LOTUS BAKERIES: INTERMEDIATE STATEMENT

Lotus Bakeries achieved good sales growth during the first four months of 2013. This sales increase came mainly from the continued international growth of its branded products.

The investment programme to expand production capacity for caramelized biscuits in Lembeke and for cakes at Oostakker is now complete. The final phase, the transfer of the Frangipane line from Lembeke to Oostakker, was successfully undertaken last month.

The optimization of the Geldrop production plant together with the capacity expansion in Sintjohannesga will permit a better and more flexible response to the increasing and changing demand for gingerbread in the Netherlands. This investment project in the Netherlands is fully on track and will be completed by the middle of this year.

The expected internal sales growth and the consolidation of Biscuiterie Willems will contribute positively to the earnings in the first half of 2013. On the other hand the additional depreciation related to the significant investments in the Belgian and Dutch plants as described above will significantly impact the group’s total cost base in 2013. At the same time Lotus has opted to increase its marketing efforts for the various brands in different countries in 2013.

Lotus Bakeries is convinced that the investments in the production facilities along with the additional investment in brand marketing are necessary to secure the long-term growth of the company.

Lotus Bakeries in a nutshell
