alliance certified since the transition from UTZ to Rainforest Alliance.

**SEDIX**
- Sedex, the Supplier Ethical Data Exchange, is a collaborative platform that enables members to collect and share ethical data and identify risks in their supply chains. It's the world’s largest data platform for supply chain assessment.
- Lotus Bakeries is Sedex member with plants in Belgium and France. Being a member of the Sedex community supports our commitment to fair labour practices, the well-being of our employees, business ethics and the environment.

**SUSTAINALYTICS**
- Sustainalytics is a company that rates the sustainability of listed companies based on their environmental, social and corporate governance performance. They measure how exposed a company is to industry-specific ESG risks and how well it deals with the risks. The rating scale is made up of 5 risk levels ranging from severe risk to negligible risk.
- The assessment by Sustainalytics is 30.2. (latest update, June 2023). We appreciate the feedback and have taken initiatives in the course of 2023 to further improve our ESG performance.

**CDP**
- CDP, the former Carbon Disclosure Project, runs the global disclosure system to manage environmental impacts. They have broadened the scope of this disclosure, to deforestation and water security. They have built a comprehensive global collection of self-reported data. By scoring business from A to D, they take organisations on a journey from disclosure to awareness up to management on several environmental topics.
- Lotus Bakeries has a D on Climate Change and B- on Forest. We commit to the feedback and set up action plans to mitigate risks and capitalise on the opportunities that CDP points out.

Lotus Bakeries is rated by several independent organisations. We have ratings from the following organisations:
EU TAXONOMY

OVERVIEW OF THE EU TAXONOMY

This section contains the EU Taxonomy disclosures required by Article 8 of Regulation 2020/852 (the EU Taxonomy Regulation).

Article 9 of the EU Taxonomy Regulation identifies the following six environmental objectives:

1. Climate change mitigation
2. Climate change adaptation
3. The sustainable use and protection of water and marine resources
4. The transition to a circular economy
5. Pollution prevention and control
6. The protection and restoration of biodiversity and ecosystems

The EU has published a catalog of economic activities that can be considered for these objectives (the Delegated Regulations). Our view is that our core economic activities related to producing and selling indulgent and natural snacks are not covered by the Delegated Regulations and consequently are not currently considered for Taxonomy purposes. For reporting in 2023, the proportion of Taxonomy-eligible and ‘aligned’ economic activities in turnover, capital expenditure (CapEx) and operating expenditure (OpEx) must be disclosed for the first two environmental objectives. Moreover, the proportion of Taxonomy-eligible economic activities in turnover, CapEx and OpEx must be disclosed for the remaining four environmental objectives.

APPLICATION OF THE EU TAXONOMY REGULATION

The amounts used for the calculation of the turnover, CapEx and OpEx ratios are based on the reported data in the consolidated financial statements. As none of our revenue-generating activities are described currently in the Delegated Regulations, our EU Taxonomy-eligible turnover for 2023 is zero. For the same reason, we do not report any CapEx related to assets or processes associated with taxonomies-eligible economic activities or OpEx that is part of a plan to expand taxonomy-eligible economic activities.

If and when the specific economic activity ‘manufacturing of food products and beverages’ is added to the future Delegated Regulations, we expect our key performance indicators for Taxonomy-eligible turnover, CapEx and OpEx to increase.

CURRENT OTHER ACTIVITIES AND OUTLOOK ON OUR POTENTIAL FOR TAXONOMY-ELIGIBILITY GOING FORWARD

It is important to note that ‘non-eligible’ under the EU Taxonomy Regulation refers to the fact that the activities at present remain outside the scope of the economic activities for which technical screening criteria have been developed under the current Delegated Regulations. As such non-eligible activities under the EU Taxonomy should not be interpreted as an indication of our sustainability performance or ambition.

We will continue to assess our Taxonomy-eligible and aligned activities considering the evolving legal framework of the EU Taxonomy Regulation and to continue to integrate the requirements of the EU Taxonomy in our business model and reporting policies and procedures.

In the meantime, we continue to explore ways to reduce our emissions through our commercial strategy and invest in the decarbonisation of our operations and value chains as part of our ambition to achieve net zero by 2050.

For a qualitative description of the CapEx and OpEx spent to make our operations more sustainable, we refer to Chapter 2 of our Annual Report.

DEFINING OUR KPIS

The definition of the key performance indicators (KPIs) is determined in accordance with Annex I of the Art. 8 Delegated Act.

Turnover KPI

The turnover KPI is defined as the proportion of Taxonomy-eligible economic activities in our total turnover (numerator) divided by the net turnover (denominator). The denominator of the turnover KPI is based on our consolidated revenue as presented in our Consolidated Income Statement.

With regard to the numerator, we have not identified any Taxonomy-eligible activities as explained above.

CapEx KPI

The CapEx KPI is defined as Taxonomy-eligible CapEx divided by our total CapEx.

Total CapEx (denominator) consists of additions to tangible and intangible assets during the financial year considered before depreciation, amortisation and any re-measurements, including those resulting from revaluations and impairments, for the relevant financial year and excluding fair value changes. The denominator includes also additions to tangible and intangible assets resulting from business combinations and leases.

With regard to the numerator, as we have not identified Taxonomy-eligible economic activities, we do not record CapEx related to assets or processes that are associated with Taxonomy-eligible economic activities.
OpEx KPI
The OpEx KPI is defined as Taxonomy-eligible OpEx divided by our total OpEx.

Total OpEx (denominator) includes direct non-capitalised costs that relate to research and development, building renovation measures, short-term lease, maintenance and repair, and any other direct expenditures relating to the day-to-day servicing of asset of property, plant and equipment by the undertaking or third party to whom activities are outsourced that are necessary to ensure the continued and effective functioning of such assets.

With regard to the numerator, as we have not identified Taxonomy-eligible economic activities, we do not record OpEx related to assets or processes that are associated with Taxonomy-eligible economic activities.

TAXONOMY KPI’S FOR THE PERIOD ENDING DECEMBER 31, 2023
As none of our revenue-generating activities are covered by the Delegated Regulations, the share of Taxonomy-eligible turnover in our total turnover is 0%. Consequently, the related CapEx and OpEx are also 0%.

We acknowledge that the Commission Delegated Regulation (EU) 2021/2178 of July 6, 2021 (hereafter referred as Regulation) requires to disclose the information referred to in Article 8, paragraphs 1 and 2, of Regulation (EU) 2020/852 as specified in Annex I to the Regulation, presented in a tabular form by using the templates set out in Annex II to the Regulation.

However, as most fields would be empty or nil, for the sake of clarity for our readers, we present all required information as in the simplified tabular form hereunder.

In 2023, the Group has made climate change mitigating CAPEX investments for a total amount of EUR 4.5 million (mainly relating to electric vehicles, charging stations and plant batteries), representing more than 20% of the maintenance CAPEX of the Group.

The detailed information and data-tables in accordance with the EU taxonomy are disclosed in Annexes of the current report.
LIMITED ASSURANCE REPORT

INDEPENDENT LIMITED ASSURANCE REPORT ON THE SUBJECT MATTER INFORMATION OF THE CARE FOR TODAY SECTION IN THE ANNUAL REPORT 2023 OF LOTUS BAKERIES NV

To the Board of Directors of Lotus Bakeries NV

This report has been prepared in accordance with the terms of our engagement contract dated 15 December 2023 (the “Agreement”), whereby we have been engaged to issue an independent limited assurance report in connection with a selection of sustainability KPIs included in the Annual Report as of and for the year ended 31 December 2023 of Lotus Bakeries (the “Company”), as listed in the Appendix of this assurance report.

THE DIRECTORS’ RESPONSIBILITY

The Directors of Lotus Bakeries NV (“the Company”) are responsible for the preparation and presentation of the selection of sustainability KPIs for the year 2023 included in the Report, as listed in the Appendix of this assurance report (the “Subject Matter Information”), in accordance with the criteria disclosed in the Report (the “Criteria”).

This responsibility includes the selection and application of appropriate methods for the preparation of the Subject Matter Information, for ensuring the reliability of the underlying information and for the use of assumptions and estimates for individual sustainability disclosures which are reasonable in the circumstances. Furthermore, the responsibility of the Directors includes the design, implementation and maintenance of systems and processes relevant for the preparation of the Subject Matter Information that is free from material misstatement, whether due to fraud or error.

AUDITOR’S RESPONSIBILITY

Our responsibility is to express an independent conclusion about the Subject Matter Information based on the procedures we have performed and the evidence we have obtained.

We conducted our work in accordance with the International Standard on Assurance Engagements 3000 (Revised): “Assurance Engagements other than Audits or Reviews of Historical Financial Information” (ISAE 3000), issued by the International Auditing and Assurance Standards Board. This standard requires that we comply with ethical requirements and that we plan and perform the engagement to obtain limited assurance as to whether any matters have come to our attention that cause us to believe that the Subject Matter Information has not been prepared, in all material respects, in accordance with the Criteria.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than, for a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable engagement been performed. The selection of such procedures depends on our professional judgement, including the assessment of the risks of material misstatement of the Subject Matter Information in accordance with the Criteria. The scope of our work comprised the following procedures:

• assessing and testing the design and functioning of the systems and processes used for data-gathering, collation, consolidation and validation, including the methods used for calculating and estimating the Subject Matter Information as of and for the year ended 31 December 2023 presented in the Report;
• conducting interviews with responsible officers;
• reviewing, on a limited test basis, relevant internal and external documentation;
• performing an analytical review of the data and trends in the information submitted for consolidation;
• considering the disclosure and presentation of the Subject Matter Information.

The scope of our work is limited to assurance over the Subject Matter Information for the year 2023. Our assurance does not extend to information in respect of earlier periods or to any other information included in the Report.

OUR INDEPENDENCE AND QUALITY MANAGEMENT

We have complied with the independence and other ethical requirements in the International Ethics Standards Board for Accountants’ (IESBA) International Code of Ethics for Professional Accountants (IESBA Code) together with the legal Belgian requirements in respect of the auditor independence, particularly in accordance with the rules set down in articles 12, 13, 14, 16, 20, 28 and 29 of the Belgian Act of 7 December 2016 organising the audit profession and its public oversight of registered auditors and with Art. 3:62, 3:63 and 3:64 of the Companies’ and Associations’ Code.

Our firm applies International Standard on Quality Management n°1, Quality Management for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance Related Services Engagements, and accordingly, maintains a comprehensive system of quality management including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

152 - Lotus Bakeries
OUR CONCLUSION

Based on the procedures we have performed and the evidence we have obtained, nothing has come to our attention that causes us to believe that the Subject Matter Information within your Annual Report as of and for the year ended 31 December 2023 has not been prepared, in all material respects, in accordance with the Criteria.

OTHER ESG RELATED INFORMATION

The other information comprises all of the ESG related information in the Report other than the Subject Matter Information and our assurance report. The directors are responsible for the other ESG related information. As explained above, our assurance conclusion does not extend to the other ESG related information and, accordingly, we do not express any form of assurance thereon. In connection with our assurance of the Subject Matter Information, our responsibility is to read the other ESG related information and, in doing so, consider whether the other ESG related information is materially inconsistent with the Subject Matter Information or our knowledge obtained during the assurance engagement, or otherwise appears to contain a material misstatement of fact. If we identify an apparent material inconsistency or material misstatement of fact, we are required to perform procedures to conclude whether there is a material misstatement of the Subject Matter Information or a material misstatement of the other information, and to take appropriate actions in the circumstances.

OTHER MATTER - RESTRICTION ON USE AND DISTRIBUTION OF OUR REPORT

Our report is intended solely for the use of the Company, to whom it is addressed, in connection with their Report as of and for the year ended 31 December 2023 and should not be used for any other purpose. We do not accept or assume and deny any liability or duty of care to any other party to whom this report may be shown or into whose hands it may come.

APPENDIX – SUBJECT MATTER INFORMATION

In section 02 our sustainability programme - care for today, respect for tomorrow:

On page 85:

- Environment
  - Sustainable Packaging: % of packaging of all Lotus Bakeries brands that is recyclable

- Carbon footprint
  - % of owned sites that have earned the CO2-neutral label
  - Total scope 1 and 2 emissions relating to our owned sites
  - Kg of waste per tonne generated

- Sustainable sourcing
  - % of production sites which process palm oil and have achieved the RSPO certificate

On page 105:

- People
  - Gender diversity: % men-% female for Board of Directors, Leadership team and all employees
  - Geographical distribution: Total headcount per country and split between men/female (absolute and in %)

On page 120:

- People
  - Health and safety: Total occupational accidents involving absence from work

On page 125:

- Community
  - Priorities
    - % of internal employees who have signed the Code of Conduct
    - % of key suppliers who have signed the Code of Conduct
    - % of key suppliers who endorsed the principles of Lotus Bakeries Palm Oil Policy

GROUP STRUCTURE AND DAY-TO-DAY MANAGEMENT

The Executive Committee (EXCO) determines Lotus Bakeries Group’s strategy and objectives and submits them to the Board of Directors for approval. This strategy is implemented by the country and regional organisations (‘areas’) in the different business units, supported by the various corporate departments.

Jan Boone (representative of Mercuur Consult BV) is the CEO of Lotus Bakeries Group since 2011 and leads the members of the EXCO on a day-to-day basis. He started his career in the audit department of PwC. From 2000-2005 he was responsible for corporate controlling, reporting and M&A at the pharmaceutical company Omega Pharma. He was part of the Executive Committee and Board of Directors there. Jan joined Lotus Bakeries as General Manager and Director in May 2005.

Jan Boone is Chairman of the Board of Directors of Amarekare Group and sits on the Board of Directors of FC Bruges and Tomorrowland.

Isabelle Maes (representative of Valseba BV) is CMO of Lotus Bakeries and CEO Natural Foods within the Group. She began her career as an auditor for PwC. In May 2001, she moved to the Barry Callebaut chocolate company. Having fulfilled various roles and been involved in various projects in Finance and SAP, she was appointed Finance Officer of Barry Callebaut Belgium in 2006. Between 2014 and 2017, Isabelle fulfilled the role of CFO at Lotus Bakeries Group. So as to be able to dedicate herself fully to the internationalisation and growth of the natural snacking segment, she has fulfilled the role of CEO Natural Foods since September 2017 and is CMO of Lotus Bakeries since 2023.

Mike Cuvelier (representative of Cumaco BV) has been CFO of Lotus Bakeries Group since September 2017, with the Finance, HR and ESG departments reporting to him. Mike began his career in 1996 as an auditor for PwC. Between 2000 and 2013 he fulfilled various controlling roles at Bebkoert in the United States, Asia and finally was Vice President Control Global Business Platforms in Belgium. From 2013 to 2017, Mike was CFO of the Unilin Group, part of Michelin Industries.

Ignace Heyman (representative of Heycom BV) is CDO of Lotus Bakeries Group. He pursued a career in marketing in both Belgium and France, firstly at Procter & Gamble, PAB Bieneau (Panzani-Amora-Bledina) and then at Redkit Benzisk. In 2008, Ignace joined Lotus Bakeries as Marketing Director Belgium, before going on to become Corporate Director Marketing in 2011. From mid-2012 to the end of 2015 he was General Manager France. He has been CDO since 2016.

William Du Pré has been Corporate Director of Quality, Procurement and R&D since 2016, and is in charge of these corporate departments. William’s career at Lotus Bakeries began in 1982. Over the years, he has occupied a variety of sales roles. He was General Manager Belgium for almost ten years (2007-2015).
CMO APPOINTED TO FOSTER INTERNATIONAL GROWTH

For the growth of Biscoff® and the Natural Foods brands, Lotus Bakeries intends to invest more than ever in digital and data-driven marketing, making the most of synergies between the brands within the two strategic pillars. To that end, Isabelle Maes has taken on the role of Chief Marketing Officer since early 2023, in addition to her role as CEO Natural Foods. She comprehensively guides the marketing efforts for the two strategic pillars.

Alongside the strengthened organisation for the global marketing teams, the European country organisations and responsibilities have been streamlined. All European sales offices of Lotus Natural Foods, apart from the UK, are now integrated and report to Ignace Heyman, COO of the Lotus Bakeries Group. These changes are intended to more effectively streamline activities and adapt to the market in which the company operates.

SYNERGIES BETWEEN BISCOFF® AND LOTUS™ NATURAL FOODS

Today’s marketing is fundamentally different from the past: more digital, more individual, more international and also more data-driven. That was also validated by the strategy exercise we conducted for Biscoff® in partnership with Bain & Company. Lotus Bakeries wants to invest more in data and digital marketing for Biscoff and the Natural Foods brands, and to do so more efficiently, making the most of synergies between these Global Brand teams. Digital, data-driven marketing is more direct and highly targeted, but needs to be followed up very closely because it is constantly evolving and each medium requires a specific approach. We are therefore combining the marketing efforts for both strategic pillars of our company under the leadership of our new CMO Isabelle Maes.

This will have the added benefit that the teams will be able to inspire each other and align their processes, and we will achieve a more uniform marketing approach. The experienced Biscoff team uses processes that have long been embedded in the organisation, and can share that expertise. The Natural Foods brands are younger, bringing with them an entrepreneurial spirit that lets them provide fresh perspectives and inspiration. Since our sales teams in many countries commercialise both Biscoff and the Natural Foods brands, it also makes sense from this point of view to look for a more uniform approach where possible, whilst keeping the brand ownership and strategy fit to purpose for both Biscoff and the Natural Foods brands.

A good example is our e-commerce approach that is coordinated in an overarching way by a dedicated centralised digital team. Within each area, the General Managers are responsible for implementing the Lotus Bakeries e-commerce strategy.

OUR WORLDWIDE PRESENCE

SALES STRUCTURE
Lotus Bakeries has a total of 23 sales offices & agencies, spread across Belgium, France, the Netherlands, the United Kingdom, Spain, Germany, Italy, Sweden, Switzerland, the Czech Republic, Austria, the United States, Hong Kong, China, South Korea, Japan and Australia. Lotus Bakeries has consolidated its Lotus Natural Food sales offices in the United Kingdom in one location in St. Albans, just outside of London. The St. Albans office is now the home of the four Natural Foods Sales offices: Natural Balance Foods (NBF), Urban Fresh Foods (UFF), Kiddylicious® and Peter’s Yard®.

In approximately fifty other countries, we work closely with commercial partners. These partnerships are combined into the areas of the International Distributors of Lotus® Biscoff® and the International Distributors of the Natural Foods brands.

PRODUCTION SITES
Lotus Bakeries has a total of twelve production sites. They are spread across Belgium, France, the Netherlands, Sweden, the United States and South Africa. The thirteenth production site is currently being built in Thailand and will be operational by 2026. We also have our own distribution centre in Lokeren (Belgium).

With the exception of TREK®, Kiddylicious® and Peter’s Yard®, all brands are produced in our own production sites. We use a variety of production technologies to ensure the typical characteristics of our extensive product range. We do this by limiting the number of products and technologies at each site and by centralising production processes in specialised plants.

NEW SALES AGENCIES
In 2023, new sales agencies were established in Japan and Australia. Recognising the potential in both markets, the decision was made to establish a direct presence, with our own employees. This move aims to strengthen the collaboration with our distributors in these markets and enhance our knowledge of the local market.

PRODUCTION SITES
In April 2023, a traditional ceremony was held in Thailand to symbolically drive the first pile into the ground, marking the commencement of construction for the new plant. This Biscoff® production site will mainly produce for the Asia-Pacific region. A team of both local and expatriate employees is committed to making the site operational by the first half of 2026.

To ensure adequate production capacity, an investment has been made in 2023 to establish our own dedicated production facility alongside the BEAR® plant in Wolseley (South Africa). Nākd is one of Lotus TM Natural Foods’ brands, and was still produced entirely by a co-manufacturer in the UK. The new production hall will take on international volumes, while the volume for the UK will continue to be produced by our co-manufacturer.

Due to the different production processes of nākd and BEAR, the final products and the precautions related to the allergen status, there are two separated buildings positioned parallel to each other.

In Lembeke, Belgium, an additional line for Biscoff Sandwich Cookie was inaugurated and existing production facilities were optimised.

Additionally, in the US, production efficiency was enhanced through capacity expansions in recent years.

EXPANSIONS 2023

1 Sales offices belong to the same sales office when both location and legal ownership are the same.
2 Production sites are considered part of the same production site when both location and legal ownership are the same.
3 Our nākd products are manufactured partly by a co-manufacturer in the UK and partly at our production facility in South Africa.

1 Other: Austria, Australia, Czech Republic, Germany, Hong Kong, Italy, Japan, Spain, Switzerland and Thailand
In 2023, Lotus Bakeries' consolidated revenue grew by EUR 185 million to EUR 1,063 million. The revenue growth realised in the first six months kept its high pace to end the year with an impressive sales increase of 21%. The high-quality organic growth in 2023 is driven by strong volume growth and price increases. Consolidated sales include around one percent of negative exchange rate effect.

The volume trend in the second half of the year further improved to end with a full year increase of just below 10%. The volume growth is primarily organic, about one percent accounts for the sales relating to the acquisition of Peter's Yard®.

The growth of 2023 demonstrates continued momentum and robust demand across the entire product range and across the different geographies. The broad portfolio of branded products was quite resilient against the impact of inflation and consumer spending.

Lotus Biscoff®, the Group's largest strategic pillar, grew by 20% in 2023 reaching a new revenue milestone of EUR 500 million. Driven by this strong and international growth, Lotus Biscoff cookies moved up another place in the global Cookie Brands ranking to enter the top 5.

Lotus™ Natural Foods builds further on its strategic growth poles with a focus on accelerated international growth on the one hand and maintaining market leadership, combined with strong innovation in the UK, on the other. In the UK, the Lotus Natural Foods brands achieved double-digit growth and Lotus Natural Foods’ international activities outside the UK grew by more than 35% and already represent one third of total Lotus Natural Foods sales. The sales growth of BEAR in the US is an important contributor to the international growth of Lotus Natural Foods. Since its launch in the US in 2018, BEAR has developed into a leading brand in the Kids Fruit Snacking category.

Lotus™ Natural Foods builds further on its strategic growth poles with a focus on accelerated international growth on the one hand and maintaining market leadership, combined with strong innovation in the UK, on the other. In the UK, the Lotus Natural Foods brands achieved double-digit growth and Lotus Natural Foods’ international activities outside the UK grew by more than 35% and already represent one third of total Lotus Natural Foods sales. The sales growth of BEAR in the US is an important contributor to the international growth of Lotus Natural Foods. Since its launch in the US in 2018, BEAR has developed into a leading brand in the Kids Fruit Snacking category.

Lotus Local Heroes is active already for a number of years with an own sales office, it shows that the strategy and the repeatable model pay off. At the same time, the penetration growth in larger consumer markets like Germany, France, Spain, Italy and the UK confirm the significant potential that Lotus Biscoff still has in many European countries. Also in Asia-Pacific, larger consumer markets like Australia, China and Malaysia performed strong. The household penetration in Australia is worth calling out after it surpassed the 10% mark.

Lotus Local Heroes connects again with growth in 2023. The 15% sales increase is driven by both price increases and restoring a broader range of products with almost all retailers. Moreover, increased capacity for Dinosaurus® cookies and Waffles allowed solid volume growth for both concepts. The Lotus Cake Donut innovation was introduced in the Pastry category in Belgium and France. Also towards the end of 2023, the Peijnenburg® range in the Netherlands progressed towards improved recipes, updated designs and an increased focus on the no-sugar-added variant.
STATUS OF THE INVESTMENT PROGRAMME

Lotus® Biscoff®

With Lotus® Biscoff® plants in Europe (Lembeke), the US (Mebane) and Thailand (Chonburi), the future production footprint will be more balanced and in line with the geographical sales distribution. The three production facilities will supply Europe & Middle-East, the Americas and Asia-Pacific respectively with the freshest possible products in the most cost and eco-effective way possible. Incremental investments in Lembeke and Mebane will be executed in the coming periods to balance global and regional demand evolution.

Lotus Bakeries is currently investing in Thailand (Chonburi) in a new greenfield production facility for Lotus Biscoff to further support its growth ambition in the Asia-Pacific region. The land was purchased in November 2022 and the project team has now completed the land levelling and groundworks. The building construction is ongoing. In parallel, local sourcing options for raw materials and packaging are being developed. Trustworthy and long term supply partners have been identified and will be strategically important for sustainable and quality operations in Thailand. According to the current timescale, the project is on track for a first line to be operational in the first half of 2026 at the latest.

Investments in South Africa for the production of BEAR® and nākd®

The strong performance of the BEAR® factory and the agility of the operations were the main drivers in the decision to extend the Wolseley factory with an additional production facility for the production of the nākd® raw bars. In the second half of 2023, the team has again proven its capabilities by commissioning the new plant in the shortest possible timeframe. This allowed the first commercial production to take place already in January 2024. An official opening ceremony took place in February 2024 in the presence of the CEO Jan Boone, the Belgian Ambassador and Consul General in South Africa and South African officials. The new plant in South Africa will produce the international demand for nākd bars.

FINANCIAL INFORMATION

PROFITABILITY AND EVOLUTION OF COSTS

The recurring operating result REBIT (EUR 173 million or 16.3% on revenue) and the recurring operating cash flow REBITDA (EUR 208 million or 19.5% on revenue) increased respectively by EUR 33 and EUR 38 million.

A sales increase of 21% is the result of close to 10% volume increase on the one hand and double-digit price increases on the other. These responsible price advances were necessary to offset cost increases across all cost components and protect margins. In addition, the volume growth contributes to commercial and operational margins and allows for continued investments in people and assets. The pace of media investments stepped up moderately in the second half of the year supporting the brands globally. Ocean freight costs showed a clear decrease.

The non-recurring income and expenses of EUR -2.5 million relates mainly to costs in preparation of the new plant in Thailand. These start-up costs for the project will increase towards the commissioning of the plant in 2026.

The financial result of EUR -2.5 million consists mainly of interest expenses. Prior year financial result included a positive impact of realised and unrealised exchange rate results on balance sheet positions in foreign currencies.

The tax expense amounts to EUR 39 million or 23% of the profit before tax. The effective tax rate is in line with prior year.

Net result increases by EUR 26 million and amounts to EUR 129 million or 12.2% on revenue. Earnings Per Share (EPS) increased by 25% to EUR 159 per share. Recurring net result amounts to EUR 101 million or 12.4% on revenue. The recurring net result is the reported net result for the period excluding non-recurring income and expenses.

Over the past 12 months Lotus Bakeries has generated a new record operating cash flow (REBITDA) of EUR 208 million. Investments over the past 24 months were EUR 242 million. Continued strong cash flow generation, combined with disciplined investments in maintenance capex and control on working capital, reduced the net financial debt at the end of 2023 to a ratio of net financial debt/REBITDA of 0.6. Maintenance capex represents less than 2% of sales.

SIGNIFICANT EVENTS AFTER DECEMBER 31, 2023

No significant events have occurred since December 31, 2023 which have a material impact on the 2023 financial statements.
PROSPECTS FOR 2024

The year 2023 will be remembered in Lotus Bakeries history as the year that the one billion euro revenue milestone was reached. This has been achieved thanks to another record sales growth of more than EUR 185 million. A strong performance was recorded for the strategic pillars of Lotus® Biscoff® and Lotus™ Natural Foods.

The year 2023 will also go down in history as the year that Lotus Biscoff achieved the half a billion euro revenue milestone. Lotus Biscoff cookies moved up another place in the top ten of the global Cookie Brands ranking entering the top 5. The ambition to become the cookie number three in the world is still a longer term ambition but remains more valid than ever.

Growth and internationalisation of Lotus Biscoff and Lotus Natural Foods continue to be the strategic priorities. In order to sustain this growth in the coming years, both Lotus Biscoff and Lotus Natural Foods’ in-store activation and media investments will be crucial. To realise at least mid-single digit volume growth for Lotus Biscoff, brand awareness will be continuously nurtured and the household penetration will be fed via the aforementioned investments. The disciplined spending level of recent years will be increased in targeted growth markets.

Geopolitical uncertainty and volatility on global commodity markets remain at the forefront. Short term predictions are difficult to make in this rapidly changing environment. The strategic pillars remain well positioned to withstand the challenges.

Capital allocation will continue to be focused on capacity expansion to support the organic growth and internationalisation of Lotus Biscoff and Lotus Natural Foods. The greenfield project in Thailand remains on track. Total capital expenditures for 2024 and 2025 combined are forecasted in the range of EUR 200 million. On top of that, opportunities to invest via the corporate venture fund FF2032 also remain a priority and provide the seeds for more long term future growth.

“I am extremely proud to announce that we reached this EUR 1 billion revenue milestone in 2023!

I want to call out foremost a special thank you to all 2,984 people at Lotus Bakeries who made this possible. This is a team effort from all of us, working together every day, across boundaries of departments, brands and countries.

People make the difference, and that is why it’s important to continue investing in and focusing on the Social component of ESG. We seek attention for the well-being of our people, aiming for them to be motivated and safe, providing opportunities for professional and personal development, and to spend their time working together in well-equipped offices, and to enjoy good working conditions in the plants.

Ultimately, we believe that fostering physical gatherings among our Lotus Bakeries’ people cultivates the unique Lotus Bakeries culture of Teamwork, Open dialogue and Passion.

We are convinced that the achievement of the EUR 1 billion milestone stems from this unique TOP culture. We firmly believe in the effectiveness of our strategy and hold a positive view about the future prospects of Lotus Bakeries and its aspirations.”

Jan Boone – CEO Lotus Bakeries

Lotus Bakeries - 181
RESULTS AND PROPOSAL FOR APPROPRIATION OF RESULTS

CONSOLIDATED
The consolidated net profit for 2023 amounted to EUR 129.3 million as compared to EUR 103.5 million in 2022.

STATUTORY
The 2023 results for the parent company Lotus Bakeries NV are as follows:

DIVIDEND GROWTH (IN EUR)

CORPORATE GOVERNANCE DECLARATION
Lotus Bakeries adopts the Corporate Governance Code 2020 as a reference code, in accordance with Article 3.6(2) of the CAC and the Royal Decree of 12 May 2019 laying down the corporate governance code to be complied by listed companies.

Lotus Bakeries’ Corporate Governance Charter, which outlines our corporate governance policy and the internal rules of procedure of the Board of Directors, the Committees and the Executive Committee, was discussed by the Board of Directors and approved on 2 April 2020.

More information about our Corporate Governance Charter can be found on our website: https://www.lotusbakeries.com/governance-practices-and-policies

In this annual report, we report factual applications of the Corporate Governance Charter.

ADOPITION OF CORPORATE GOVERNANCE CODE 2020
As set out below, Lotus Bakeries follows all principles contained in the Corporate Governance Code 2020, except for the following two provisions:

• The Ordinary General Meeting of Shareholders of 18 May 2021 reappointed Benoit Graulich BV as independent director, since all of the specific independence criteria of Article 3.5 of the Belgian Corporate Governance Code 2020 were fulfilled but one, i.e. the criterion that a director must have held the position of non-executive director for no longer than 12 years. This was not considered to detract from the independence of Benoit Graulich (and Benoit Graulich BV), who in carrying out his duties as director always demonstrates an independent and critical attitude and has confirmed that he has no relationship whatsoever with the Company, the executive management, the reference shareholder or other shareholders owning more than 10% of the shares which could jeopardise his independence.

• Article 712 concerning the possibility of clawing back variable remuneration paid to the members of the executive management or withholding the payment of variable remuneration. The Board of Directors is not convinced of the enforceability of a claw-back clause in employment contracts or service agreements with management companies, which cannot be amended unilaterally. Nor does it see the need for such a claw-back clause since, according to the remuneration policy, the variable remuneration is allocated solely on the basis of verified, audited and published results.

GOVERNANCE STRUCTURE
The Board of Directors chose to consolidate its current single-tier governance model as referred to in Article 7:85 et seq of the CAC, since the functioning of the Board is highly effective and transparent. The powers relating to day-to-day management versus supervision/ control are clearly defined, the Board is kept thoroughly informed at all times by the CEO and the EXCO and all necessary decisions are approved and/or ratified.

SHARE CAPITAL AND SHARES
Share capital
The share capital of Lotus Bakeries NV amounts to EUR 3,591,183.65.

Notices with respect to Art. 34 of the Royal Decree of November 14, 2007 - anti-takeover measures
The Board of Directors of Lotus Bakeries NV was authorised by the Extraordinary General Meeting of 12 May 2023 to increase issued capital one or more times up to a maximum amount of four million seven hundred and eighty-eight thousand two hundred and forty-four euros and eighty-seven cents (EUR 4,788,244.87). This authorisation was granted for a period of three years starting on the date of the publication of the resolution of the Extraordinary General Meeting of 12 May 2023 in the Supplements to the Belgian Official Journal.
Within the limits of the aforementioned authorised capital, the Board of Directors of Lotus Bakeries NV was furthermore authorised by the Extraordinary General Meeting of 12 May 2023, within a period of three years commencing with the Extraordinary General Meeting of Shareholders of 12 May 2023, following notification from the Financial Services and Markets Authority of a public takeover bid for the Company’s stock, to increase the Company’s capital subject to fulfilment of the legal requirements.

Shares
Since the beginning of January 2002, Lotus Bakeries NV shares have been listed on the continuous trading market of Euronext (Brussels). Previously, the shares were listed on the spot market.

As of December 31, 2023, there were 816,013 shares of Lotus Bakeries NV, in registered or dematerialised form.

Share options
In the context of the Lotus Bakeries NV share option scheme, 618 new share options were issued in 2023. As at December 31, 2023 the total number of unexercised share options was 3,121.

Purchase of treasury shares
The Extraordinary General Meeting of 8 May 2020 authorised the Board of Directors of Lotus Bakeries NV for an unlimited period of time as follows regarding the buying and selling of treasury shares:

• To dispose of shares, profit-sharing certificates or other certificates acquired by the Company, whether via the stock exchange or otherwise, through sale, exchange, contribution, conversion of bonds or any other form of transfer (whether or not for consideration); to offer them to the staff, to offer them to one or more specified persons other than staff, or to otherwise exercise control over them, always in accordance with the legal provisions, or to cancel these shares or profit-sharing certificates, without requiring further approval or other intervention of the General Meeting of Shareholders and without any time restrictions.

The Extraordinary General Meeting of 12 May 2023 authorised the Board of Directors of Lotus Bakeries NV as follows regarding the buying and selling of treasury shares:

• For a period of three years, within legal limits, whether via the stock exchange or otherwise, whether directly or indirectly, whether by purchase or exchange, whether by contribution or any other form of acquisition, to acquire shares, profit-sharing certificates or certificates related thereto, with as compensation the average closing share price of the Company over the last thirty calendar days prior to the date of purchase, reduced by twenty percent as a minimum price and increased by ten percent as a maximum price. This authorisation applies also to the acquisition of shares of the Company, carried out, directly or indirectly, by direct subsidiaries of the Company within the meaning of Article 7:221 CAC.

• To acquire, whether via the stock exchange or otherwise, whether directly or indirectly, the Company’s stock, when such acquisition is necessary to prevent the Company from suffering serious imminent damage. This authorisation is granted for a period of three years.

479 treasury shares were purchased over the course of 2023. The total number of treasury shares in the portfolio at the end of the financial year is 4,313 shares. They represent an accounting par value of EUR 18,980.1 or 0.53% of the issued share capital.

1 Stichting Administratiekantoor van Aandelen Lotus Bakeries is not controlled. The interest of Stichting Administratiekantoor van Aandelen Lotus Bakeries in Lotus Bakeries NV appears in the transparency notification that Lotus Bakeries NV received on September 29, 2021.

2 The voting rights attached to the shares held by Lotus Bakeries NV have been suspended. The dividends have not been suspended and will be distributed to Lotus Bakeries NV.

Pursuant to article 6, of the Law of May 2, 2007 on disclosure of participating interests.

Communication according to Article 14(1) of the Law of May 2, 2007 on disclosure of major holdings
Lotus Bakeries NV did not receive a transparency notification in 2023.

Communication according to Article 74(7) of the Law of April 1, 2007 on public takeover bids
Lotus Bakeries NV is not aware of any updates to any communication according to article 74 of the Law of 1 April 2007.
On May 12, 2023, the Ordinary General Meeting accepted the resignation of Sastraco BV, represented by its permanent representative Sabine Sagaert, as well as the appointment of Eagli BV, represented by its permanent representative, Noelle Goris, as independent director. Furthermore, on May 12, 2023, the Ordinary General Meeting of Shareholders noted the end of the directorship of Lema NV, represented by its permanent representative Michel Moortgat, and proceeded to confirm the appointment of Lema BV, represented by its permanent representative Michel Moortgat, as an independent director of Lotus Bakeries NV. As a result of a demerger which took place on June 8, 2022, Lema NV had been dissolved without liquidation and this management mandate had been cancelled. In light of this, the Board of Directors had decided to provisionally fill the vacancy in accordance with Article 13 of the Articles of Association of Lotus Bakeries NV and Lema BV (represented by its permanent representative Michel Moortgat) had been co-opted as director. The appointment of Lema BV is final since May 12, 2023.

The current composition of the Board of Directors:

**Managing director, CEO**
- Mercuur Consult BV, represented by its permanent representative Jan Boone
  - Current term of office ends: 2025 General Meeting

- Member of the Board of Directors at Lotus Bakeries since 2017
Report of the Board of Directors

Activities of the Board of Directors

The Board of Directors met six times in 2023. All directors were present at all meetings.

Within the Board of Directors, the following matters were discussed in detail:

- Investment budget and global budget
- Financial results
- Capital investments and expansions of capacity:
  - Agenda
  - (Re)appointments
  - Dividend proposal
  - Capex investments and expansions of capacity:
    - Europe, Belgium
    - Americas, United States
    - Asia, Thailand
    - Africa, South Africa
  - Product developments and innovations
  - Reports and recommendations from the Committees
  - Expansion of Audit Committee into Audit & Sustainability Committee
  - Early 2024, the Board of Directors moreover discussed and approved the Double Materiality Matrix set out on page 76 and 77 of this annual report.
  - Over the course of 2023, there was one incident within the Board of Directors which led to the application of the conflict of interest procedure

Audit & Sustainability Committee

In 2023, the mandate of the Audit Committee was broadened with ESG matters by decision of the Board of Directors of November 24, 2023. Since then, the committee is named Audit & Sustainability Committee.

The Audit & Sustainability Committee consists of two independent directors and one non-executive director. The two independent directors are Lema BV, represented by its permanent representative Michel Moortgat (Chairman) and Benoit Graulich BV, represented by its permanent representative Benoit Graulich. The non-executive director is Vasticom BV, represented by its permanent representative Jan Vander Stichele. All members have accounting and audit experience.

In 2023, the Audit & Sustainability Committee met three times. All directors were present at all meetings. The Auditor participated in all three meetings, at which he presented his findings to the Audit & Sustainability Committee.

The subjects examined were:

- Discussion of report and internal controls / recommendations of the Statutory Auditor
- Discussion of annual and interim results
- Risk management – priorities and evolutions
- Audit plan 2023
- ESG: double materiality

Lotus Bakeries – 189

Lotus Bakeries - 188
Remuneration and Nomination Committee

The Remuneration and Nomination Committee consists of two independent directors and one non-executive director. The independent directors are Benoit Graulich BV, represented by its permanent representative Benoit Graulich (Chairman) and Palumi BV, represented by its permanent representative Peter Bossaert. The non-executive director is Vasticom BV, represented by its permanent representative Jan Vander Stichele. All members have both HR management and remuneration policy experience.

The Committee met twice in 2023, with all members present.

The subjects examined were:

- Remuneration policy and its application
- Remuneration of CEO and Executive Committee
- Nomination of Eagli BV as independent director

Evaluation of the Board of Directors and its Committees

The operation of the Board of Directors and of the Committees is evaluated every three years. The evaluation of the effectiveness of the Board of Directors is undertaken by the Board itself under the leadership of its Chairman. This evaluation covers the size of the Board, the general functioning of the Board of Directors, the way meetings are prepared, the contribution of each individual director to the work of the Board, the presence and involvement of each individual director at meetings and decision-making, the composition of the Board of Directors and the interaction with the Executive Committee.

This assessment makes it possible to constantly optimise the management of Lotus Bakeries. Where appropriate, based on this review, and eventually in consultation with external experts, the Remuneration and Nomination Committee presents a report on the strengths and weaknesses of the Board of Directors and, where necessary, a proposal for the appointment of a new director or the non-prolongation of a directorship. The non-executive directors evaluate annually the interaction of the Board of Directors and the Executive Committee and when appropriate, submit proposals for improving cooperation. The CEO and the Remuneration and Nomination Committee also together evaluate annually the operation and performance of the Executive Committee. The CEO is not present at his own evaluation.

EXECUTIVE COMMITTEE

Composition of the Executive Committee:

- Jan Boone, permanent representative of Mercuur Consult BV, CEO
- Isabelle Maes, permanent representative of Valka BV, CMO & CEO Natural Foods
- Mike Cuvelier, permanent representative of Cumaco BV, CFO
- Ignace Heyman, permanent representative of Heycom BV, COO
- William Du Pré, Corporate Director Quality, Procurement and R&D

The members of the Executive Committee are appointed by the Remuneration and Nomination Committee.

The Executive Committee held 19 official meetings in 2023. All members were present at all meetings.

DIVERSITY POLICY

Lotus Bakeries ensures the presence on the Board of Directors, the Committees and the Executive Committee of critical members with specialist knowledge of the various areas relevant to Lotus Bakeries. Certain diversity criteria are imposed by law and are naturally adopted by Lotus Bakeries. Moreover, skills, competencies and diversity are paramount in the selection of members of the Committees, the Executive Committee, and in the selection of candidates for the Board of Directors proposed to the General Meeting.

First and foremost, Lotus Bakeries fulfills the diversity criteria regarding the number of independent directors and the number of directors of a different gender. In this respect, Lotus Bakeries declares that the composition of its Board complies with the requirement for at least one third of directors to be of a different gender than that of the other members. The aforementioned obligation is contained in Art. 7:86 CAC. It also wishes to point out in this connection that the abovementioned independent directors fulfill the independence criteria of Article 7:87f of the CAC and the Corporate Governance Code 2020, except for Benoit Graulich BV, for whom all of the specific independence criteria of Article 3.5 of the Belgian Corporate Governance Code 2020 were fulfilled but one, i.e. the criterion that a director must have held the position of non-executive director for no longer than 12 years. Reference is made to page 183 of this annual report.
Besides these diversity criteria enshrined in law, Lotus Bakeries also aims for diversity in knowledge and experience and, when selecting candidates, performs a thorough assessment based on competencies which would additionally benefit the company in view of the existing competencies among the members of the Board of Directors. In defining the appointment procedure and selection criteria for candidates for the Board, the following principles are always applied:

- The candidate must be expert in a field pertaining to the Company’s activities;
- The competencies, knowledge and/or experience which the candidate possesses must complement the competencies already present in the Board;
- In the interests of diversity on the Board, the Board shall consider different nominations, taking into account diversity in terms of gender, age and background, for example;
- Each candidate must have sufficient availability to fulfil his/her obligations properly, while non-executive directors must hold no more than five directorships in listed companies.

The results of the policy are illustrated in the CVs described above. This means Lotus Bakeries has a balanced Board of Directors in which the majority shareholder, the independent directors and the executive board are sufficiently represented. Some diversity parameters within the Board of Directors:

<table>
<thead>
<tr>
<th>VARIOUS ACADEMIC BACKGROUNDS: 10X DIFFERENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>BOARD OF DIRECTORS</td>
</tr>
<tr>
<td>independent</td>

</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>GENDER DIVERSITY</th>
</tr>
</thead>
<tbody>
<tr>
<td>men</td>
</tr>
<tr>
<td>7</td>
</tr>
</tbody>
</table>

Moreover, the Remuneration and Nomination Committee selects the members of the Executive Committee on the basis of knowledge, competencies, experience, background and skills and aims for diversity in these areas so as to have all knowledge in house to manage Lotus Bakeries with a team specialising in all relevant areas. Within the Executive Committee, there is currently a good balance between members with a financial background and members with a marketing and/or sales background. A good proportion of members with a long history in the company and members with a fresh view of matters is also ensured. Some diversity parameters within the EXCO:

<table>
<thead>
<tr>
<th>VARIOUS ACADEMIC BACKGROUNDS: 3 OUT OF 5</th>

REMUNERATION REPORT

Introduction

The purpose of the 2023 remuneration report is to provide transparent information about the specific remuneration policy adopted by Lotus Bakeries for directors and executive managers. It will be submitted to the Ordinary General Meeting of May 14, 2024 for approval. The 2022 remuneration policy was adopted by 91.05% of the votes at the Ordinary General Meeting of May 12, 2023.

The works council has also been informed in accordance with the provisions of the Act. The report has also been reviewed by the Auditor.

This 2023 remuneration report explains how the remuneration policy for directors of the Company approved at the Ordinary General Meeting of May 18, 2021 comprises a fixed remuneration of (i) EUR 20,000 and (ii) 4 shares in the Company.

No adjustments have been made to the remuneration policy compared to 2021.

More information about our remuneration policy can be found on our website: https://www.lotusbakeries.com/governance-practices-and-policies

Statement on remuneration policy applied in 2023

Non-executive and executive directors

The remuneration policy for directors of the Company approved at the Ordinary General Meeting of May 16, 2021 and set based on the responsibilities of and time spent by the director and the latter’s specific role as Chairman of the Board of Directors or member of a Committee. Specifically:

• Each director, except the Chairman, receives an annual remuneration of (i) EUR 20,000 and (ii) 4 shares in the Company.
• The Chairman of the Board of Directors receives an annual remuneration of (i) EUR 40,000 and (ii) 10 shares in the Company. The Chairman receives an additional remuneration of EUR 100,000 for representing the Company with respect to treatise groups.
• The members of the Audit Committee and the Remuneration and Nomination Committee receive an annual remuneration of EUR 5,000 per mandate.

The non-executive directors must keep the shares they receive by way of remuneration for at least one year after leaving the Board and for at least three years after the awarding of these shares. The non-executive directors receive no performance-based remuneration such as bonuses, stock-related long-term incentive schemes, fringe benefits, pension plan-related benefits or share options.

Besides the fee, all reasonable expenses of the members of the Board of Directors incurred with the consent of the Chairman of the Board of Directors are reimbursed.

The provisions concerning the remuneration of non-executive directors apply equally to executive directors in their capacity as directors.

The remuneration of the directors is evaluated every two years via a relevant random sample of other listed companies. This allows Lotus Bakeries to attract directors with the appropriate competencies to realise its ambitions.

No adjustments have been made to the remuneration policy compared to 2021.

2 Board member until May 12, 2023
Executive managers

Furthermore, the Remuneration and Nomination Committee makes specific recommendations to the Board of Directors on the remuneration of members of the executive management. In addition to the fixed remuneration, there is a variable compensation for members of the executive management, which depends on the results of the Lotus Bakeries Group.

The variable remuneration is based on well-defined criteria with a one-year evaluation period but also evaluation periods of two and three years.

• The criteria for determining the short-term bonus are as follows:
  - ⅓ of the short-term bonus depends on the consolidated turnover growth achieved by Lotus Bakeries Group over the past financial year
  - ⅓ of the short-term bonus depends on the consolidated recurring operating result achieved during the past financial year
  - ⅓ of the short-term bonus depends on the consolidated recurring operating cash flow achieved during the past financial year.

The Board of Directors approved the final, audited results on February 2, 2024, and, on this basis, on the advice of the Remuneration and Nomination Committee, established that all criteria were met. Consequently, 100% of the 2023 short-term bonus will be paid to all members of the executive management in 2024.

• The criteria for determining the long-term bonus are as follows:
  - ⅓ of the long-term bonus depends on the consolidated revenue growth achieved by Lotus Bakeries Group as specified in the multi-year plan in place
  - ⅓ of the long-term bonus depends on the consolidated recurring operating result as specified in the multi-year plan in place
  - ⅓ of the long-term bonus depends on the consolidated recurring operating cash flow as specified in the multi-year plan in place.

The long-term bonus is awarded and paid annually, with a settlement of accounts during the third year of the evaluation period. The Board of Directors approved the final, audited results on February 2, 2024, and, on this basis, on the advice of the Remuneration and Nomination Committee, established that all criteria were met. Consequently, 100% of the long-term bonus will be paid to all members of the executive management in 2024.

The bonus plan for executive management provides that the bonus is earned only after approval of the consolidated figures by the Auditor and then by the Remuneration and Nomination Committee.

Those members of the executive management who are subject to a contract of employment enjoy an additional (defined contribution) pension plan and other benefits, mainly comprising insured benefits such as guaranteed income and the cost of a car. Similar arrangements are in place for those members of the executive management who work through a management company.

There also exists a stock option plan with a fixed number of options for the members of the executive management. Allocated options are not normally deemed to be acquired finally and cannot be exercised during the first three years after being allocated. Upon early departure, the options not yet exercisable at that time can no longer be exercised.

Furthermore, the Board decided that members of the executive management will each have to own at least EUR 250,000 worth of shares in the company by the end of 2022, which must be kept so long as they remain a member of the executive management. All members of the executive management currently meet this requirement.

If a member of the executive management is also an executive director, his or her remuneration also includes the compensation he or she receives in the latter capacity.

The remuneration policy for members of the Executive Committee is set every two years based on a proposal by the Remuneration and Nomination Committee. Individual remuneration is reviewed annually. For this Lotus Bakeries uses the services of an international HR consultancy firm, that assesses the functions and presents the corresponding salary package as commonly awarded in the relevant market. The consultant reports directly to the Remuneration and Nomination Committee and provides verbal explanations.

Severance payments
The members of the Executive Committee who are remunerated on an independent basis and through a number of board mandates, have a severance payment of a maximum of 12 months of the fixed and variable remuneration. The other member of the Executive Committee is bound by an employment contract for employees. No severance payments were paid to Executive Committee members in 2023.

Executives
The remuneration policy of the executives is determined by the Executive Committee, the Remuneration and Nomination Committee approves. For the Lotus Bakeries also uses the services of an international HR consultancy firm, which assesses the functions and presents the going-rate salary package for the relevant market.

Lotus Bakeries ensures consistency between the compensation of Executive Committee members and the compensation of executives and other employees, taking into account market conditions for each category of employees. This is designed to attract, reward and retain employees. Executive compensation, like that of Executive Committee members, is composed of fixed and variable compensation, plus fringe benefits such as company cars, cell phones and/or group insurance. The concrete interpretation of these components always depends on the position of the person concerned, as well as on the local regulations to which the employee is subject. As is the case for members of the Executive Committee, a share option plan is currently provided for the Lotus Bakeries Leadership Team1.

Evolution of the remuneration and of the performance of the Company over the last five years

The ratio between the highest remuneration of members of management and the lowest compensation (in full-time equivalents) of employees of Lotus Bakeries NV, as stipulated by Article 5:6(3) CAC, cannot be reported since Lotus Bakeries NV has no employees. With a view to transparency, this ratio is reported for Lotus Bakeries Corporate NV. This ratio is 18.2.
ENTERPRISE RISK MANAGEMENT

RISK MANAGEMENT STRATEGY
Lotus Bakeries has implemented a continuous risk management process aimed at ensuring that risks are identified, assessed, prioritised, controlled and monitored in such a way that they can be kept at an acceptable level.

The risk management process is aligned with the implementation of the strategic, operational and financial objectives of the Company. The entire risk management process is based on the COSO Enterprise Risk Management framework.

The Company is exposed to a wide range of risks within the context of its activities that can result in its objectives being affected or not achieved. Mitigating these risks is a key task of the Executive Committee (EXCO). The EXCO has full responsibility for the risk management process for Lotus Bakeries and reports on this periodically to the Audit & Sustainability Committee.

Lotus Bakeries has a one-tier governance model, in accordance with the Belgian Companies Code. The Board of Directors bears ultimate responsibility for the management of risks within the Company, assisted by the Audit & Sustainability Committee. The day-to-day management is delegated to the CEO, assisted by the EXCO. The Audit & Sustainability Committee receives regular reports on risk management.

As such, the enterprise risk management of Lotus Bakeries consists of the following key components:

- Risk identification: this involves identifying the sources of risk that could impact the Group. These sources could include anything from food safety and quality risks, to operational and financial risks.
- Risk assessment: once risks have been identified, it is important to assess their impact and likelihood of occurrence. This helps to prioritise the most critical risks and determine the appropriate response.
- Risk mitigation: after risks have been identified and assessed, strategies are developed to mitigate or manage those risks. This may include implementing process improvements, implementing controls, or transferring risk through insurance.
- Risk monitoring: ongoing monitoring of risks is critical to ensure that the Group is prepared for potential threats and to assess the effectiveness of risk mitigation strategies.

The risk management programme of the Group is an ongoing process that requires regular review and revision to ensure that it remains effective in the face of changing risks and circumstances and new threats.

PRINCIPAL RISKS AND MITIGATING MEASURES

On a periodic basis, risks are assessed, monitored and adjusted by the EXCO. The risk management matrix defined is discussed with and reported to the Audit & Sustainability Committee.

For each of the principal risks identified, a risk owner has been appointed who ensures a concrete action plan to mitigate the potential impact of the risks. The risk owner is also responsible for the follow-up of the defined actions. The results are reported periodically to the Audit & Sustainability Committee.

The principal risks listed below are considered to be the most relevant for the business of the Group that might have an impact on the achievement of the Group’s strategic objectives.

**RISK IDENTIFICATION**

Lotus Bakeries operates in a highly regulated industry. The principal risks listed below are considered to be the most relevant for the Group’s strategic objectives.

- Food safety and quality risks
- Financial risks
- Operational risks
- Regulatory risks
- Strategic risks

**RISK ASSESSMENT**

The Group identifies and assesses its risks based on a double materiality methodology, which evaluates the potential impact and likelihood of occurrence.

**RISK MITIGATION**

Mitigating measures are developed to manage or transfer the identified risks. These measures may include implementing process improvements, implementing controls, or transferring risk through insurance.

**RISK MONITORING**

Ongoing monitoring of risks is critical to ensure the Group is prepared for potential threats and to assess the effectiveness of risk mitigation strategies.

Lotus Bakeries is committed to act with integrity, honesty, fairness and in full compliance with applicable laws, rules and regulations at all times. It has developed a code of conduct which sets out six key principles which must be respected by all employees of Lotus Bakeries at all times.

- Remuneration Policy
- Dealing Code

People

Job market shortages

Given the scarcity on the labour market, Lotus Bakeries needs to pay attention to attracting sufficient talent to support its growth plans. To this end, Lotus Bakeries can rely on its professional customer policy and its intrinsic attractiveness as a company. Since 2020, we have also been deploying a Young Graduate Programme since 2020, with which we make young talent enthusiastic about our company. Finally, much attention is paid to employee branding and translating our corporate identity internally and externally.

Counterfeiting/Intellectual property

The success of the Lotus® Biscoff®, Lotus®TM Natural Foods and Lotus® Local Heroes products and brands is accompanied with the risk of counterfeiting, both in terms of the recipes of our products and the visual identity of our brands.

First of all, the recipe. The quality of all Lotus Biscoff products is an absolute priority. All employees are strongly committed to the continuous pursuit of high quality products and processes. The R&D department wants to use new insights into interactions between different raw materials to contribute to better production and distribution process, from the purchase of raw materials through the distribution of the final product, supported and guaranteed by structured procedures and systematic internal quality audits. External audits take place at regular intervals.

Safety & Quality

Failure to meet quality and food safety standards expose the Group to business interruption, litigation, product liability and recall claims. Lotus Bakeries applies the highest product safety standards to the entire production and distribution process, from the purchase of raw materials through the distribution of the final product, supported and guaranteed by structured procedures and systematic internal quality audits. External audits take place at regular intervals.

Inflation and volatility of raw materials

The risk of unfavourable effects of fluctuations in raw material prices on the results is limited by concluding long-term contracts with suppliers, regularly monitoring the price movements of raw materials, and by applying contracts with price-indexation clauses. Furthermore, in order to safeguard these efforts as much as possible, our recipes are protected as trade secrets wherever possible. In this end, strict procedures are in place regarding access, transfer and storage of data.

Counterfeiting/Intellectual property

To protect our brand identity in the best possible way, a clear strategy is in place aimed at identifying our brand assets, defining the desired protection, use and enforcement of our brands. Protection levels are updated annually, both at product and geographical level. Thanks to an automated, global notification system, the Intellectual Property department stays on top of identical or similar registrations. Furthermore, updates are shared with the legal department of Lotus Bakeries on a regular basis.

Counterfeiting/Intellectual property

In order to safeguard these efforts as much as possible, our recipes are protected as trade secrets wherever possible. In this end, strict procedures are in place regarding access, transfer and storage of data.

Counterfeiting/Intellectual property

Furthermore, the R&D team monitors and analyses competing products on a regular basis.

Counterfeiting/Intellectual property

In addition, the R&D team monitors and analyses competing products on a regular basis.

Counterfeiting/Intellectual property

Lotus Bakeries is aware of the possible negative impact of cultivation of key raw materials (such as oils, cocoa) on the environment, in particular deforestation, as well as the possible social impact in the regions where these raw materials are cultivated. For Lotus Bakeries, it is important that our consumers and customers have confidence that the above mentioned raw materials used in our products have been sustainably sourced. Lotus Bakeries carefully select its suppliers based on its responsible sourcing standards according to NDPE: No-Deforestation, No-Peat, No-Exploitation. Lotus Bakeries is a member of RSPO and is committed to purchasing only certified sustainable palm oil. All Lotus Bakeries sites which process palm oil have also obtained the RSPO certificate.

Sustainable sourcing

Lotus Bakeries is aware of the possible negative impact of cultivation of key raw materials (such as oils, cocoa) on the environment, in particular deforestation, as well as the possible social impact in the regions where these raw materials are cultivated. Lotus Bakeries is a member of RSPO and is committed to purchasing only certified sustainable palm oil. All Lotus Bakeries sites which process palm oil have also obtained the RSPO certificate.

Sustainable sourcing

Lotus Bakeries requests its suppliers to invest in following initiatives and to actively inform the Company on a regular basis:

- support smallholder producers to enter sustainable supply chains;
- processing and restoring forests in agro-ecological production landscapes;
- support of livelihood/poverty alleviation approaches to sustainability in palm oil producing areas; and
- support for one or more local conversion projects in palm oil producing countries.

As such, Lotus Bakeries aims to drive the transformational change needed in the supply chain of key raw materials.

Lotus Bakeries - 209

Lotus Bakeries

We are committed to the environment and help fight global warming. Lotus Bakeries is aware of the negative impact the industry can have on the environment and society, and the importance as an industrial partner. Lotus Bakeries also see opportunities to contribute to the progress of society and limiting global warming.

Climate-related disruption (including extreme weather events, floods, deforestation) might impact our operations and/or consumer demands and preferences. In everything we do, we strive to reduce our ecological footprint. We are already carbon neutral today with our 2 facilities. Beginning 2022, we signed the Commitment letter of Science Based Target initiative (SBTi), committing to science-based reduction targets, at the level with SBTi Criteria and Recommendations, in order to limit global warming to 1.5 degrees Celsius above pre-industrial levels.

Climate-related disruption (including extreme weather events, floods, deforestation) might impact our operations and/or consumer demands and preferences. In everything we do, we strive to reduce our ecological footprint. We are already carbon neutral today with our 2 facilities. Beginning 2022, we signed the Commitment letter of Science Based Target initiative (SBTi), committing to science-based reduction targets, at the level with SBTi Criteria and Recommendations, in order to limit global warming to 1.5 degrees Celsius above pre-industrial levels.

KEY COMPONENT RISK RISK DESCRIPTION & MITIGATING ACTIONS

IT architecture Data protection and cybersecurity Considering the ever-increasing digitalisation, the risk of unauthorised access to confidential data of Lotus Bakeries and personal data processed by Lotus Bakeries remains real. Fraud in the form of cybercrime is also high on the agenda.

Within Lotus Bakeries, clear policies are in place regarding access and security of business-critical information. Multi-factor authentication contributes to the security of our information. Corporate ICT has taken various measures to prevent, detect and limit the impact of cyber-attacks. In addition, there is an annual audit of the security of our ICT systems. Automated and continuous awareness efforts among Lotus Bakeries employees are also implemented.

Financial Foreign currencies The functional currency of the Company is the euro, which is also the Company’s reporting currency. Translation gains or losses that result from remeasuring foreign subsidiaries’ local currencies to EUR are recorded in other comprehensive income. Foreign currency transactions resulting in gains or losses are recorded in the consolidated statement of comprehensive income.

The main foreign currency transactions are denominated in USD, GBP, SEK, ZAR, CNY, HKR, CZK and CHF. The Group assesses on a case by case basis how to avoid any unfavourable currency impact and aims to hedge as many transactions as possible through a natural hedge.

Other financial risks The Group’s activities are exposed to a variety of other financial risks: market risk (including interest rate risk and price risk), credit risk and liquidity risk. For more details, refer to the consolidated financial statements in note 26.

External environment Compliance and regulations Lotus Bakeries is a global company generating the bulk of its revenue outside the home countries. As such, the Group is subject to applicable laws and regulations in the global jurisdictions in which it operates. As a manufacturer of food products with global commercial operations, these applicable laws and regulations relate to product safety, product labelling, health and safety, carbon reduction, intellectual property rights, anti-bribery and corruption, competition, data protection, export regulations, human rights and taxes. Relevant teams within the Group monitor closely any evolutions in the regulatory landscape to warrant compliance of the Group with regulatory initiatives as they emerge.

Wars As a global company, the Group may be impacted by conflicts in countries in which it operates. Operations and business could be affected indirectly by a conflict. These impacts may come from supply issues, an inflationary macro-economic environment, credit risks on customers and increasing financing costs.

Pandemics and other infectious diseases As the Group is operating around the globe, a global epidemic or pandemic outbreak may affect our business continuity. As such, crisis management is in place, which has been proved to be effective in the context of the COVID-19 pandemic.

EXTERNAL AUDIT

PwC Bedrijfsrevisoren BV, represented by Ms Lien Winne, certified auditor, was appointed as Auditor of Lotus Bakeries NV on May 13, 2022 by the Ordinary General Meeting of Shareholders for a term of three years. Its mandate expires immediately after the 2025 Ordinary General Meeting of Shareholders. The fees paid in 2023 for audit and non-audit services to PwC Bedrijfsrevisoren and to the parties associated with PwC Bedrijfsrevisoren, are disclosed in note 31 of the consolidated financial statements.

FINANCIAL CALENDAR
- Ordinary and Extraordinary Shareholders’ meeting: May 14, 2024
- Dividend payable from: May 21, 2024
- 2024 half-year results: August 9, 2024

CORPORATE WEBSITE AND ANNUAL REPORT
The corporate website provides comprehensive information regarding investor relations, including information about the Company and its activities, its shares, corporate updates, financial reports, investor presentations and a financial calendar.

This annual report is also available on the corporate website of Lotus Bakeries: www.lotusbakeries.com. The first part of the annual report, and the consolidated financial statements (second part), is available both in Dutch and in English. The third part of the annual report, consisting of the ESG and GRI reporting, is only available in English.

PER – Price Earnings Ratio: Share price at closing date divided by the earnings per share of the period.
FINANCIAL STATEMENTS

Consolidated statement of financial position 220
Consolidated statement of profit or loss and statement of comprehensive income 221
Condensed five-year consolidated financial statements 222
The following chapter of the 2023 annual report includes the consolidated statement of financial position, the consolidated statement of profit or loss and the consolidated statement of comprehensive income and the condensed five-year financial summary for the Lotus Bakeries Group. The complete set of consolidated financial statements, including all disclosures in accordance with IFRS, is presented in the financial supplement to this annual report and is available in Dutch and English.

These consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) as adopted for application within the European Union with comparative figures for 2023.

The Auditor has issued an unqualified audit opinion with respect to the consolidated and the separate financial statements of Lotus Bakeries NV.

**Notes:**

1. The report covers the year 2023 and includes turnover from products or services associated with taxonomy-aligned economic activities.
2. The table details the proportion of turnover from different categories, including climate change mitigation, climate change adaptation, water, pollution, circular economy, and biodiversity.
3. The turnover is further categorized into taxonomically aligned and non-aligned activities.
4. The report also includes a section on taxonomically eligible activities, with a breakdown into enabling and transitional activities.
5. The report provides a total turnover for both taxonomy-aligned and non-aligned activities.

## PROPORTION OF OPEX FROM PRODUCTS OR SERVICES ASSOCIATED WITH TAXONOMY-ALIGNED ECONOMIC ACTIVITIES - DISCLOSURE COVERING YEAR 2023

### A. TAXONOMY-ELIGIBLE ACTIVITIES

#### A.1. Environmentally sustainable activities (Taxonomy-aligned)

<table>
<thead>
<tr>
<th>Category</th>
<th>Climate Change Mitigation</th>
<th>Climate Change Adaptation</th>
<th>Water</th>
<th>Pollution</th>
<th>Circular Economy</th>
<th>Biodiversity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enabling</td>
<td>0.0 %</td>
<td>0.0 %</td>
<td>0.0 %</td>
<td>0.0 %</td>
<td>0.0 %</td>
<td>0.0 %</td>
</tr>
<tr>
<td>Transitional</td>
<td>0.0 %</td>
<td>0.0 %</td>
<td>0.0 %</td>
<td>0.0 %</td>
<td>0.0 %</td>
<td>0.0 %</td>
</tr>
</tbody>
</table>

#### A.2. Taxonomy-Eligible but not environmentally sustainable activities (not Taxonomy-aligned activities) (g)

<table>
<thead>
<tr>
<th>Category</th>
<th>Climate Change Mitigation</th>
<th>Climate Change Adaptation</th>
<th>Water</th>
<th>Pollution</th>
<th>Circular Economy</th>
<th>Biodiversity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enabling</td>
<td>0.0 %</td>
<td>0.0 %</td>
<td>0.0 %</td>
<td>0.0 %</td>

</tr>
<tr>
<td>Internal Employee</td>
<td>An internal employee is someone who is connected to Lotus Bakeries with an employment contract, whether of unlimited duration or of limited duration.</td>
<td>Our Employees</td>
</tr>
<tr>
<td>Location-based</td>
<td>A location-based method reflects the average emissions intensity of grids on which energy consumption occurs (using mostly grid-average emission factor data).</td>
<td>Our Environment</td>
</tr>
<tr>
<td>Market-based</td>
<td>A market-based method reflects emissions from electricity that companies have purposefully chosen (or their lack of choice).</td>
<td>Our Environment</td>
</tr>
<tr>
<td>NDPE</td>
<td>No Deforestation, No Peat, No Exploitation</td>
<td>Our Environment</td>
</tr>
<tr>
<td>Net financial debt</td>
<td>Net financial debt is defined as interest-bearing liabilities (excluding lease liabilities recognized in accordance with IFRS 16) deducted with cash and cash equivalents, term deposits and treasury shares.</td>
<td>Financial Statements</td>
</tr>
<tr>
<td>Non-recurring income and expenses</td>
<td>Non-recurring income and expenses are those items that are considered by management not to relate to transactions, projects and adjustments to the value of assets and liabilities taking place in the ordinary course of activities of the Company. Non-recurring income and expenses are presented separately, due to their size or nature, so as to allow users of the consolidated financial statements of the Company to get a better understanding of the normalised performance of the Company.</td>
<td>Financial Statements</td>
</tr>
<tr>
<td>Net non-recurring income and expenses</td>
<td>Non-recurring income and expenses are those items that are considered by management not to relate to transactions, projects and adjustments to the value of assets and liabilities taking place in the ordinary course of activities of the Company. Non-recurring income and expenses are presented separately, due to their size or nature, so as to allow users of the consolidated financial statements of the Company to get a better understanding of the normalised performance of the Company.</td>

<tr>
<td>Non-recurring income and expenses</td>
<td>Non-recurring income and expenses are those items that are considered by management not to relate to transactions, projects and adjustments to the value of assets and liabilities taking place in the ordinary course of activities of the Company. Non-recurring income and expenses are presented separately, due to their size or nature, so as to allow users of the consolidated financial statements of the Company to get a better understanding of the normalised performance of the Company.</td>
<td>Financial Statements</td>
</tr>
<tr>
<td>PFC</td>
<td>Projects for the Environment</td>
<td>Our Environment</td>
</tr>
<tr>
<td>Permanent Employees</td>
<td>Permanent employees are those employees who have a fixed term Lotus Bakeries contract.</td>
<td>Our Employees</td>
</tr>
<tr>
<td>Permanent Packaging</td>
<td>Permanent packaging directly protects the product &amp; informs the consumer. It is all packaging that a consumer takes home with the product.</td>
<td>Our Environment</td>
</tr>
<tr>
<td>PVdC coating</td>
<td>Poly-Vinylidene Chloride is a water-based coating often used to improve barriers and reduce permeability.</td>
<td>Our Environment</td>
</tr>
<tr>
<td>Rate of recordable work-related accidents for own employees</td>
<td>The number of work-related injuries with at least 1 day of absence of own employees divided by the number of total hours worked by own employees and multiplied by 1.000.000 hours.</td>
<td>Our Employees</td>
</tr>
<tr>
<td>REAT</td>
<td>REAT is defined as the recurring earnings after tax and is determined by excluding the non-recurring income and expenses and the related tax effects from the net result. REAT is used as the basis for dividend distribution.</td>
<td>Our Environment</td>
</tr>
<tr>
<td>REBIT</td>
<td>REBIT (recurring operating result) is defined as the operating result after deducting the non-recurring income and expenses.</td>
<td>Financial Statements</td>
</tr>
<tr>
<td>REBITDA</td>
<td>REBITDA (recurring operating result adjusted for depreciation and amortisation) is defined as the operating result after deducting the non-recurring income and expenses and non-cash costs related to share-based payment plans.</td>
<td>Financial Statements</td>
</tr>
</tbody>
</table>
